

SCI KI Q in the Spotlight:

Recognized by
Research Analyst
Firms and Media
Outlets

SCI KI Q is a PAAS-based, AI-Powered, No-Code business data platform that empowers business teams in medium to large organizations to unlock the power of their data in real-time, without the need to learn complex technology.

On self-serve basis, they can deliver the right data to the right consumer in the right format to achieve operational efficiency, generate revenue, and enjoy competitive advantage while staying in control.

FORRESTER RESEARCH RANKS SCIKIQ AMONG THE TOP 34 AUGMENTED BUSINESS INTELLIGENCE PLATFORMS AND CHALLENGERS FOR BI GOVERNANCE VIA KPI STORE

Source: Forrester Research, Inc.

SCIKIQ, the native data fabric platform has been recognized among notable vendors in The Augmented Business Intelligence Platforms Landscape, Q1 2023 report by Forrester Research.

The report, authored by Forrester Vice President and Principal Analyst Boris Evelson, recognizes SCIKIQ among general-purpose platforms that can be used to build any domain application

Report: Rationalize Multiple Enterprise BI Platforms With BI Fabric

BUSINESS METRICS AND METADATA INTEGRATION

“Enterprises that are not ready to invest in platforms like data virtualization or data catalogs may have some success synchronizing BI platforms via import/export using an exchange standard. For now, only IBM, Microsoft, Oracle, SAP, and SAS support the standard. And, unfortunately, these are mostly good for platform-to-platform conversions and initial deployments.

However, there is an emerging trend to reverse-engineer business metrics created in tools like Tableau and Power BI into a united “metrics store” — one example is SCIKIQ business data fabric — and then manage them centrally going forward.”

Rising Star Award
