

Compare plans of Maiture Suite

We have developed 3 different plans to respond to the most varied user needs, which can be integrated with our additional options.

The plans define the features and services available for a domain and for all email accounts, alias domains and email aliases belonging to it. You can activate domains with different plans, but it is not possible to activate email accounts with different plans within the same domain.

BASIC	The Basic plan is designed for professionals or companies that want convenient and quality service. It includes all the essential services and features to independently manage domains and accounts, and to allow users to consult and use their accounts.
PROFESSIONAL	The Professional plan is dedicated to companies that need to coordinate and communicate with all their collaborators in a simple and intuitive way. It includes services and advanced features to make the best use of your accounts, keeping them always synchronized.
ENTERPRISE	The Enterprise plan is for companies that need advanced communication tools for their employees and high security level in the use of services. It includes advanced security policies for the use of accounts and all communication tools available in the suite.

Available space	Basic	Professional	Enterprise
8 GB of email space	✓	✓	✓
