About Infosec

Together we'll put cybercriminals out of business

Infosec Flex security and IT boot camps help you pass your certification exam the first time, guaranteed. With over 100 boot camps to choose from, Infosec Flex makes expert, live instruction convenient with online and in-person formats tailored to how, when and where you learn best. Across multiple disciplines and vendor certifications, Infosec students consistently achieve an industry-leading exam pass rate of 93%.

Expert instruction from leading industry professionals

All Infosec instructors are required to have at least 10 years of industry training experience, including training with certification governing bodies like CompTIA, (ISC)², ISACA, IAPP, EC-Council and more. Our instructors are experienced professionals with active roles in the information security industry. They work with public and private corporations, technology vendors, telecommunications companies and consulting firms around the world.

The most flexible training — guaranteed

Get training personalized to how, when and where you learn best — along with the peace of mind that comes with our guarantees.

- » **Exam Pass Guarantee:** If you don't pass your exam on the first attempt, get a second attempt for free. Includes the ability to re-sit the course for free for up to one year. (Flex Pro) *GIAC courses excluded*
- » **100% Satisfaction Guarantee:** If you're not 100% satisfied with your training at the end of the first day, you may enroll in a different Flex Pro or Flex Classroom course.
- » **Knowledge Transfer Guarantee:** If an employee leaves within three months of obtaining certification, Infosec will train a different employee at the same organization tuition-free for up to one year.

Information security

Ethical Hacking Dual Certification

Certifications: CEH and PenTest+
5-day boot camp

Learn black-hat hacking methods through hands-on exercises and engaging lectures in our most popular boot camp. Includes nightly capture-the-flag exercises where you can freely attack a simulated company in the most robust penetration testing lab environment in the industry.

Advanced Ethical Hacking

Certifications: CPT and CEPT
5-day boot camp

Our Advanced Ethical Hacking Boot Camp takes an in-depth look at the lesser-known and more-difficult-to-master techniques utilized by advanced persistent threats like hostile foreign powers, sophisticated cybercrime syndicates and terrorist organizations.

Mobile & Web Application Penetration Testing

Certifications: CMWAPT
5-day boot camp

This boot camp will prepare you for the real world of mobile and web application penetration testing through lab exercises and lectures from an expert instructor. In this hands-on boot camp, you will learn the skills, tools and techniques required for conducting comprehensive security tests of mobile devices and web applications.

Penetration Testing

Certifications: CEH, PenTest+, CPT & CEPT
10-day boot camp

Our Penetration Testing Boot Camp is the information security industry's most comprehensive penetration testing course available. It combines lessons from our Ethical Hacking Boot Camp and Advanced Ethical Hacking Boot Camp in back-to-back sessions.

Red Team Operations

Certifications: CRTOP
5-day boot camp

Do good by being bad in this exclusive Red Team Operations Boot Camp designed to teach you to think like a cybercriminal, help you better defend your organization, and prepare you for the Certified Red Team Operations Professional exam.

Cyber Threat Hunting

Certifications: CCTHP
3-day boot camp

This course teaches you the latest tactics and tools used in the fight against cyber-attackers. Gain expert-level knowledge and skills in cyber threat identification and become a Certified Cyber Threat Hunting Professional.

Information security

NIST Cybersecurity Framework

3-day boot camp

This course teaches you how to employ the NIST Cybersecurity Framework in order to better manage and reduce your organization's cybersecurity risk.

Fundamentals of Information Security

5-day boot camp

Fundamentals of Information Security is a five-day, accelerated boot camp covering the most critical issues and practices of information security.

SCADA Security

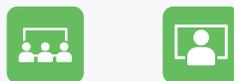

Certifications: CSSA
5-day boot camp

SCADA networks are often some of the most overlooked aspects of information and network security policies in large enterprise organizations, heavy industry and public utilities. This boot camp will teach you the skills required to direct and manage appropriate cybersecurity protection for your SCADA network.

