

Axonify Operations

Axonify's guided task management keeps frontlines focused on the jobs that are critical to success and deliver results.

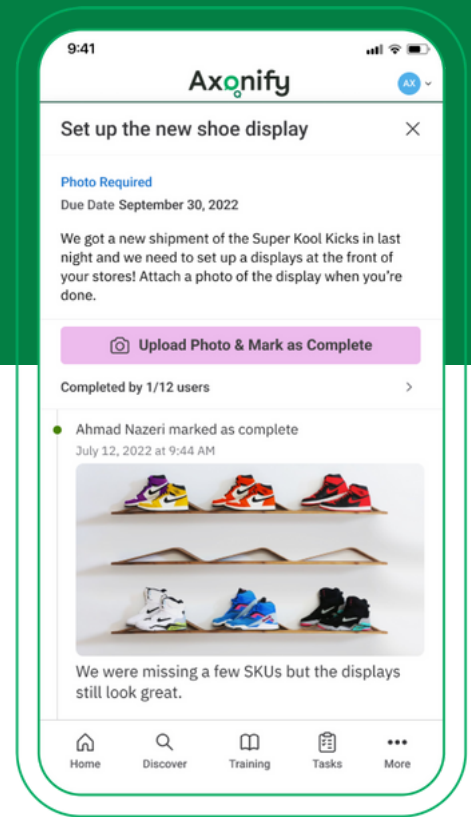

Enable your frontline to get tasks done correctly, the first time

Your staff wants to know exactly what's expected of them on a daily basis. Enabling them with Axonify Operations ensures that they have everything they need to execute consistently and confidently:

- Frontline teams see tasks assigned to them and their teammates
- Task completion is confirmed with photo verification or other options
- Completion metrics are shared with head office, and team members can be recognized for high task completion rates

Keep your people doing what matters most with Axonify Operations

- Streamline processes, improve quality and ensure staff consistently executes on your brand promise
- Reduce the strain on managers with HQ-assigned tasks and templates and easy manager verification
- Operationalize what they've learned through training to increase efficiencies for your frontline

Operationalize processes at scale

Keep your frontline focused on the right tasks and get oversight into who may be at-risk so you can get ahead of future problems, no matter the size of your organization.

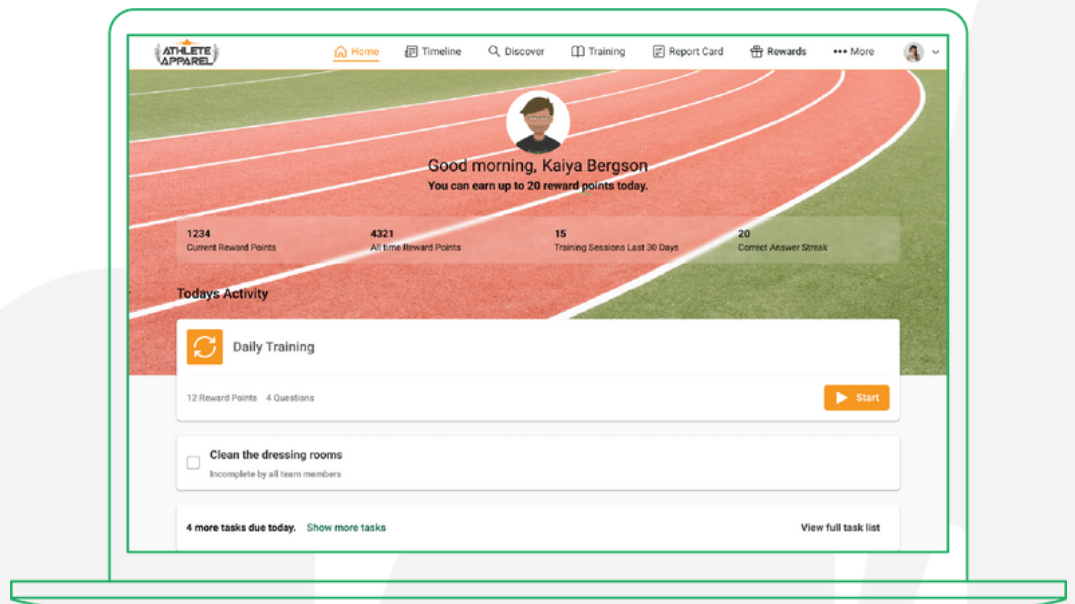

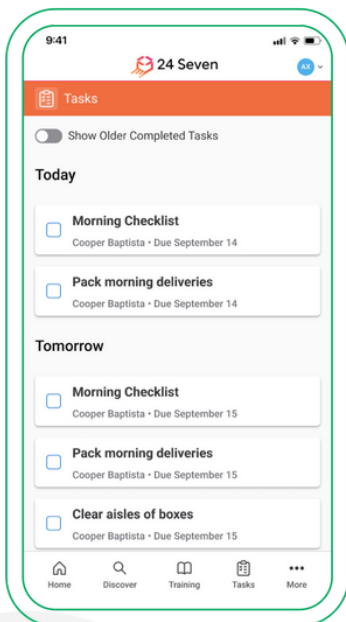

With Axonify it's easy to standardize processes, monitor task completion and even predict event success, at scale. Here's how:

- Deploy mandatory or suggested tasks at company-wide or regional levels
- Track task completion, quickly identifying knowledge gaps or engagement issues
- Use proactive insights to see how well your team is completing tasks on the floor (and course-correct as needed!)

Take the burden off managers

Between training staff, disseminating critical information and keeping locations afloat, frontline managers don't always have enough time for tactical strategy. With Axonify Operations, reduce the strain on managers so they can focus on driving business outcomes by:

- Managing their team's checklists including company-mandated or suggested tasks, and their own custom tasks
- Using tasks to drive pre-shift team huddles
- Monitoring the progress on task completion and reinforce desirable behavior
