

# Case Management Software

*MyCM enables coordination across your team to manage all your issues clearly.*

**ComplianceLine software and services give compliance teams clarity to know how they can do the most good. Find out what to address and how keep your team safe.**

## THE CHALLENGE

Regulations, company size, and a culture of accountability are growing faster than compliance department budgets. So to properly get the job done, compliance teams need the right tools. MyCM improves your ability to process and keep track of the growing work required. With a better handle on the work, you can focus appropriate resources on the issues and areas of highest potential impact.

## THE SOLUTION

The MyCM compliance issue management system is highly configurable to fit with your existing compliance processes. It handles customization requirements (notifications, deadlines, team roles) and gives you both real time and summary reports so you can do the right work, and do it right.

## WHAT YOU GET

A single platform to record, track, report, and manage all your issues, all your reporting parties, and all your users and reports. MyCM's powerful platform intuitively guides you and your team through from initial report and automated assignment to the right coordinator, through investigation, review, and resolution. Pre-loaded reports and extensive and simple reporting and benchmarks keep your eyes on key areas to monitor and improve.

### CLARITY

*A single repository for all issues.* Whether notified via hotline, online, in-office, or email, all your issues are managed in one place so you can view, work, and follow up with clarity.

### SERVICE EXCELLENCE

*Configured to serve your team.* Specialized investigation fields, tailored deadlines, flexible document upload, and admin-friendly issue reviews. Your team's workflows are easier on MyCM.

### PEACE OF MIND

*Built-in best practices.* Maximize your ROI with pre-loaded customizable reports combined with focused training and unwavering user support to set up, benchmark and improve your compliance.