Incident Response & Networking Forensics

Certifications: CSIH
5-day boot camp

Our Incident Response and Network Forensics Boot Camp teaches you how to effectively detect, contain and mitigate security incidents. Over 20 lab exercises provide you with the necessary skills to fight back against would-be attackers.

OWASP Top 10

2-day boot camp

This boot camp will educate developers, designers and architects about the most important web application security weaknesses and their security implications. You will learn basic methods to protect against these high-risk threats and receive guidance on detecting and managing web application vulnerabilities.

CSIS Top 20 Critical Security Controls

5-day boot camp

This boot camp teaches you how to master the 20 important security controls as published by the Center for Strategic and International Studies. The CSIS Top 20 Boot Camp will establish a foundation for risk and vulnerability assessment for both insider and outsider threats.

Information security

Security Architecture Design

5-day boot camp

This boot camp will bring you up to speed on the latest in security-specific architecture design. You will learn how to implement the myriad of security technologies available on the market today in an effective and cost-efficient manner. This course can be customized to address an organization's unique IT infrastructure and industry concerns.

Computer & Mobile Forensics

Certifications: CCFE & CMFE
7-day boot camp

Our authorized Computer and Mobile Forensics Boot Camp prepares you for the CCFE and CMFE certification examinations by teaching the necessary skills to investigate computer and mobile threats and computer crime.

Computer Forensics

Certifications: CCFE
5-day boot camp

Our authorized Computer Forensics Boot Camp teaches you critical techniques and information about identifying, preserving, extracting, analyzing and reporting computer forensic evidence through use of the most popular computer forensic tools.

Data Recovery

Certifications: CDRP
5-day boot camp

Our Data Recovery Boot Camp will review the most technical, logical and physical data recovery problems in IT. This in-depth, hands-on training covers both traditional, spinning platters, as well as cutting-edge SSD technology.

Mobile Forensics

Certifications: CMFE
2-day boot camp

Learn how to use mobile forensics to investigate cybercrime! Our Mobile Forensics Boot Camp builds your skills in a hands-on lab environment so you can apply what you learned the day you leave training.

Reverse Engineering

Certifications: CREA
5-day boot camp

This boot camp will teach you the binary analysis skills needed to discover the true nature of any Windows binary. You will learn how to use standard reverse engineering programs, various hex editors, binary analysis programs and code coverage analyzers.

Information security

Assessing & Securing the Perimeter

3-day boot camp

Today's network perimeter is no longer a single, easily definable boundary. This makes defending the perimeter a very difficult task. In this boot camp, you will learn the diverse set of technologies and applications needed to secure your network perimeter.

Advanced Computer Forensics

5-day boot camp

In our Advanced Computer Forensics Boot Camp, you will become well-versed in volatile memory, registry artifact, file structure and rootkit analysis. 60% of this boot camp curriculum features hands-on training!

Reverse Engineering Android

3-day boot camp

This hands-on, three-day boot camp will give you the knowledge and skills needed to reverse engineer Android applications. You will learn how to analyze Android APK binary, hostile code and binary vulnerabilities, and also how to see through binary obfuscation schemes.

Advanced Reverse Engineering Malware

Certifications: CERE A

4-day boot camp

This boot camp is the most in-depth and hands-on malware reversing training in the industry. Due to this boot camp's level of technical difficulty, prerequisites apply.

ISACA & IT auditing

CISA

Certifications: CISA
5-day boot camp

This boot camp will review the essential areas covered in the CISA exam and teach you how to develop, manage and supervise programs securely. The training includes a series of sample exam questions to give you a feel for the CISA exam format.

CGEIT

Certifications: CGEIT
4-day boot camp

The Certified in Governance of Enterprise IT certification was developed by ISACA for experienced IT governance personnel. This boot camp explains the CGEIT examination process and helps you prepare for the CGEIT exam through sample questions and exercises.

