Improve productivity

- Increase your profitability, streamline your shipping processes, and reduce your operating costs

Instant synchronization

- Real time data synchronization between the app and Microsoft Dynamics 365

Target Industries around the world

Integrate with Dynamics D365 F&O, Business Central and other third-party Backend ERPs

Logistics

Distribution

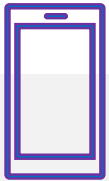

Retail

What is KPoD App?

Simplify your delivery process by using proof of delivery app for your drivers

Customers need a flexible and lightweight app that will automate job assignment, provide tracking of deliveries, embedded smart navigation, and provide quick delivery receipt to clients.

Businesses use them logistically to keep an eye on their goods and ensure prompt delivery, Increased shipping performance and efficiency is facilitated by picture confirmation of delivery.

With our app, drivers can easily deliver orders using the smartest route optimization and get a real-time digital signature along with a note from the customer.

The app allows, quickly and easily track the status of every delivery, Enable bidirectional data sharing and much more.

Consider Digital Priority

KPoD App is simple to use and requires no training, making it ideal for drivers

1

Improve accountability and efficiency by enhancing the delivery process

2

Streamline delivery operation with all-in-one KPoD app

3

Integrate with any Backend ERPs i.e., D365 F&O, Business Central and other ERPs

4

Get order details or jobs simply online without any paperwork

5

Robust proof of delivery app works online and offline

Ease of Use

A User-friendly interface mobile app lets users avoid the unnecessary training and complexity

