

Avnio™ RFX

Automate your RFX responses and create a unified knowledge library

What's wrong with the RFP Process today?

Answering RFXs manually often takes upwards of 60 hours to complete; it's a slow, tedious task that often requires input from 7 or more people that all have their own day jobs to do as well. RFPs often ask the same questions time after time, but finding the answers can be difficult, or just time consuming, and has a large chance of inconsistent answers across multiple RFP responses.

Avnio RFX: Accurate, intelligent answers to complex RFPs in seconds.

Effortlessly manage multiple RFP projects at once, directly in your Salesforce system with the only Salesforce native RFP response solution on the market. Using intelligent machine learning and natural language processing, digest old RFP responses to create an answer library that learns the more that you use it.

Win more of the right business, faster.

Intelligent Automation to ease your pains

Import any format document and answer it automatically with the click of a button; speed up your responses and ultimately, increase your revenue.

Keep your knowledge in one location

Ingest old RFP responses to centralise your company knowledge and use it to answer questions more accurately, faster; using machine learning, Avnio RFX gets smarter the longer you use it.

Speak your customer's language

Translate documents from over 70+ supported languages into your native tongue, answer questions, and translate it back into the source language and document with a few simple clicks.

A workflow that suits your needs

Customise your workspace to exactly how you'd like it to be, with automation embedded at any or all steps of the way; automatically assign tasks to users, push all edited answers to the central knowledge library, and much more.

Avnio really helped us to streamline the process and workflow to answer RFIs, RFPs, and Security Questionnaires. Using Avnio improved the overall time of answering these documents more than 75%...

Worldwide Sales Engineering Lead | IT security industry

Avnio RFX is the only Salesforce native RFP response solution.

We have personal experience with the RFP process and we designed this solution with our past selves in mind. We're working with our clients to create the best automated RFX response around.

Key Features

Automated RFX Responses

Import any format document and answer it automatically with the click of a button; speed up your responses and ultimately, increase your revenue with our intelligent software.

Centralised Knowledge Library

Have a single source of information in your company, reduce the numbers of errors that occur in answering RFPs, and never lose the answer to a question again.

Avnio Translation

Translate documents into 70+ supported languages, never lose a proposal due to language differences.

Go / No Go Qualifiers

Set up sophisticated Go / No Go qualifiers so that you know as soon as an RFP comes in whether you should be putting in the time and effort to complete it.

Natural Language Processing

Avnio RFX understands the connection between "comms" and "communication", because it knows how we actually communicate and learns every time a new document comes through the software.

About Avnio

Avnio RFX is the only 100% Salesforce-native Request for Proposal automated solution, helping organisations win more of the right business by answering complex RFPs in seconds and turning your company knowledge into your most valuable asset.