CISM

Certifications: CISM
5-day boot camp

This boot camp reviews the core concepts of the CISM exam: security governance, risk management, information security program management, information security management and response management. The boot camp features instructor-led training and rigorous practice tests and simulations.

CRISC

Certifications: CRISC
3-day boot camp

Our CRISC Boot Camp will review the four domains of the CRISC exam: risk identification; risk assessment; risk response and mitigation; and risk and control monitoring/reporting. This boot camp will prepare you for the CRISC exam and teach you the most in-demand skills in today's IT landscape.

DoD RMF

4-day boot camp

The DoD RMF Boot Camp is the most in-depth training available for students seeking accreditation in the Department of Defense Information Assurance Risk Management Framework. This boot camp is designed for DoD, IC and other government employees and contractors.

IT Auditing in Depth

3-day boot camp

This boot camp details system auditing concepts and best practices. You will leave with a solid foundation in the basics of information technology as they apply to audit and security concerns, as well as the necessary controls for enterprise systems.

(ISC)²

CAP

Certifications: CAP
3-day boot camp

Learn how to maintain and authorize information systems within the NIST Risk Management Framework (RMF). You'll leave this boot camp with the knowledge and domain expertise needed to pass the Certified Authorization Professional (CAP) exam the first time you take it.

CSSLP

Certifications: CSSLP
5-day boot camp

Become a Certified Secure Software Lifecycle Professional (CSSLP). You'll leave this boot camp with the knowledge and domain expertise needed to pass the CSSLP exam the first time you take it.

CCSP

Certifications: CCSP
6-day boot camp

Learn how to design, manage and secure assets in the cloud. This boot camp teaches you best practices around cloud data, applications and infrastructure — and prepares you to become a Certified Cloud Security Practitioner (CCSP).

CISSP

Certifications: CISSP
7-day boot camp

Our CISSP Boot Camp is the highest-rated CISSP training available. In this boot camp, you will review the eight CISSP common body of knowledge domains, and also learn how to lead and manage enterprise infosec programs. A self-paced specialization course is included at no cost.

ISSAP (CISSP Concentration)

Certifications: ISSAP
4-day boot camp

Our ISSAP Boot Camp will prepare you for the ISSAP certification through review of security architecture and program management. The boot camp reviews access control systems and methodology, communications and network security, cryptography and more.

ISSEP (CISSP Concentration)

Certifications: ISSEP
4-day boot camp

This boot camp focuses on the art and science of the information systems security engineering process. You will learn the knowledge required of information systems security engineers operating within the federal government and leave prepared to pass your ISSEP exam.

(ISC)²

ISSMP (CISSP Concentration)

Certifications: ISSMP
4-day boot camp

This boot camp prepares you for the ISSMP exam through review of the five major domains: security management practices; system development security; compliance management; continuity planning/ disaster recovery; and law, investigation, forensics and ethics.

CompTIA

A+

Certifications: A+
5-day boot camp

Our A+ Boot Camp will prepare you for the A+ certification exam and advance your technical skills. In this boot camp, you will learn about the hardware, software and configuration skills needed to become a successful computer technician.

Combination Boot camps Available

Network+

Certifications: Network+
5-day boot camp

This boot camp will prepare you for the Network+ exam and teach you important networking administration and support skills. Through this boot camp, you will become familiar with core networking concepts such as TCP/IP protocols, subnetting, CLI tools and more.

Combination Boot camps Available

Security+

Certifications: Security+
5-day boot camp

The Security+ Boot Camp teaches you information security theory and reinforces theory with hands-on exercises to help you learn by doing. You will learn how to configure and operate many different technical security controls, and leave prepared to pass your Security+ exam.

CySA+

Certifications: CySA+
5-day boot camp

This course will prepare you to pass the CySA+ exam on your first attempt. You will learn how to configure and use the latest threat detection tools, analyze data and identify vulnerabilities in your organization's infrastructure.

CASP+

Certifications: CASP+
5-day boot camp

Our CASP+ Boot Camp teaches you information security theory through hands-on exercises to help you learn by doing. You will learn how to configure and operate many different technical security controls and leave prepared to pass your certification exam.

