Identity Access

One access layer.

Every login,
from app to OS.

The unseen risks weighing on your business

Why identity security can't wait

of organizations experienced at least one **identity-related security breach**

of organizations had **no MFA** on the targeted system

*Source: Sophos, The State of Identity Security 2026 Report

Meet Identity Access

Identity Access protects your entire identity perimeter, so no access point is left exposed.

1

console for application and device access

11

strong, context-aware authenticators

500+

enterprise applications protected

What Identity Access delivers

Single sign-on

Sign in once to securely access every application

Phishing-resistant factors

Block phishing attempts even when users are deceived

Conditional access

Control access dynamically based on real-time context

App-specific authentication

Stronger checks for critical apps, ensuring trusted access

Device authentication

Keep access limited to verified devices across your organization

MFA for privileged sessions

Add an extra layer of defense to critical UAC, sudo, and SSH sessions

MFA for endpoints

Extend MFA beyond apps to RDP, Wi-Fi, VPN, and RADIUS access

Offline verification

Verify users securely, even when they're offline

Passwordless authentication

Go passwordless without compromising security

Audit-ready reports

Stay audit-ready with reliable access records

3 reasons to choose Identity Access

01 Faster time to value

Start protecting users, applications, and devices with minimal infrastructure changes.

02 Stronger risk reduction

Minimize exposure to phishing, credential theft, and unauthorized access.

03 Consistent workforce protection

Extend secure access across cloud apps, devices, privileged sessions, VPNs, and Wi-Fi.

Built for every stakeholder

CISO

Minimize identity-driven risk while strengthening your posture for audits, regulators, and insurers.

IT admin

One console for access policies across users, devices, and applications.

End user

One-click access to everyday apps, protected against phishing and credential theft.

Pricing

\$5 per user/per year*

*Pricing based on a contract for 1,500 users.
