

# Simplify creation of end-user IoT applications with IoT Glue™

Secure design

Outstanding  
user-experience

Single platform  
advantage

- 1 IoT Glue™ allows enterprises to monetize IoT investments by seamlessly gluing disparate things together.
- 2 It is an API-driven robust technology framework with scalable, vertical-specific solutions.
- 3 IoT Glue™ helps build your IoT ecosystem faster. It enables you to quickly & securely offer additional IoT offerings.

SaaS

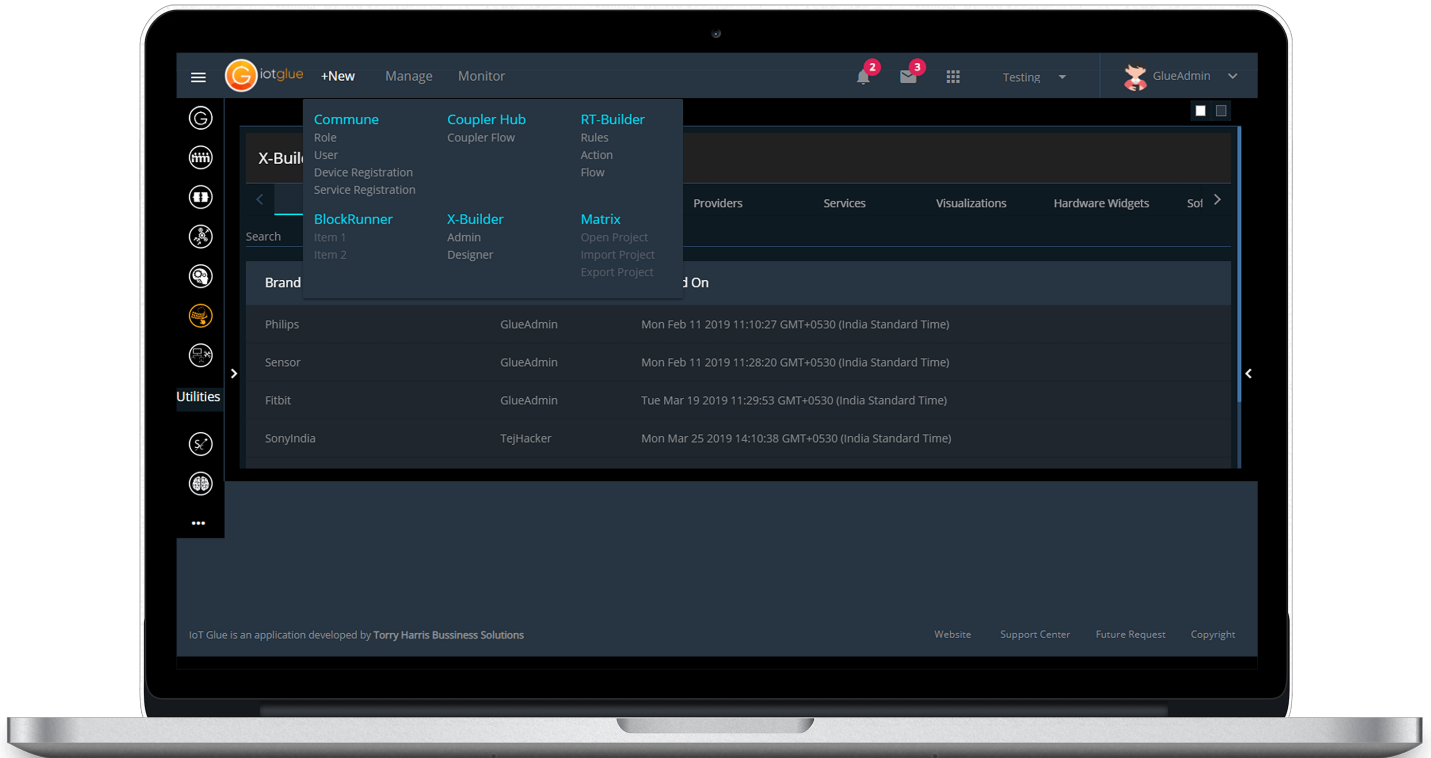

On-premise

Hybrid

# Features

## Commune

- Commune is an administration module for user, device and service management
- It has built-in identity and access management controls for different users, devices and web-services/APIs
- It offers enhanced security with role-based authentication and authorization
- Commune is a unified interface to manage and administer device APIs and third party services/REST APIs
- With Commune, create device & service templates for data validation