Linux+

Certifications: Linux+
5-day boot camp

This comprehensive boot camp will teach you the fundamental skills needed to configure, manage and troubleshoot Linux systems. You will learn how to create, edit and search Linux files; control permissions and ownership; process and format text data; and use shell scripts to perform multiple tasks.

CompTIA

Server+

Certifications: Server+
5-day boot camp

Our Server+ Boot Camp provides foundational knowledge concerning server hardware, software and storage, along with a focus on best practices in an IT environment, disaster recovery and troubleshooting.

IAPP & privacy

Certified Information Privacy Technologist

Certifications: CIPT
2-day boot camp

Our authorized CIPT Boot Camp helps you gain a deep understanding of the need of privacy in the IT environment and the common challenges enterprises are facing when factoring data privacy into their products and services.

Combination Courses Available

Certified Information Privacy Manager

Certifications: CIPM
2-day boot camp

Our authorized CIPM Boot Camp focuses on the development, implementation and management of privacy policies and frameworks.

Combination Courses Available

Certified Information Privacy Professional/US

Certifications: CIPP/US
2-day boot camp

Our authorized CIPP/US Boot Camp provides privacy professionals with essential knowledge and understanding of important U.S. laws, regulations and enforcement models.

Combination Courses Available

Certified Information Privacy Professional/Europe

Certifications: CIPP/E
2-day boot camp

Our authorized CIPP/E Boot Camp provides privacy professionals with essential knowledge and understanding of important European Union laws, regulations and enforcement models.

Security awareness

Certified Security Awareness Practitioner

Certifications: CSAP
3-day boot camp

During this course, you'll learn to identify potential target groups within your organization, design your security plan based on potential areas of weakness, and ensure that your people stay alert to danger. As a CSAP, you'll learn to recognize problems and stop trouble before it starts.

Security Awareness Champions

1- or 2-day boot camp

During this course, you'll get an exclusive look at the attack patterns used by hackers and cybercriminals. Learn to recognize and counter common holes in your company's security, stop attacks before they begin, save others from making dangerous mistakes, and pass the benefit of your education on to your coworkers and friends.

Security Awareness for Application Developers

1- or 2-day boot camp

During this course, you'll brush up on your security knowledge with the experts. Our experienced instructors know cybersecurity from both the defending and attacking sides, and have designed a program based around the distinctive security needs of web application and software developers.

Security Awareness for IT Professionals

1- or 2-day boot camp

During this course, you'll learn about the latest in cyberthreats and attack strategies, current best practices in security, and techniques for encouraging vigilance in others. Discover the latest, most common and most dangerous security threats, and learn to stop trouble before it starts!

Security Awareness for End Users

1- or 2-day boot camp

You don't have to be a serious programmer to be an important part of company security. Most successful attacks are aimed not at computers, but at you, the human behind them. Get an exclusive look at the attacks used by hackers and cybercriminals everyday in this awareness course.

Secure coding

Secure Coding in PHP

3-day boot camp

This boot camp will teach you how to make your applications resistant to contemporary attacks through the internet. Special emphasis is placed on the security issues of JavaScript, Ajax and HTML5.

Secure Coding in Java & JEE

3-day boot camp

Our Secure Coding in Java and JEE Boot Camp will teach you the skills needed to develop and deploy secure applications. In this boot camp, you will learn effective, secure programming skills you can immediately implement at your workplace.

Secure Coding for .NET

3-day boot camp

This comprehensive boot camp teaches .NET, ASP.NET and C# developers how to develop secure .NET applications. In this boot camp, you will learn effective, secure programming skills you can immediately implement at your workplace.

Secure Coding for C/C++

2-day boot camp

This boot camp provides in-depth coverage of common security vulnerabilities related to C/C++ programming bugs. It explains practical vulnerability mitigation techniques and includes hands-on exercises to explain the root causes of security problems.