Free to download

Application for android is free and takes seconds to download

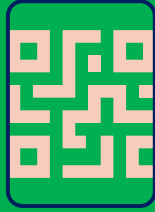

Scalability

The KPoD app is used for real-time process verification and order dispatch

Key Features of the Application

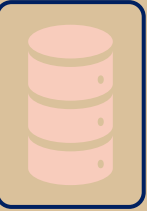

Multilingual support

Search order by QR code

History maintain

Real time data synchronization

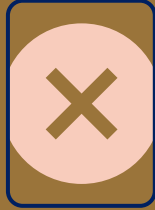

Image capturing

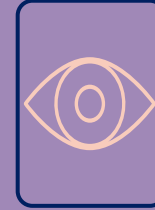

User-friendly and user-familiar screens and interfaces

Route optimization

Mobile app works offline

The logged in driver can view their orders for delivery

e-Signature

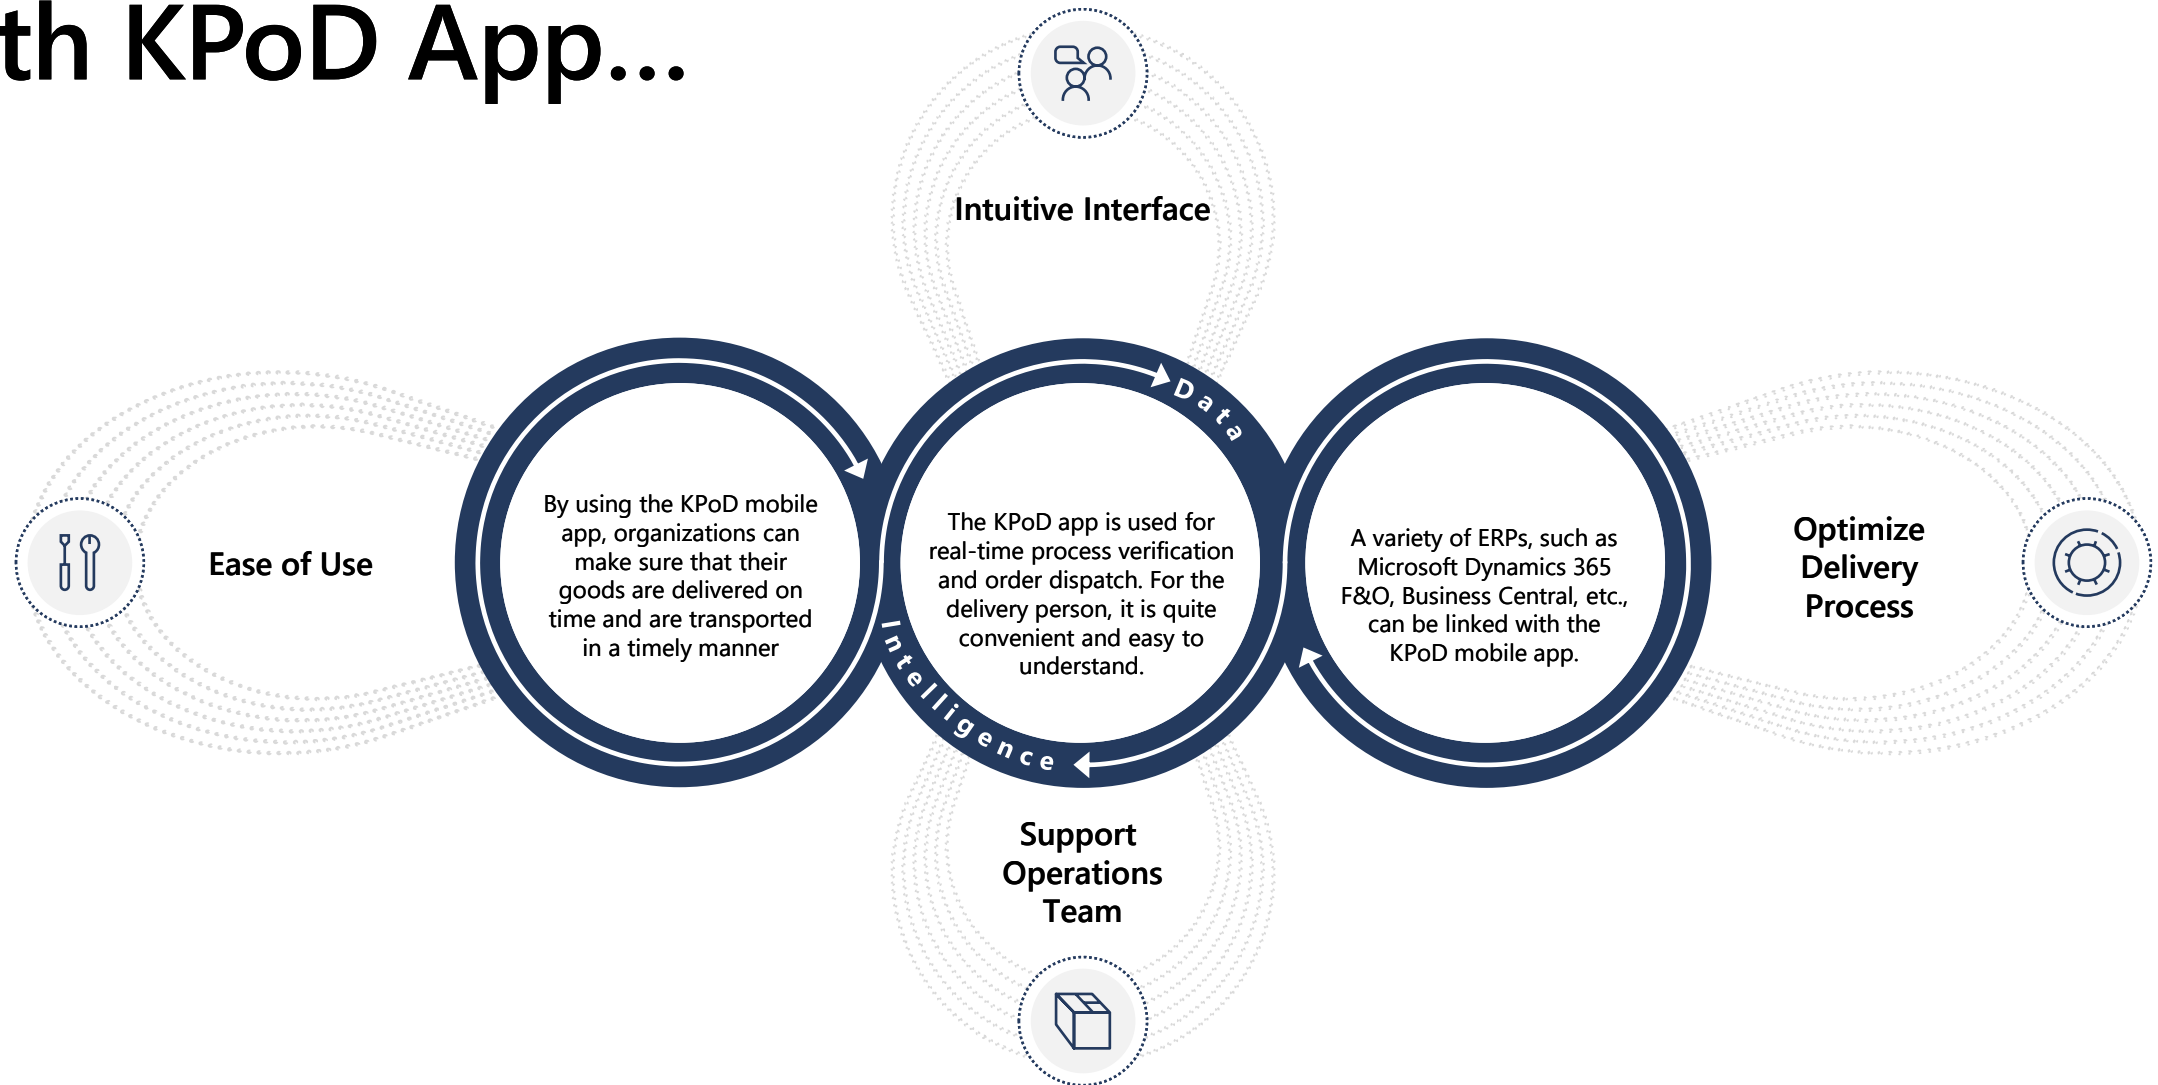

Digital customer note

