Why Do Clients Love Vervotech ALWAYS?

Empowered By Innovation, We Care About Our Client And Partner Needs

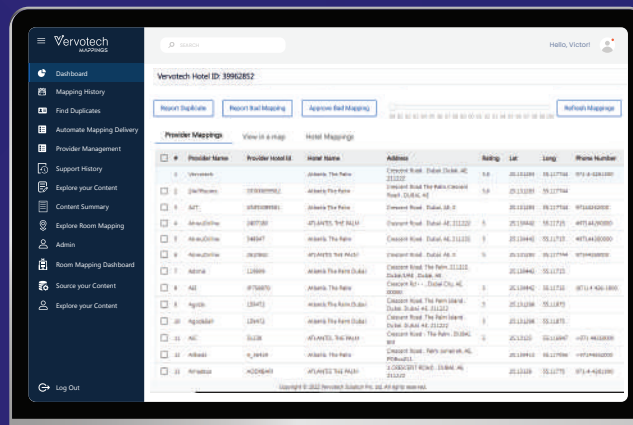

Best in Mapping Percentage & Accuracy

Our powerful AI platform maps hotel and room content with the **highest accuracy of 99.99%** with an extensive hotel coverage of 98%

Content Partnership

We have exclusive partnerships with leading hotel **media content providers like IcePortal** to distribute complimentary hotel image content to our clients.

Standardized Hotel & Room Data

We automate and streamline accommodation content data to simplify your solution offerings and **expand your digital footprint** across global markets.

Seamless API Integration

Integrate your platform with Vervotech Mapping API seamlessly for quicker hotel content access and **quicker go-to-market time**. We support both CSVs as well as API-based integrations.

The screenshot displays the Vervotech dashboard with the following sections:

- Navigation Menu:** Dashboard, Mapping History, Find Duplicates, Automate Mapping Delivery, Provider Management, Support History, Explore your Content, Content Summary, Explore Room Mapping, Admin, Room Mapping Dashboard, Source your Content, Explore your Content.
- Header:** Vervotech logo, Search bar, Hello, Victor, and a profile icon.
- Mapping Data Consumption:** A line chart showing data usage over time. Text overlay: "Cost Saved \$ 15,000".
- Provider Hotels:** A bar chart showing data for various providers.
- Mapping Accuracy Achieved:** Three circular progress indicators for Provider 1 (97%), Provider 2 (95%), and Provider 3 (99%).
- Most Downloaded Content:** A list of content items with download counts:

Content Item	Count
Hotel 01	1234
Hotel 02	1234
Hotel 03	1234
Hotel 04	1234
- Review Bad Mappings:** A list of bad mappings with associated counts:

Mapping ID	Count
Hotels 01/November/1245/0	1234
Hotels 02/November/11235/0	1234
Hotels 03/November/1298/0	1234
Hotels 04/November/1347/0	1234
Hotels 05/November/1333/0	1234
Hotels 06/November/2134/0	1234

Intuitive Dashboard

The screenshot displays the Vervotech Support Dashboard. On the left is a dark blue sidebar with a menu containing icons and labels for: Dashboard, Mapping History, Find Duplicates, Automate Mapping Delivery, Provider Management, Support History, Explore your Content, Content Summary, Explore Room Mapping, Admin, Room Mapping Dashboard, Source your Content, and Explore your Content. At the bottom of the sidebar is a 'Log Out' button. The main content area has a white background with a search bar at the top left and a user profile 'Hello, Victor' at the top right. Below the search bar are four white cards with rounded corners. The first card, 'Number of Clients', shows an orange line graph with an upward curve. The second card, 'Number of Tickets', shows a teal line graph with a downward curve. The third card shows a circular gauge with an orange border and the number '98' in the center, with the text 'Customer satisfaction score for ticket resolution' below it. The fourth card shows a circular gauge with an orange border and the number '100' in the center, with the text 'Number of Calls Attended' below it. To the right of this is another card showing a circular gauge with an orange border and the number '99' in the center, with the text 'Number of Tickets Addressed' below it. At the very bottom of the dashboard is a small copyright notice: 'Copyright © 2020 Vervotech Inc. All rights reserved.'.

24/7 Support

Get priority assistance from a dedicated **Vervotech representative available 24/7** to help with seamless integration and address all your queries with speed and efficiency.

Hotel Mapping

Vervotech Hotel Mapping leverages AI and ML to showcase unique hotel properties. Our source agnostic tool removes duplicate hotel inventory across multiple suppliers and maps content with 99.99% accuracy.

Product Features

- Powered by AI and ML
- Proven hotel content accuracy & comprehensive hotel coverage
- Intuitive self-service portal
- API-based incremental & real-time updates
- Insights into hotel content quality
- Unmatched customer success experience
- Post booking mapping services
- Map your own contracted hotels

Room Mapping

Vervotech Room Mapping intelligently analyzes, identifies and sorts multiple rooms sent by different suppliers via multiple parameters such as room type, view, description, amenities, image, star-rating, policy, and 15+ more attributes, so the same room does not get listed on your platform twice.

Product Features

- Multilingual room mapping (New)
- Real-time API integration
- Proven room accuracy & room coverage
- Room & rate level mapping
- Consolidates unstructured supplier data
- Powered by AI and Natural Language Processing (NLP)
- Standardized room content
- 0.5 Second API response time
- In-room attributes information
- 20K Master room content available

Hotel Master Content

Vervotech Hotel Master Content powered by AI identifies, segregates, manages, deduplicates, and distributes both illustrative and descriptive content from multiple suppliers, delivering opinionated content.

Product Features

Curated Content

- Exclusive media content
- Up-to-date data of hotel brands & hotel chains
- Accurate star ratings, property types & geo coordinates
- 35,000 Premium HD images powered by IcePortal
- 3M+ Master hotel content
- 10+ Multilingual suppliers

Multilingual Content

- Ready to use multilingual content from different suppliers
- Unlimited language support
- Quicker go to market with regional connections

Eversince we started using mapping solutions from Vervotech, our day-to-day mapping operations have become simple and much more effective. They are able to provide us the most updated mapping data for all the hotel suppliers that we work with, and they are also very quick to respond to any inquiries.