Secure Coding for iOS

2-day boot camp

Our Secure Coding for iOS Boot Camp provides in-depth coverage of key iOS security features, as well as related vulnerabilities, attacks and mitigation techniques.

Secure Coding for Android

2-day boot camp

The Secure Coding for Android Boot Camp provides an in-depth review of Android security technology, services and common vulnerabilities related to Android native code and Java. The boot camp includes hands-on exercises to teach you how to analyze vulnerabilities and mitigation techniques.

Microsoft

MCSE: Core Infrastructure or Productivity Solutions

Certifications: MCSE: Core Infrastructure or Production Solutions Expert
9-day boot camp

Learn Microsoft Server 2016 virtualization and cloud computing skills! This boot camp provides hands-on experience and prepares you to earn either the MCSE: Core Infrastructure or MCSE: Productivity Solutions Expert certification.

MCSA: Windows Server 2016

Certifications: MCSA: Windows Server 2016
9-day boot camp

Learn how to install, configure and maintain Windows Server 2016. This boot camp provides hands-on experience and prepares you to earn your MCSA Windows Server 2016 certification.

MCSE: Server Infrastructure 2012

Certifications: MCSE Server Infrastructure
13-day boot camp

You will leave our MCSE Boot Camp with the knowledge and expertise needed to successfully pass the MCSE exam the first time you take it. In this boot camp, you'll learn vital Microsoft Server 2012 Cloud-computing and virtualization skills that directly transfer to your workplace.

MCSA: Windows Server 2012

Certifications: MCSA: Windows Server 2012
9-day boot camp

This boot camp teaches you real-world skills through hands-on labs and simulations. Our intensive, instructor-led boot camp ensures you leave with Server 2012 skills that directly transfer to your workplace.

Additional Microsoft training boot camps available

As a Microsoft Learning Partner, we offer a wide array of Microsoft skill-based boot camps. We are constantly adding new boot camps and updating older ones. If you're interested in additional Microsoft training, ask your Infosec representative how we can help. Other available Microsoft boot camps include:

- » MCSA/MCSE Server Upgrade
- » Sharepoint
- » Skype for Business
- » Powershell
- » Developer boot camps
- » Windows 8
- » Windows 10
- » Office
- » Communications

GIAC®

GSEC Certification Training

Certifications: GSEC
5-day boot camp

This boot camp will prepare you for the GIAC Security Essentials certification exam, which is more advanced than GISF and tests more in-depth knowledge of security concepts, including both theoretical topics and practical aspects.

GPEN Certification Training

Certifications: GPEN
5-day boot camp

This boot camp will prepare you for the GIAC Penetration Tester certification exam, which assesses your knowledge of network and system design as well as how to discover vulnerabilities.

GCIH Certification Training

Certifications: GCIH
5-day boot camp

This boot camp will prepare you for the GIAC Certified Incident Handler (GCIH) certification exam, which tests your knowledge around understanding an incident, detecting an incident, using various tools and understanding different types of attacks.

Additional GIAC boot camps available

We offer many other GIAC boot camps for our enterprise clients. If you're interested in additional GIAC training, ask your Infosec representative how we can help. Other available courses include:

Penetration testing

- » GIAC Web Application Penetration Tester (GWAPT) Training
- » GIAC Python Coder (GPYC) Training
- » GIAC Mobile Device Security Analyst (GMOB) Training
- » GIAC Assessing and Auditing Wireless Networks (GAWN) Training
- » GIAC Exploit Researcher and Advanced Penetration Tester (GXPN) Training

Industrial control systems (ICS)

- » GIAC Global Industrial Cyber Security Professional (GICSP)
- » GIAC Response and Industrial Defense (GRID) Training
- » GIAC Critical Infrastructure Protection (GCIP) Training

