RSUPPORT

RemoteMeeting

RemoteMeeting works 100% in web environment without any program installation. It is a new concept of video conferencing service that combines the advanced web technology of HTML5 standard and Amazon's cloud infrastructure.
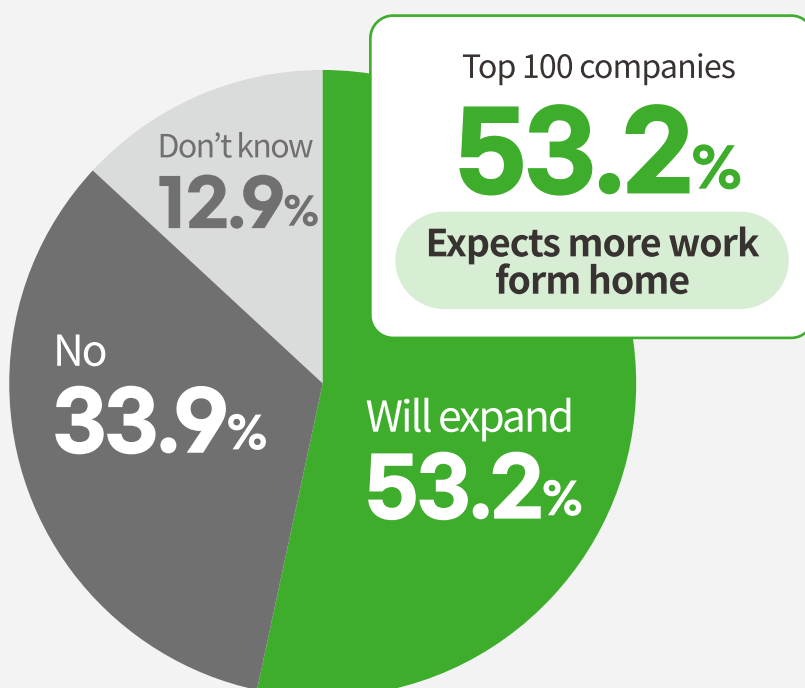

Of course, it is accessible via iOS, Android and other smart device and from anywhere through dedicated applications. Experience a better and more reliable online meeting service in full HD with crispy clear sound with RemoteMeeting.

Video conferencing is not an option, it's a REQUIREMENT

The COVID-19 outbreak has changed everything. People are switching from face-to-face meetings to virtual (i.e. video conferencing). In fact, according to the research statistics, the demand for video conferencing exploded as the number of home and remote work increased due to the spread of COVID-19, and this **is just the beginning.**

Q Would telecommuting·online meetings continue after the Covid-19?

Don't know
12.9%

No
33.9%

Top 100 companies
