

The Easy Way to Sync, Transfer or Migrate Across Platforms & Your Project Team

No silos. No re-keying. No gaps.

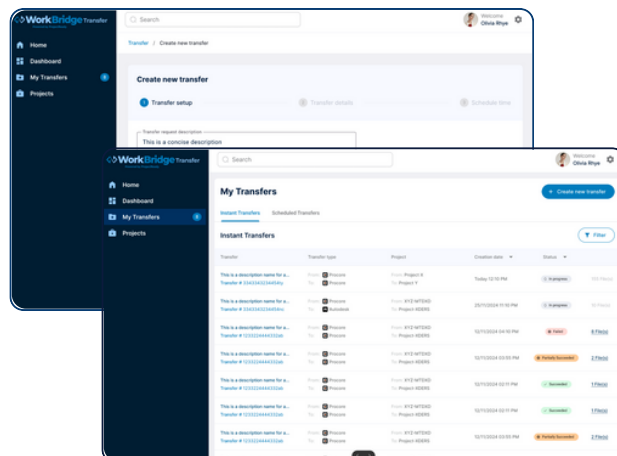

Just confidence that your data is where it needs to be, every time.

Sync, Transfer or Migrate

Across the **Autodesk Construction Cloud (ACC)** & **Procore** as well as multiple Autodesk Hubs or Procore Companies.

**Submittals – RFI's – Documents
Issues – Photos – Sheets – Forms**

And Seamlessly transfer documents to & from **SharePoint**.

Why ProjectReady WorkBridge

Simplified Cross-Platform Information Management

WorkBridge automates every step—making it simple to sync & transfer across platforms & your full project team

Lower Risk, Higher Confidence

Ensures your information is accurate, in sync, & fully logged with No Data at Rest—reducing risk.

Audit Reports for Every Move

You'll always know what moved, when, & where—delivering full transparency & accountability.

Keep Teams Aligned & in Their Platform of Choice

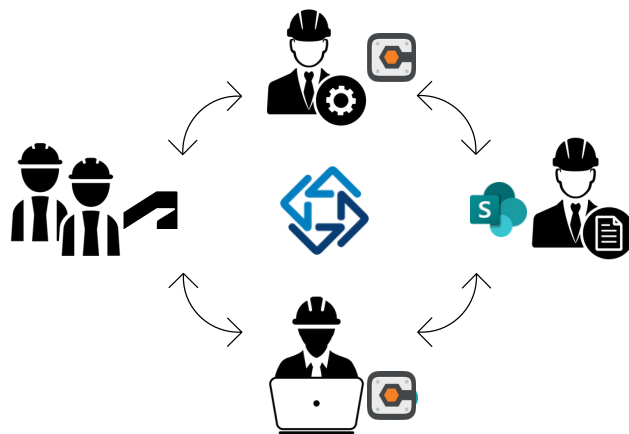

WorkBridge ensures the full project team are always on the same page, working in their platform of choice

Migration Made Easy

Make migration painless. Move past & current project data without losing context—or any manual effort.

Easy to Use, Simple to Set Up

Choose sync or transfer, pick your source & destination, select the data, and schedule it—done.

"Managing project information across platforms increases administrative tasks & potential errors. ProjectReady's WorkBridge solution helps project teams maintain synchronization of critical construction data throughout all stages of the construction lifecycle."

James Cook | Director of Industry & Technology Partnerships at Autodesk

Easy to Use, Simple to Install & Built to Scale