Cyber defense

- » GIAC Information Security Fundamentals (GISF) Training
- » GIAC Certified Enterprise Defender (GCED) Training
- » GIAC Certified Perimeter Protection Analyst (GPPA) Training
- » GIAC Certified Intrusion Analyst (GCIA) Training
- » GIAC Certified Windows Security Administrator (GCWN) Training
- » GIAC Certified Unix Security Administrator (GCUX) Training
- » GIAC Continuous Monitoring (GMON) Training
- » GIAC Critical Control Certification (GCCC) Training

Digital forensics and incident response

- » GIAC Certified Forensic Examiner (GCFE) Training
- » GIAC Certified Forensic Analyst (GCFA) Training
- » GIAC Network Forensic Analyst (GNFA) Training
- » GIAC Advanced Smartphone Forensics (GASF) Training
- » GIAC Reverse Engineering Malware (GREM) Training

Developer

- » GIAC Web Application Defender (GWEB) Training
- » GIAC Secure Software Programmer – Java (GSSP-JAVA) Training
- » GIAC Secure Software Programmer – .Net (GSSP-NET) Training

Cisco Associate

CCNA Dual Cert Associate & Cyber Ops

Certifications: CCNA & CCNA Cyber Ops
7-day boot camp

Infosec's authorized CCNA Dual Certification Boot Camp helps you build your knowledge of networking and provides hands-on experience installing, configuring and operating network devices — all while preparing you to earn two Cisco certifications.

CCNA & CCENT

Certifications: CCENT & CCNA
5-day boot camp

This boot camp uses engaging lectures and hands-on labs to teach network engineers and administrators Cisco router and switch configuration. You'll learn real-world Cisco networking skills and leave prepared to pass your CCENT and CCNA exams.

Boot camp retires February 2020

CCNA Associate

Certifications: CCNA
5-day boot camp

Infosec's authorized CCNA Boot Camp helps you build your knowledge of networking and provides hands-on experience installing, configuring and operating network devices.

CCNA Security

Certifications: CCNA Security
2-day boot camp

Our CCNA Security Boot Camp will teach you how to design and implement secure Cisco networks. You will learn foundation-level configuration of security using the Cisco IOS on switches and routers, and leave prepared to pass your CCNA Security exam.

Boot camp retires February 2020

CCNA Cyber Operations

Certifications: CCNA Cyber Ops
2-day boot camp

Infosec's authorized CCNA Cyber Ops Boot Camp is an intense two-day training designed to build a foundation of skills around cybersecurity operations. You will acquire the skills necessary to begin a career working with associate-level cybersecurity analysts within a SOC.

CCNA Quad

Certifications: CCENT, CCNA, CCDA & CCNA Security
7-day boot camp

This accelerated boot camp is designed to teach you an apprentice-level knowledge of routing, switching, troubleshooting, network design and security. You will leave with the skills needed to earn your CCENT, CCNA, CCDA & CCNA Security certifications and advanced your networking career.

Boot camp retires February 2020

Cisco Professional

CCNP Routing & Switching

Certifications: CCNP Routing & Switching

10-day boot camp

Take your networking professional career to the next level! Infosec's authorized CCNP Boot Camp is a comprehensive 10-day training that prepares you to earn one of Cisco's most prestigious certifications.

CCNP Security

Certifications: CCNP Security
13-day boot camp

Our CCNP Security Boot Camp will teach you how to design and implement secure Cisco networks and prepare you for the CCNP Security certification. You will learn basic and advanced configuration for firewalls, VPNs and IDS/IPS solutions.

CCNP Wireless

Certifications: CCNP Wireless
5-day boot camp

The CCNP Wireless boot camp will teach you how to design, implement and operate Cisco wireless networks and optimize them for performance. This boot camp will help you pass your certification exam with a thorough review of wireless networking principles and theory.

Virtualization

VMware Dual Cert

VCP6.5 Data Center
Virtualization, VCA Digital
Business Transformation
7-day boot camp

Infosec's VMware Boot Camp combines a 30-day pre-study course with seven full days of immersive, instructor-led training. Our program is designed specifically for system and network engineers requiring full knowledge of VMware vSphere virtualization solutions.