Enable bidirectional data sharing

SUPPORTING SLIDES

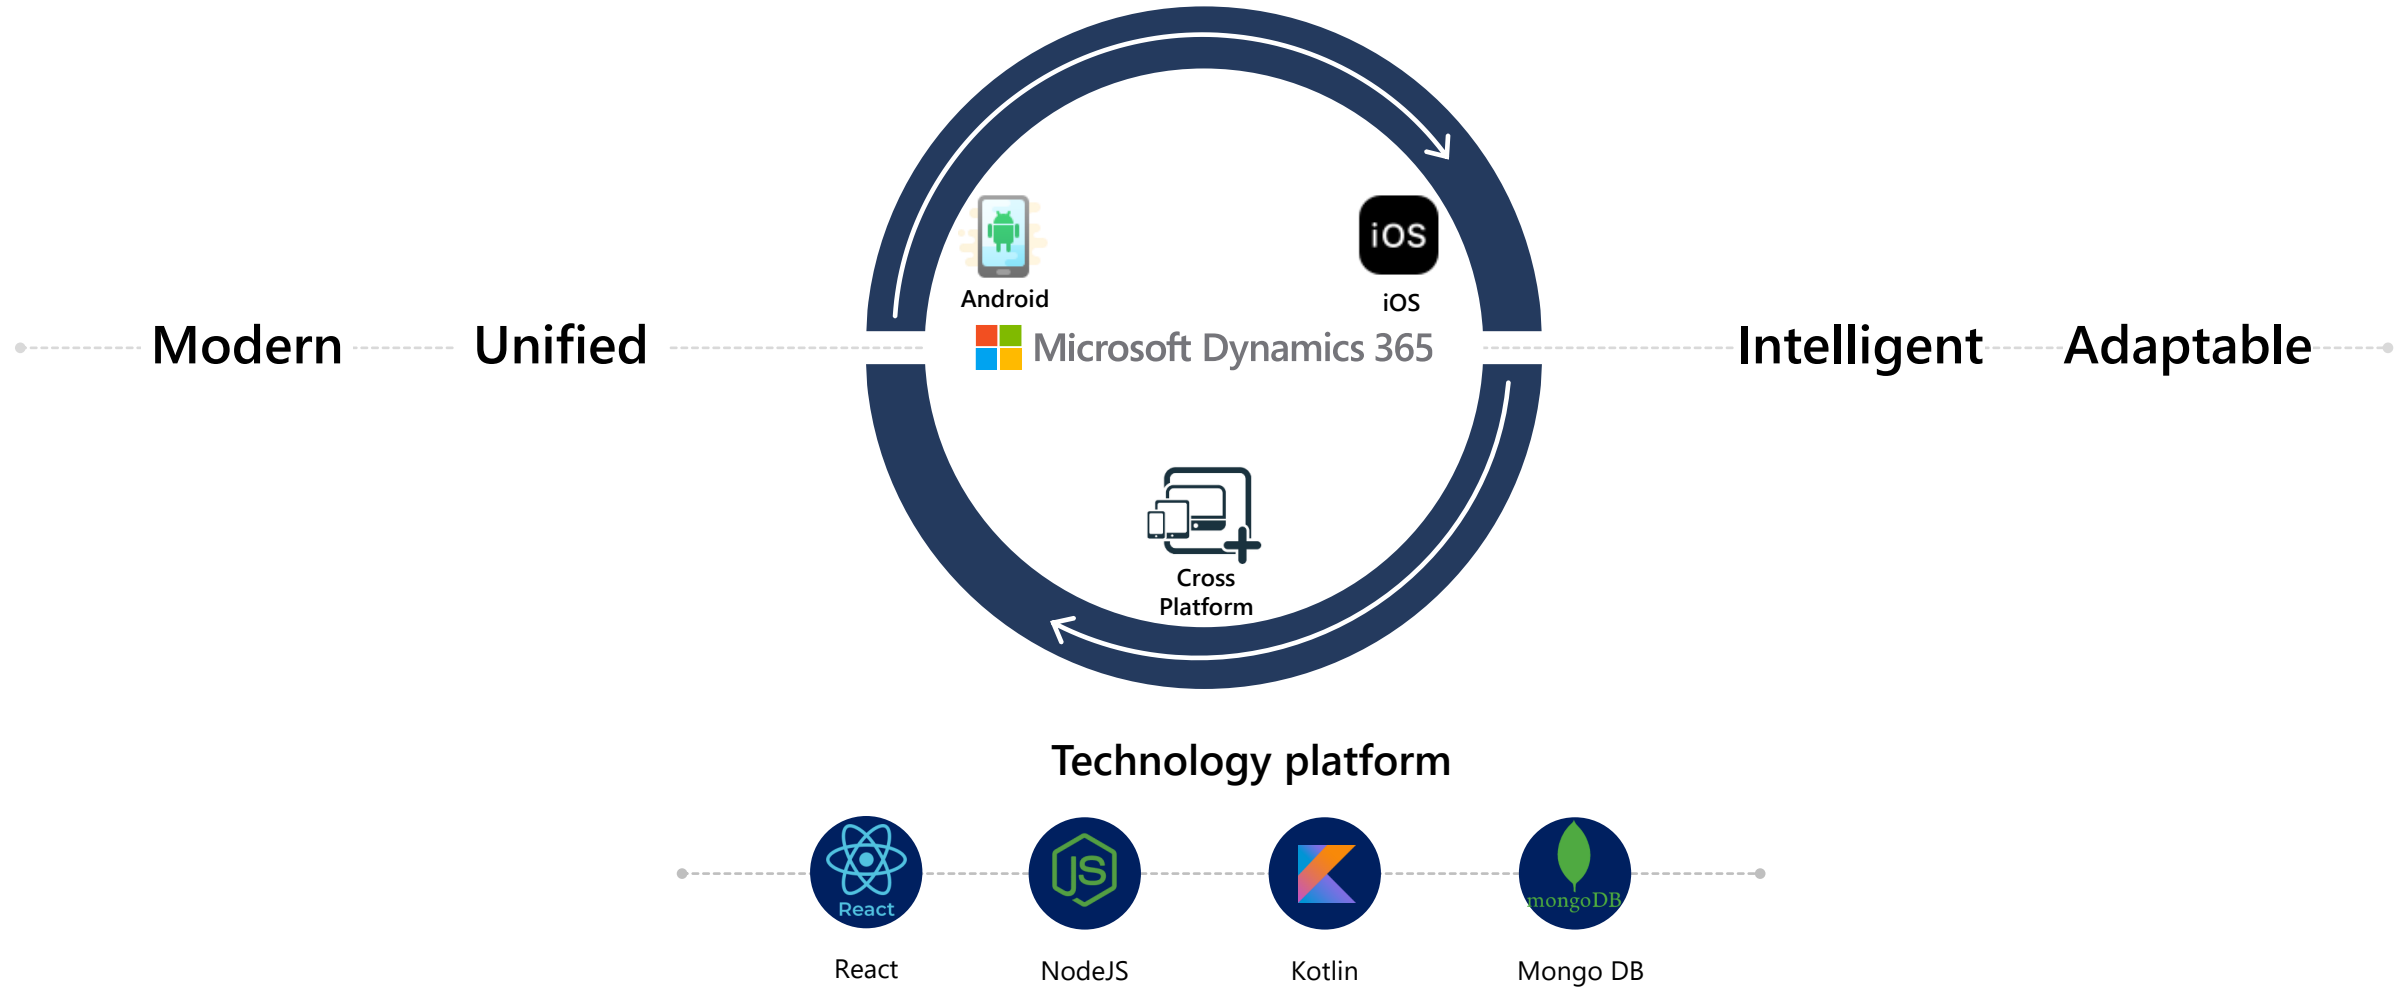

With KPoD App...

Order dispatch and real-time process verification are both done via the KAISPE KPoD mobile app and view the real-time synchronization of all the orders / invoices including the status of delivery orders along with truck id, invoice/order id, relevant entity with customer e-signature with notes in MS Dynamics D365 F&O. The application design and code is easy to maintain and enhance for future business requirements. Customers can easily integrate the app with other line of business applications using highly reliable and secure Microsoft technology platform.

By leveraging its functionality organizations can...

