

Mobile Apps

Accelevents mobile apps help event organizers, exhibitors, and guests stay productive while on the go.

Boost Your Productivity

Busy event planners use our **Admin App** to process last minute registrations, sell tickets and merchandise, check attendees in, print their badges, and track registration performance. They also rely on it to drive attendee engagement via push notifications and live polls.

Keep Attendees Engaged

Guests use the **Attendee App** to check in, build their personal agenda, navigate venue maps, network with fellow attendees, set up meetings and participate in polls. They can also access live broadcasts remotely or use the app as a second screen during onsite sessions.

Support Exhibitor ROI

Exhibitors can quickly capture every lead by scanning their booth visitors' QR code with our **Attendee App**, leaving more time for lead qualification. They can also add detailed notes on the event attendees they interacted with.

Why Accelevents: Accelevents enterprise-grade event management platform is easy to set up and manage. Effortlessly manage your events from anywhere by combining our web application with our intuitive, user-friendly mobile apps. They are free and available for iPhone, iPad and Android devices.

Mobile Apps - The Easiest Way To Manage Complexity

Busy overseeing various events at the same time? Now you can manage them all from a single app.

Hosting multiple events for the same audience? No problem. Have their event connections carry over from event to event, so they can build up a valuable network of like-minded professionals.

Over 12,500 companies and organizations trust Accelevents with their events.
