

Understand your  
organisation like  
never before with  
Q-Pulse.

# Fast, fresh and simple, Ideagen's Q-Pulse is the software of choice for more than 2000 companies around the world.

One system, backed by 25 years of innovation, from an established and trusted vendor that allows you to:

Know your organisation inside and out

Take decisive action to create success

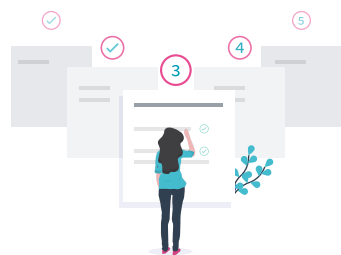

Create a culture of quality

## Know your organisation inside and out

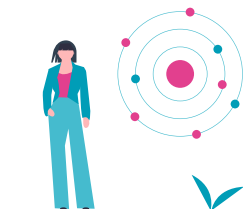

Transform your QMS from reactive repository to competitive weapon. Apply unprecedented intelligence and insight for the most complete picture of your organisation.

Gain complete organisational visibility, from your supply chain to your key stakeholders

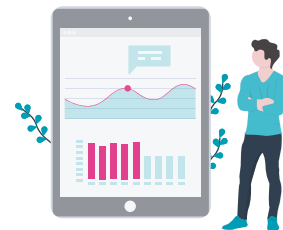

Push information from Q-Pulse into other platforms, like your ERP or CRM, to align your entire operation

Construct a single source of truth with consistent, reliable, centralised data

## Take decisive action to create success

Act quickly and confidently to exploit opportunity. Grow your business, unlock new markets and secure new quality standards – with smart data-driven decision-making.

Identify the top risks to your organisation and how to deal with them

Pinpoint key opportunities – and what you can do right now to exploit them

Take the guesswork out of decision-making with comprehensive data at your fingertips

## Create a culture of responsible business

Make quality and compliance the responsibility of everybody. Align your entire business around world class processes that satisfy your customers and regulators.

Bake repeatable world class quality into the DNA of your organisation

Demonstrate a culture of quality to your customers, regulators and certification bodies

Engage your entire workforce – not just the quality department

## DRIVE QUALITY WITH INDUSTRY-SPECIFIC EDITIONS

Embed quality into the heart of your operation with a tailored Edition targeted at the unique needs and demands of your industry.

Healthcare

Life Science

Food & Drink

Manufacturing

Construction

Using Q-Pulse to manage our business improvement program is like having a dedicated group of analysts working for you 24/7: the data is always available and can be quickly drilled into for specific details. With Q-Pulse, my job is much easier and my stress level is much lower.

Robert Rouzer, VP of Quality, VSE Corporation

## Services and support form a crucial part of your Q-Pulse Implementation

Ideagen offers a complete range of professional services to ensure your Q-Pulse implementation goes as smoothly as possible, with minimum impact to your valuable resource and maximum return from your investment.

Professional Services from Ideagen include:

- Software installation and deployment
- Project management
- System consultancy and configuration
- "Champion" training for the key implementation team
- Bespoke user training

Customers have unlimited access to our Support team, which provides comprehensive support on the use of our products.

We offer free web-based training in the implementation of Q-Pulse to all of our customers and our training courses enable you to maximise your investment.
