

Parallels® Market Report

As a highly rated, TrustRadius award-winning product, Parallels RAS has firmly established itself as a quality option for Virtual Desktop Infrastructure software buyers.

Alludo Parallels RAS is a TrustRadius award-winning product.

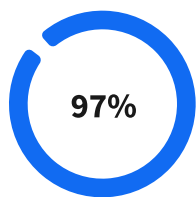

“Think outside the box - great support and great product”:

"Parallels RAS outranks all competitors in cost, support, and functionality. The others are getting too large and don't offer support for small to medium businesses with custom needs such as non-standard applications and build. I used the top 4 brands in a previous corporate office, where ITIL was implemented and followed. It is easier to work with a company like Parallels in regards to refining and maturing business processes as they will actually work with your team and not just force you to comply with their predefined standards."

97% of TrustRadius reviewers said implementation of Alludo Parallels RAS went as expected.

Delivers Good Value for the Price

98% of TrustRadius reviewers said Alludo Parallels RAS delivers good value for the price.

Lived up to Sales and Marketing Promises

97% of TrustRadius reviewers stated that Alludo Parallels RAS lived up to sales and marketing promises.

Alludo Parallels RAS has highly rated features. Their TrustRadius reviewers rate them highly for 10 out of 12 key virtual desktop infrastructure features.

"Parallels Remote Access Server can help make users more secure and productive."

"We use Parallels Remote Application Server internally and for multiple clients to provide an easy and secure remote access method for end users. It allows users with limited technical ability to be able to access secure corporate systems from a variety of different device types, usually with little to no setup assistance from a technician."

Brandon Barrett | VP of Operations | Information Technology & Services Incentivized

Scalability

9.4

Alludo Parallels RAS was rated a 9.4/10 for scalability. This indicates that Alludo Parallels RAS is capable of scaling with the needs and demands of their customers' use cases.

Availability

9.4

Alludo Parallels RAS was rated a 9.4/10 for availability, indicating this solution is highly available when users need it to be.

"Parallels Remote Application Server - it works every time!"

"We have different versions of certain applications that need to be available all at once - streaming these via Parallels Remote Application Server has provided the flexibility needed to meet our SLA. Additionally, certain web applications need a certain browser to work correctly and having the ability to force the browser to open the application has been invaluable to us."

Verified User | Administrator in Information Technology | Hospital & Health Care Company Incentivized

In their TrustRadius reviews, the most common pros of Alludo Parallels RAS were:

- Easy to use
- Simple and straightforward set up

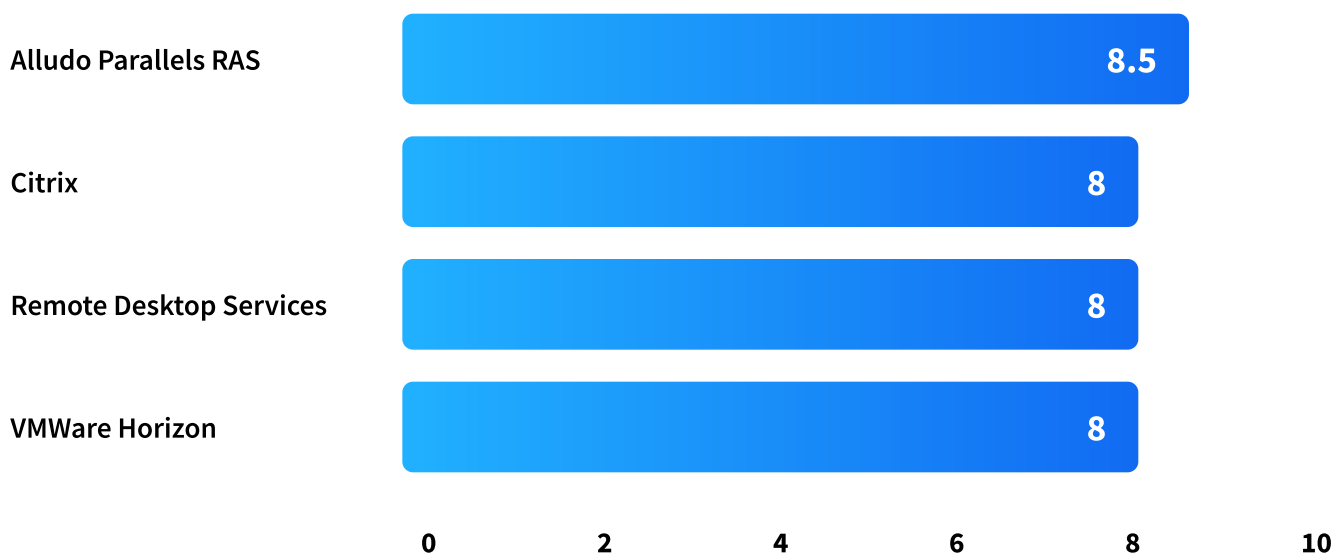

"When the product speaks for itself!"

"We use RAS for delivering our SAAS software in North America. Since our software is developed on Microsoft technologies, we always felt we were missing out on the opportunities for macOS or Linux users. Implementing RAS allowed us to increase our market share."

Verified User | Executive in Information Technology | Computer Software Company Incentivized

Alludo Parallels RAS was rated higher than the competition by reviewers:

"Parallels RAS has more than delivered on our expectations"

"We have many customers (mostly banks and mortgage companies) who use our software. One of the biggest headaches we have is installing our software on-premises and interacting with different organizations IT departments. Parallels Remote Application Server allows these customers to have access to our Windows applications without needing to install them on their machines, essentially allowing us to host our products and services in the cloud. It reduces our customer's costs and provides our company with another revenue stream."
