

# Cirrus Insight

## Salesforce in your inbox.

Available for:  
**Gmail, Outlook,**  
**iOS & Android**

Free 14-day trial

### Salesforce Where you Work

You'll see instant Salesforce intelligence next to every email in Gmail, Outlook, or mobile. And you'll be able to create and update Leads, Contacts, Accounts, Opportunities, Cases, Tasks, and more (even custom objects) right from your inbox.

### Sync the Smart Way

Click a button to sync your emails and calendar events to Salesforce, and we'll automatically relate them to matching records. You can also relate them to any custom object and even save email attachments into the Chatter feed.

### 3x More Appointments

You'll schedule 3x more appointments by sending your available time slots (or a link to your calendar) to prospects and customers by email. When they click on a time, you've got a booked meeting. No more back and forth.

### Email Power Tools

With Cirrus Insight you get Send Later, Open Alerts, Reply Tracking, Follow-ups, Templates, and Mail Merge at your fingertips. And all of these sales activities stream into Salesforce so you can make more deals happen faster.

150,000 professionals use Cirrus Insight in Gmail or Outlook.