Microsoft Hyper-V Platform

4-day boot camp

This important boot camp covers key infrastructure considerations for IT organizations exploring options within the Microsoft Virtualization Platform. Topics covered in the boot camp include: server and scale; dynamic memory; software SKU considerations; configuration; deployment and planning tools; enabling Hyper-V; and Microsoft Hyper-V Server 2012.

Microsoft Private Cloud Essentials

4-day boot camp

This boot camp will provide you with a working knowledge of Cloud services. Technologies covered include virtual machines, websites, storage, data transfers, media services encoding, CDN, SQL Database and Service Bus connections.

Enterprise infrastructure

JNCIA-Junos (Carrier-Grade Routing & Switching)

5-day boot camp

Our JNCIA-Junos Boot Camp will give you the foundational knowledge needed to begin a career in Juniper networking. This training guides you through basic networking fundamentals, core concepts of Junos configuration and an introduction to policy and firewall management.

JNCIS-SEC (Carrier-Grade Routing & Switching)

5-day boot camp

This is a hands-on boot camp relating to SRX Series Services Gateway configuration, operation and implementation in a typical network environment. Key topics include security policies/zones, NAT, IDP and High Availability (HA) clusters.

JNCIP-ENT (Carrier-Grade Routing & Switching)

5-day boot camp

Our JNCIP-ENT boot camp teaches you the switching concepts and operational skills needed to configure and monitor Junos. You will learn about VLANs and STP, along with port and device security features and High Availability (HA) features. In addition, the boot camp will cover load balancing and filter-based forwarding, IP tunneling and more.

F5 Certified BIG-IP Administrator

4-day boot camp

This boot camp will review the entire application stack — from traditional network knowledge to advanced application-layer understanding. You will leave this boot camp with new skills to differentiate your career and pass your F5 certification exam.

Fiber Optics 1-2-3

5-day boot camp

This introductory fiber optics boot camp will teach you how to connectorize, splice, test and troubleshoot optical fiber networks using the latest fiber optic technology and equipment. You will also learn how to increase workflow efficiency, reliability and on-the-job safety.

Data Center Fiber Optics

5-day boot camp

This hands-on class is for installation contractors and end users involved in building and maintaining local area networks (LANs), municipal networks, private networks and data centers. Topics covered include fusion splicing, anaerobic field connector installation, system parameters and more.

Enterprise infrastructure

Snort

3-day boot camp

Our introductory Snort Boot Camp will teach you the basics of network intrusion prevention. You will learn how to use Snort to perform protocol analysis, content searching/matching and to detect a variety of attacks and probes.

Enterprise Security Architecture and Design

5-day boot camp

Learn the essentials of enterprise security design for security engineering with this hands-on information security course. This training will bring you up to speed on the latest security-specific architecture.

Red Hat®

RHCSA

Certifications: RHCSA
5-day boot camp

The RHCSA Boot Camp will help you train and prepare for the RHCSA certification, the most popular Red Hat Linux certification. In this boot camp, you will learn the necessary skills and best practices for installing, configuring and managing Red Hat Linux in an enterprise environment.

RHCE

Certifications: RHCE
5-day boot camp

This boot camp will help you train and prepare for the RHCE certification. You will learn the necessary skills and best practices for installing, configuring and managing Red Hat Linux in an enterprise environment.

RHCDS

Certifications: RHCDS
5-day boot camp

Our RHCDS boot camp is designed for students with the RHCE certification. This boot camp will teach you a broader set of tools from the Red Hat portfolio to implement reliable, scalable solutions in areas particularly important to mission-critical data center environments.

RHCA

Certifications: RHCA
5-day boot camp

The RHCA Boot Camp is an immersive boot camp geared toward experienced RHCE certification holders. It is designed to address some of the largest and most complex IT challenges. In this boot camp, you will review the critical skills and knowledge of RHCDS, plus advanced networking services security, system monitoring and performance tuning.

