YES WE H/CK

PAY A REWARD
NOT A RANSOM

Global Bug Bounty & VDP Platform

#IoT #Hardware #Web #Mobile #Blockchain

Bug Bounty, the new standard for cybersecurity

Leverage a community of cybersecurity experts to report vulnerabilities on your exposed scopes.

Reward our hunters for the reported vulnerabilities, according to YOUR criteria.

Make cybersecurity an accelerator of your digital transformation.

Our strengths

/ Speed

Reduce time to vulnerabilities detection and remediation.

/ Agility

Accelerate your projects without waiting for the results of the next audit.

/ Continuity

Maximize your security level over time and reduce your attack surface.

/ Trust

Show your customers your commitment to security.

/ ROI

Control budget, duration, scope and depth of your tests.

/ Training

Empower your security by connecting them with world-class experts.

How it works?

1. Set up your program

/ Scope: web or mobile application, infrastructure, connected object, etc.

/ Authorized tests and specific business requirements.

/ Vulnerabilities category and severity.

/ Hunter reward grid.

2. Submit your program to our hunters

/ Private program: a team of invited hunters - chosen by you, with our help.

/ Public program: the entire YesWeHack community.

3. Collect vulnerabilities

/ Qualify reports.

/ Validate vulnerabilities.

/ Reward the hunters.

4. Fix & Verify

/ Patch the vulnerabilities.

/ Request the hunters to check whether the remediation is effective.

Why choose YESWEHACK?

Trusted community of researchers.

Compliance with highest security standards.

Agile platform to run your programs.

Personalized support and automation tools.