## Real-Time Builder

- RT Builder deals with configuring rules and actions for real-time data streaming
- Processing is powered by a custom Distributed Stream Computing Engine (DSCE) with a Complex Event Processor (CEP) as the core
- It allows creating complex business rules with a simple drag-and-drop interface
- Pre-defined or customized templates for Rules and Actions to enable reusability and flexibility

## Coupler

- Coupler unifies multiple protocols to drive interoperability
- This is an Integration hub between different modules of IoTGlue™ and external systems
- It enhances your interoperability in the IoT landscape
- It has the flexibility to create data flows based on use cases for devices/services/analytics

## X-Builder

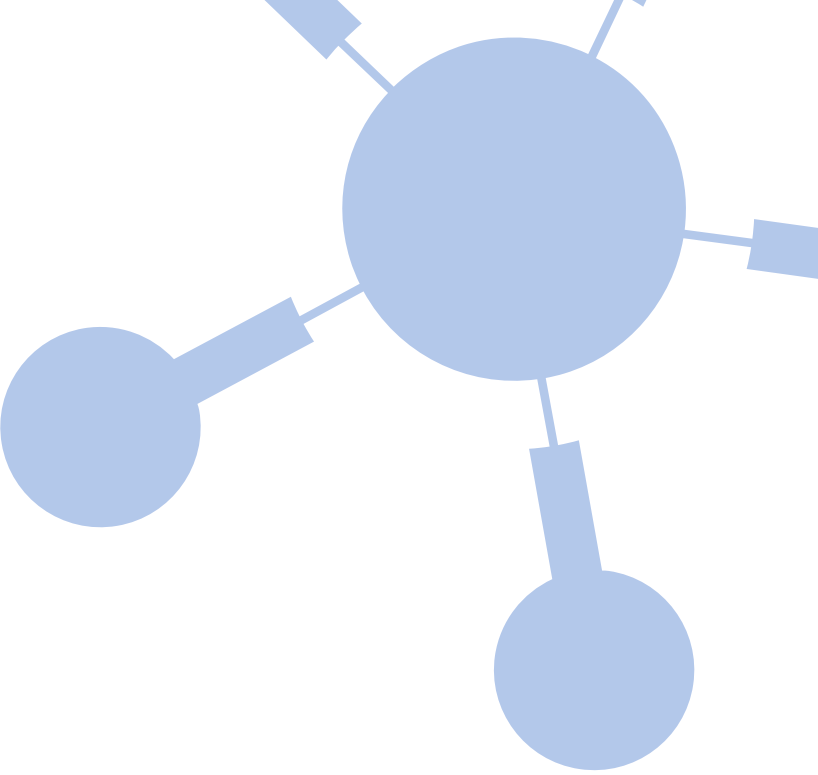

- X-Builder is an interactive end-user app configuration tool with 3 components -
  - Admin Module: to configure UI Components, APIs and Data Flows
  - X-Builder Design Module: a drag-n-drop interface to develop end-user app screens and dashboards
  - X-Builder Client SDKs: create web or mobile apps for controlling and managing added devices

## Block Runner

- Block Runner is the analytical module of IoTGlue™
- With machine learning, it enables behavior analysis, anomaly detection and predictive analytics
- It automates workflow designs with extended plug-ins

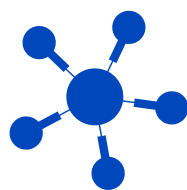

## Matrix

- Matrix is a platform management component of IoTGlue™
- It manages and controls operations and configurations of other modules
- You can manage multiple projects through a single interface

# ABOUT TORRY HARRIS INTEGRATION SOLUTIONS

Torry Harris Integration Solutions (THIS) enables digital ecosystems through adoption and use of API driven digital opportunities. We bring 20 years of focused integration experience with impeccable, long standing references in enabling digital transformation for enterprises. We are headquartered in New Jersey, USA with offices in UK, Ireland, France, Germany, UAE and India.
