

Strengthening trust, control, and scalability through SAP Cloud ERP

Before: Challenges and opportunities

- Fragmented systems across multiple business units.
- Reliance on small standalone applications.
- Lack of standardized global processes.
- Challenges in consolidating reliable company-wide data.

Why SAP and SEIDOR

- Adoption of SAP Cloud ERP to standardize operations globally.
- Access to built-in industry best practices.
- Support for cultural, organizational, and process transformation.
- Strategic guidance for short-, medium-, and long-term business goals.

After: Value-driven results

- Complete 360-degree visibility across the supply chain.
- Standardized processes across the organization.
- Increased confidence from customers and suppliers.
- Enhanced scalability to support continued nationwide growth.

“The before and after is a 180-degree change. Hand in hand with SEIDOR and SAP Cloud ERP, we are going to achieve the goals we have in the short, medium and long term.”