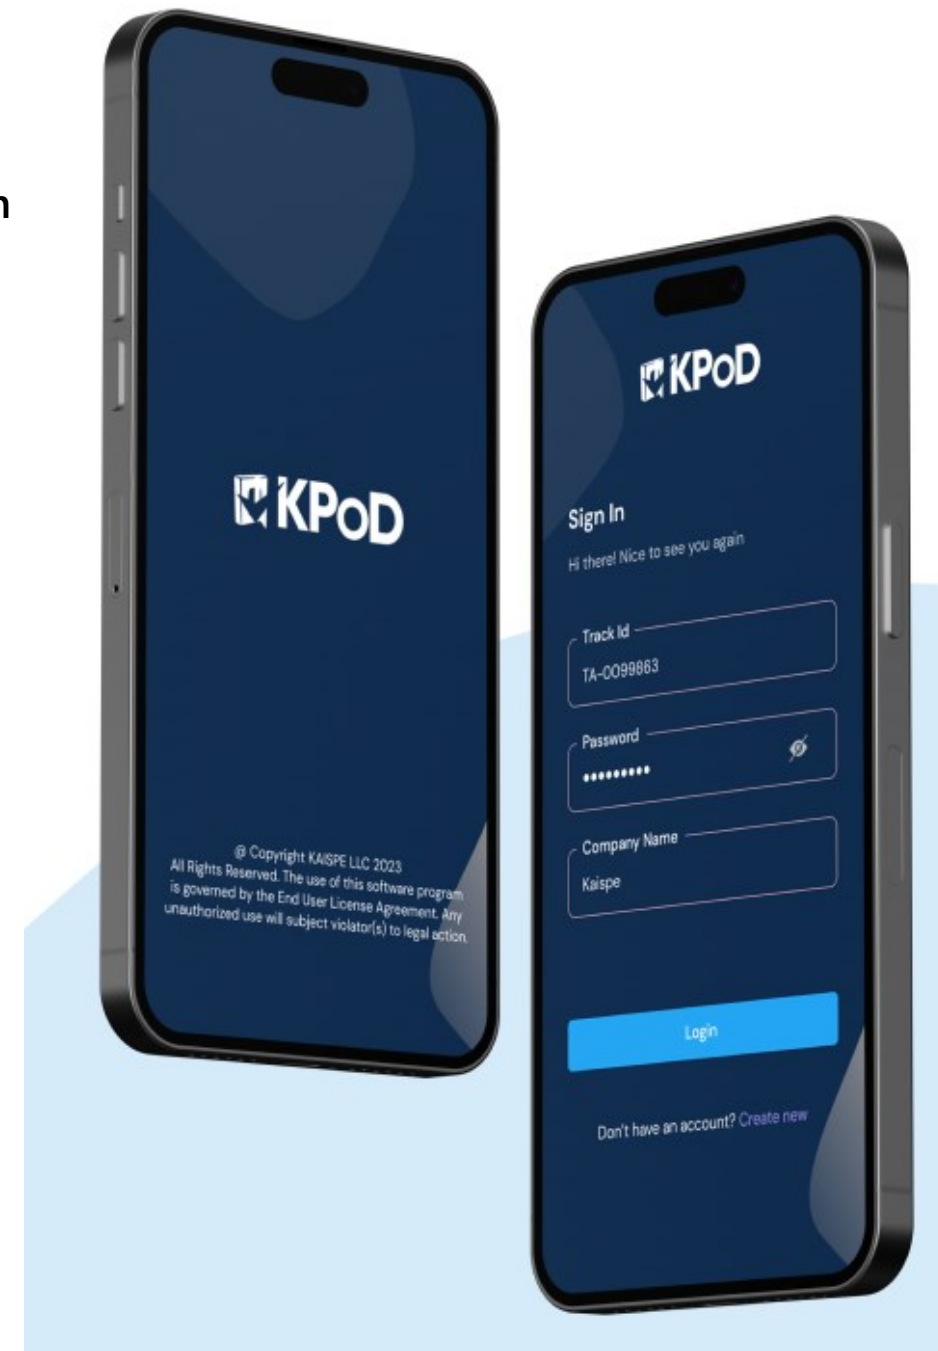

Make product deliveries efficient, keep teams organized and paperless

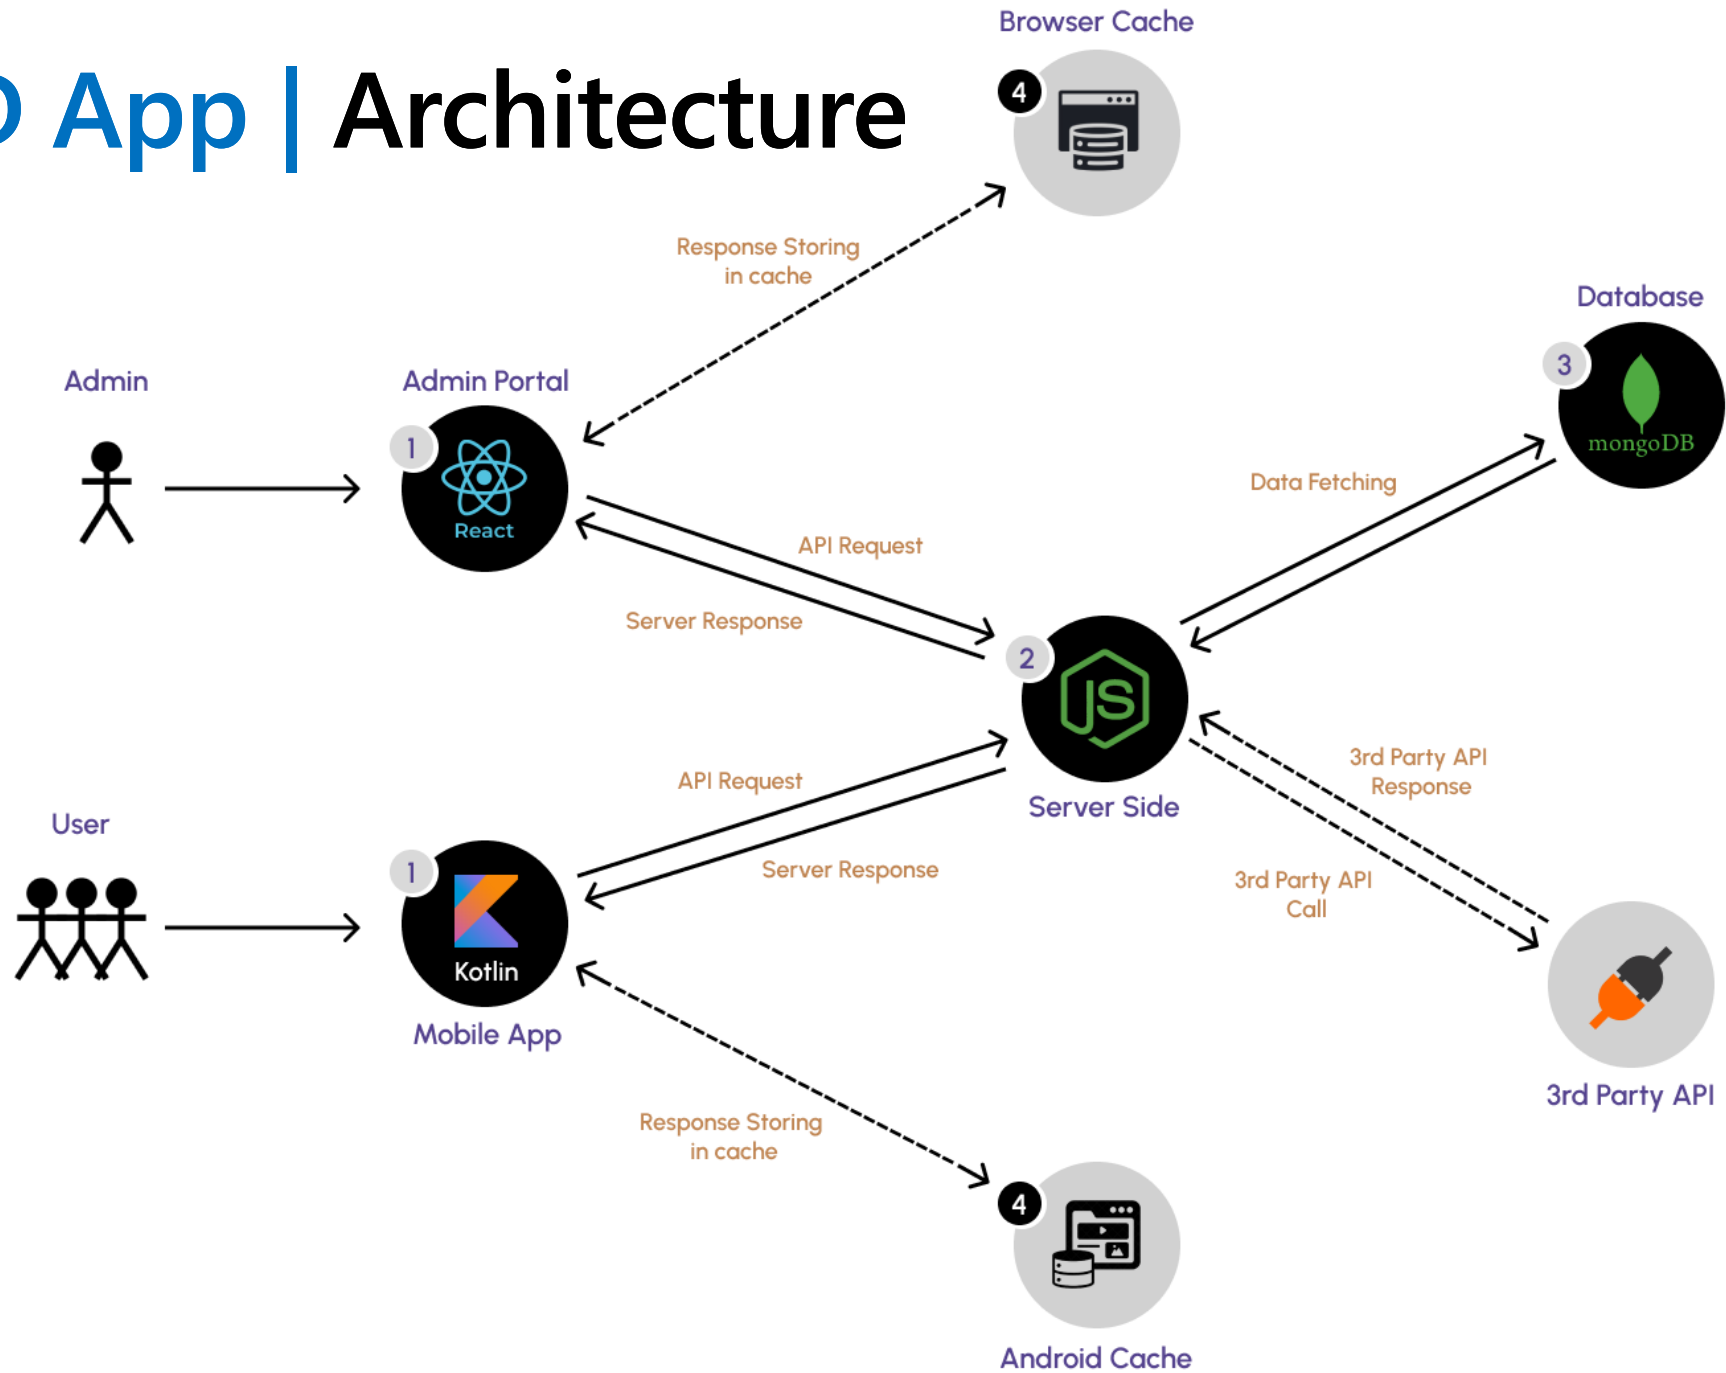

KPoD App | Mobile

An all-in-one Cloud based app for delivery driver operations, integrated with Microsoft Dynamics 365

- Accurate information on each of your delivery without having to worry about losing it
- Manage your logistics process well and focus on customer satisfaction
- Get full traceability for all of your orders and deliveries
- Maintain delivery order history on mobile devices
- Available on Android

KPoD App | Architecture

KPoD App | Use Case

Scenario

A delivery person named Martin Conn can deliver an order by using the mobile device

STEP 1

Martin opens the app by providing the credentials from the back office and login it

STEP 2

Now, martin click on the **Load Data** button
After that data will be downloading and got a successful notification

STEP 3

