

Complete Feature List

Tailor Every Solution With 150+ Interactive Features

Because we built everything ourselves, you can deliver individual products or integrate features from any solution.

Advanced Platform Features	2
Virtual Events, Exhibits, Expos, Webinars & Webcasts	4
Continuing Education, Professional Development & Certifications	5

Advanced Platform Features

Breakout Sessions

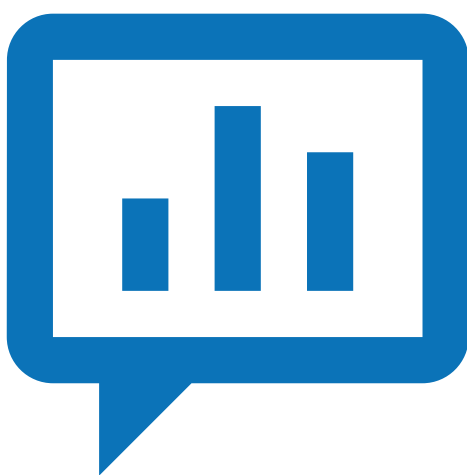

Deliver multi-day, multi-track events with specific learning objectives and small group conversations. Every breakout room or breakout session will have the same advanced features as the main event room.

Customized Registration Pages

Customize your registration landing pages with the help of our design and technical implementation teams. Brand the event experience from the start and ensure high registration numbers.

Audience Interaction

Humanize the event experience with interactive chatrooms, live polling, quizzes, surveys, questionnaires, breakout rooms, breakout sessions and more with our interactive features.

Detailed Data & Custom Reporting

Access attendee data in real-time, or have our team build out custom reports so that you can monitor and examine the analytics of your program.

White-Label Capabilities

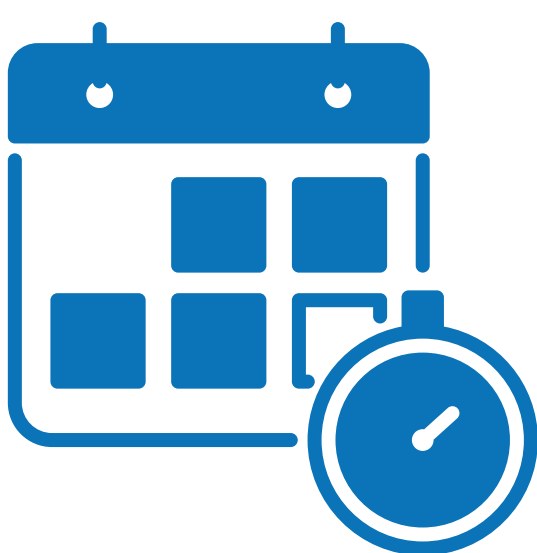

Because our platform is customizable to your organization's design & branding ideas, we will completely white-label our platform. We have several different tiers for white-label & incognito expectations.

API Integration

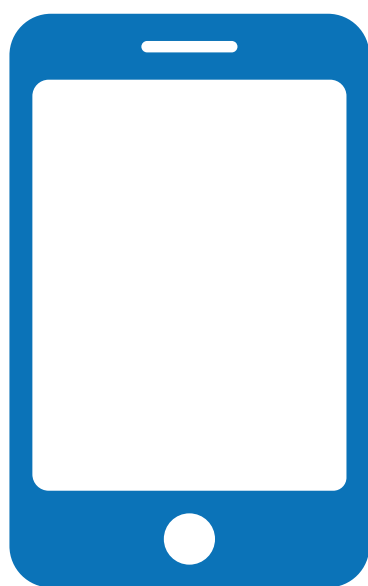

We operate seamlessly within your tech stack. We can build and integrate with APIs for registration pages, show-time execution, data & reporting, etc.

Personalized Event Agendas

We support the attendee experience when participating in multi-track, multi-day events by creating personalized agendas with the specific tracks they are registered for.

Mobile Friendly

Our platform works seamlessly on smartphones & tablets. Lower barriers for your attendees by allowing them to tune in from anywhere, with any device.

Advanced Platform Features

Roundtable Networking

Because our platform is customizable to your organization's design & branding ideas, we will completely white-label our platform. We have several different tiers for white-label & incognito expectations.

Sponsor & Exhibitor Branding

Guarantee ROI to your Sponsors & Exhibitors by including their branding & logos throughout the virtual experience.

Integrated eCommerce

Easily monetize your virtual content delivery with integrated eCommerce.

Automated CE, CPD & Certifications

Build Continuing Education, Professional Development & Certifications into any live or On-Demand event delivery. Automatically delivery certificates or CE credits

Browser-Based

Our platform operates completely in your browser. With no downloads, plug-ins or applications to install, your event program will be accessible to people all over the globe, on every device.

Live, Simu-Live & OnDemand Content

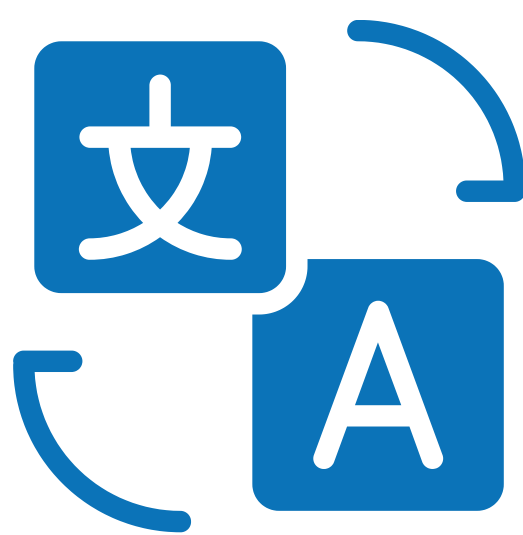

Deliver your program with Live, Simu-Live and On-Demand content. Integrate and transition between different types of multi-media (including video, images, audio, slidedecks) seamlessly.

24/7 Tech Support

We won't leave you hanging, we promise. Access our tech support via phone, email or chatroom directly on the BeaconLive platform before, during and after your live programs.

CART & Closed Captioning

We can add in CART language & translation to any live or On-Demand program to ensure your delivery is accessible to all audiences.