Project management

PMP

Certifications: PMP
5-day boot camp

Infosec's Project Management Professional (PMP) Boot Camp provides a quick and convenient approach to PMP certification. You'll gain the knowledge needed to pass the PMP exam and the project management education hours required for certification all in one boot camp.

CompTIA Project+

Certifications: Project+
3-day boot camp

This boot camp covers the entire project lifecycle, from initiation and planning through execution, acceptance, support and closure. It will prepare you for the Project+ exam and help you validate you have the project management skills needed to complete projects on time and within budget.

PMI-ACP

Certifications: PMI-ACP
3-day boot camp

If you use agile practices in your projects, or your organization is adopting agile approaches to project management, the PMI-ACP certification is an excellent choice. This training will prepare you for PMI-ACP certification and teach you the various principles, practices, tools and techniques used across agile methodologies.

CAPM

Certifications: CAPM
3-day boot camp

This boot camp will prepare you for CAPM certification, a valuable entry-level certification for project practitioners. You will learn fundamental knowledge, terminology and processes of effective project management.

ITIL 4 Foundations

Certifications: ITIL 4 Foundations
3-day boot camp

The ITIL is a set of best practices used to deliver high quality IT services. This boot camp will review the ITIL's body of knowledge, including the processes, procedures, tasks and checklists you can use to offer quality services in an efficient way.

ITIL Service Strategy (Lifecycle Module)

5-day boot camp

This boot camp will teach you the skills needed for strategic development, appraisals, financial management and demand management under the ITIL framework. You will learn to optimize your organization's IT offerings and capabilities.

ITIL Continual Service Improvement (Lifecycle Module)

5-day boot camp

Successful implementation of ITIL Continual Service Improvement best practices enables IT departments to reduce downtime and costs while improving customer satisfaction. You will learn how to plan, implement and optimize Continual Service Improvement processes.

ITIL Service Design (Lifecycle Module)

5-day boot camp

This boot camp will teach you how to continually improve your organization's services by analyzing the four Ps of ITIL Service Design: people, products, partners and processes. The training includes review of the concepts and skills associated with good service design.

ITIL Service Transition (Lifecycle Module)

5-day boot camp

This ITIL refresher boot camp focuses on a lifecycle approach to IT service management with emphasis placed on IT business integration. Adopting all or some elements of ITIL into an organization's IT service management strategy will add significant value to a company's service portfolio.

ITIL Operational Support & Analysis (Capability Module)

5-day boot camp

This boot camp is a good fit for professionals working in organizations following ITIL service management best practices. The training places emphasis on operational principles and processes within the entire lifecycle of services, including analysis of services and continuity of delivery.

ITIL

ITIL Plan, Project & Optimize (Capability Module)

5-day boot camp

In this boot camp, you will learn how to plan, protect and optimize services provided by your organization. The training will provide guidance on managing demand, capacity and availability to ensure service continuity, quality and functionality.

ITIL Release, Control & Validation (Capability Module)

5-day boot camp

To implement new services in a controlled and cost-effective manner, IT departments must successfully implement ITIL Release, Control and Validation best practices. This training will teach you how to plan, implement and optimize the Release, Control and Validation processes at your organization.

ITIL Service Offerings & Agreements (Capability Module)

5-day boot camp

This boot camp is for professionals managing commercial offers and agreements for IT service management. In this training, you will learn how proper Service Level Agreements (SLAs) and contracts with suppliers can prevent misunderstandings and ensure a smooth and timely delivery of services.

ITIL Managing Across the Lifecycle

5-day boot camp

The ITIL library is a set of best practices used to deliver high-quality IT services. This boot camp reviews the ITIL body of knowledge, a de facto world standard for IT best practices.

Join us in the fight against cybercrime.

INFOSEC Skills

Infosec Skills keeps your security skills fresh year-round with over 500 courses mapped to the NICE Cybersecurity Workforce Framework.
