Adwebtech PDF AutoSigner

Description:

PDF AutoSigner is used to create in-line digital signatures on PDF documents. Installation is easy and user friendly.

Features:

- Digitally signed documents are valid in court-of-law. Why physically sign when digitally signed documents have same legal validity.
- Automatic Bulk Signing, no manual intervention needed once configured.
- Placement of the signature can be customized and stored for future use.
- Bulk Signing of multiple PDF Documents at one go.
- Signing using a digital certificate on USB Token of any brand and Hardware Security Module (HSM)
- Position the signature at any location of your choice on the configured page.
- Support for multiple signatures and profiles.
- Creates a seperate folder with signed documents ready to email.

Automated Signing Solution

In many business environments a very convenient way of processing files of data is to use a watched folder approach. In such a scenario on application places output files in a given folder and another then picks these up and processes them. The PDF AutoSigner from Adwebtech, is a flexible Windows application that implements such a watched folder strategy. PDF AutoSigner has been designed to provide intelligent watched folder automatic monitoring of one or more Windows folders to process batches of documents in an unattended environment. It does this by monitoring a set of input locations for documents. Any document found in a defined input location is selected for processing using the operator defined Signing profile. The main use of PDF AutoSigner from Adwebtech, is for bulk signing of documents, particularly PDF invoices and other documents. PDF AutoSigner creates digital signatures based on the signing profile. This pre-defined profile determines the type of signature to be produced. The signed documents are stored to an output folder, or if a problem is detected, an issues folder. PDF Auto Signer provides one of the simplest ways to utilize the power of the Digitally Signing within various organizations and can be easily inserted into a workflow system without any system integration or development expense.
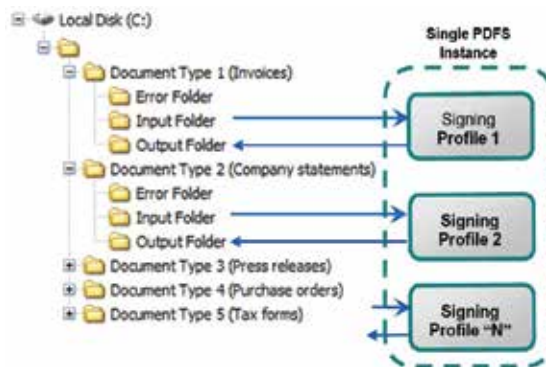

Key Features

What is PDF Auto Signer from Adwebtech?

PDF AutoSigner from Adwebtech is a flexible Windows Application. It provides intelligent watched folder automatic monitoring or automated digital signing solution of one or more Windows folders to process batches of document in an unattended environment.

PDF AutoSigner represents one of the simplest ways to utilize the power of Digital Signing within organizations as it requires no programming. You could be up and running in having your important corporate documents, such as e-invoices, signed in minutes by using this powerful yet simple application.

- **PDF Auto Signer supports multiple watched folders:**
  Multiple watched folders profiles can be managed, each defines a set of input, output and error folders and the signing policy to be used.

- **Supports most crypto Tokens/HSM**
  Supports most crypto Tokens using pkcs11 interface.

- **Multiple Signatories:**
  Supports attaching multiple signatures to a single document in a complete automated configuration.

- **Low cost implementation:**
  Does not require any professional services to implement the solution.

Multiple Watched Folder Profiles

It is possible to set-up multiple watched folder profiles each with its own set of input, output and error folders as illustrated below. Each watched folder profile can be associated with its own Signing Profile:

The diagram illustrates multiple signing profiles processing various document types located in different input folders. The documents are then signed using unique signing profiles and the resultant file deposited in the appropriate output folder.