Now, Martin will use the QR code button or Search by Invoice / Oder button to find the all orders for delivery and dispatch to the customers

STEP 4

Martin will select the relevant order and verify it with the packing slip / invoice order for the delivery

STEP 5

During the delivery to the customer, Martin will take e-sign along with note from the customer and Save it

KPoD App | Prerequisites Guidance

Access the application for Drivers

- App need to be download from Google
- Open the application
- Credentials will be required for login

Access the application for Back office

- Licensing required
- Registered necessary accounts for user / driver registration

OVERVIEW

- KPoD mobile app that connects customers, delivery team & suppliers to streamline the proof of delivery process.
- The app provides a paperless platform to capture signatures and take photos to populate your digital delivery note and confirm that the delivery was successful.
- Create and maintain your daily delivery schedule that truck drivers can pull in or can be pushed to their mobile devices to execute the delivery.

The video player interface includes a progress bar at the bottom, a play button, a volume icon, and a timestamp of 1:20 / 5:33. There are also icons for full screen, settings, and a share button.

Using KAISPE KPoD app cloud offers a competitive edge

Customer Stories

Our costing issues are now greatly resolved. KAISPE helped us resolve this problem.

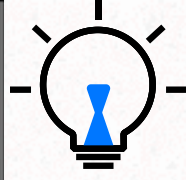

A photograph of two women in an office environment. The woman on the left is seen in profile, wearing a white top, looking towards the right. The woman on the right is facing her, wearing a light pink sweater, and smiling. They appear to be in a meeting. In the background, there is a large window with a view of a city and a green plant on the left.

Visterra uses KAISPE Purchase Requisition and the Microsoft Power Platform to automate procurement and boost productivity by 40 percent
