

Hireonix

AI-powered candidate sourcing and outreach — from discovery to engagement

THE FUTURE OF RECRUITMENT

Search, Discover, and Engage with AI

Hireonix transforms how you find talent by combining intelligent search with proactive outreach across multiple platforms. Our AI Co-Pilot understands your needs and connects you with the right candidates faster.

Natural Language Search

Simply describe your ideal candidate in free text. No complex Boolean queries or rigid filters — just natural conversation with our AI Co-Pilot.

Proactive Discovery

Find both active and passive candidates before they apply, dramatically expanding your talent pool and giving you a competitive advantage.

Multi-Platform Sourcing

Access candidates from LinkedIn, GitHub, Twitter, and more — all through a single, unified interface that saves time.

From Discovery to Engagement in One Platform

Intelligent Matching

Our AI analyses skills, experience, and relevance to identify the best-fit candidates for your roles. Stop manually sifting through hundreds of profiles — let technology surface the talent that matters.

Multi-Channel Outreach

- Tracked email sequences with real-time engagement metrics
- WhatsApp messaging for instant, personal connection
- Humanistic automated calls integrated seamlessly into your hiring pipeline

Why Companies Choose Hireonix

Traditional platforms like Naukri and LinkedIn Recruiter weren't built for today's proactive hiring needs. See how Hireonix delivers a fundamentally better approach.

Proactive Sourcing vs Inbound-Only

Don't wait for applications to arrive. Discover exceptional candidates who haven't even started their job search yet.

Unified Discovery vs Isolated Databases

Source talent across multiple public platforms instead of being confined to a single ecosystem with limited reach.

AI Co-Pilot vs Manual Filtering

Free-text search replaces rigid filters and complex Boolean queries. Just describe what you need in plain language.

Built-In Outreach vs Just Profiles

Email, WhatsApp, and call-based engagement — all tracked and managed in one streamlined workflow.
