

Enhance your product with our voice API

Our developer-friendly API is reliable, easy to integrate and lightning-fast.

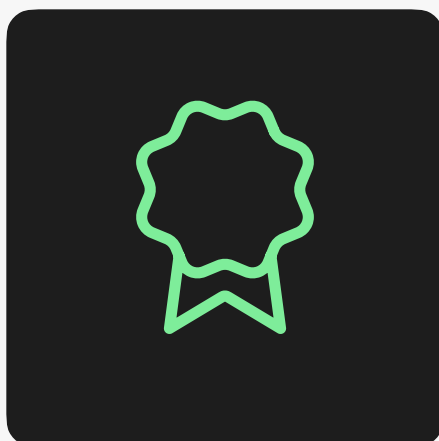

Elevate your products and experiences with the highest-quality AI voice API available today. Configure the exact set up you need, generate the perfect voice output every time, and render unlimited hours of voice streaming with configurable concurrency and customizable rate limiting.

Trusted

- Dual-layered content moderation blocks explicit and prohibited content from rendering before it's too late
- No deep-fake policy ensures your data and content is safe
- WellSaid grants commercial usage rights: any voice content created with our API on our platform is yours to use commercially

High-quality

- Hundreds of the most natural, authentic voices available
- Ultra-realistic, long-form content narration
- Highest quality audio formats available on the market
- Little-to-no service interruption or delay

Powerful

- Respelling and Oxford Dictionary integration
- Custom pronunciation features
- Phonetic respelling libraries that hold all respellings
- Say-as functionality
- Pre-populated pronunciation dictionary

“We wasted weeks combing through all of the text-to-speech services only to find out that we should have called WellSaid first. Developing around their RESTful API, we tailored WellSaid’s service to keep up with the high volume and consistent revising we need for our eLearning courses. Creating long-form narration for our courses used to take up 60% of our course development; with our API setup it’s now less half of that.”

Chris Black, Managing Director, Energy industry Academy

Pricing

<p>Starter</p> <p>1 API key Month to month contract</p>	<p>1 million characters per month</p>	<p>\$200 per month</p>	<p>*\$0.20</p>
<p>Launch</p> <p>1 API key Month to month contract</p>	<p>10 million characters per month</p>	<p>\$1,200 per month</p>	<p>*\$0.14</p>
<p>Scale 1</p> <p>Up to 10 API keys Annual contract required</p>	<p>250 million characters per month</p>	<p>\$2,000 per month</p>	<p>*\$0.05</p>
