

DATABASICS TIME

SHARED TIME CLOCK

Enterprise-class hardware. Native DATABASICS integration.

Shared time clock for onsite workforce management designed for high-traffic workplaces where employees need to clock in and out quickly, reliably, and securely. This rugged tablet is ideal for manufacturing plants, construction sites, research labs, healthcare facilities, and field operations. Get greater visibility and control with DCAA-compliant time capture, multiple ways to clock in on specific projects, integrated leave management, mobile clock in/out, and secure on-site access, acting as an extension of your existing DATABASICS Time & Expense solution

Better Usability

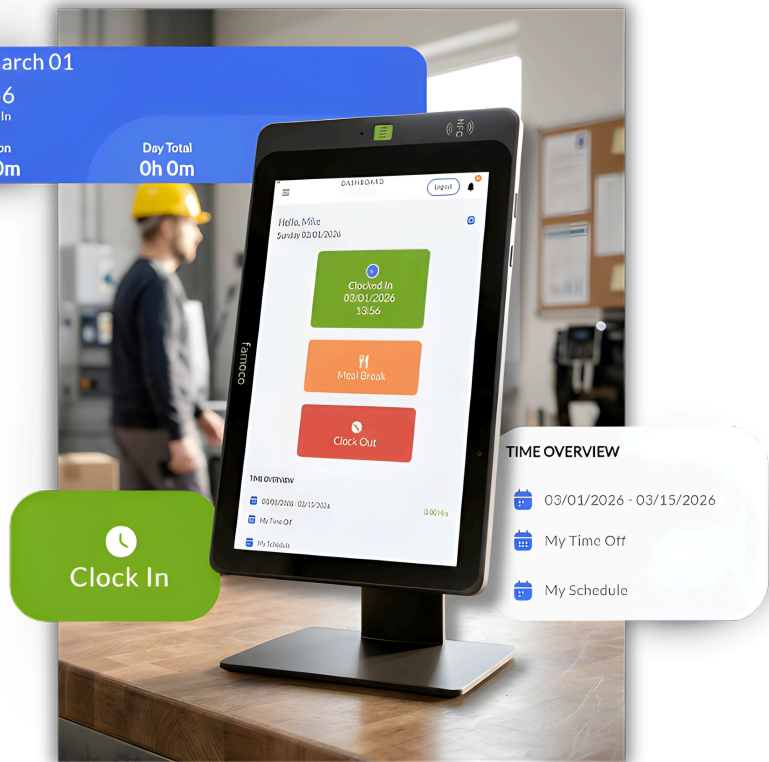

Arrives pre-configured. Plug in, connect, and go.

Better Compliance

DCAA-compliant time capture with daily facial confirmation audit reporting.

Better Visibility

Real-time sync with DATABASICS Time, plus timesheet and leave access directly on the device.

Better Security

Photo captured at every login, role-based security, and encrypted data handling.

Better Integration

Native DATABASICS Time & Expense sync plus ERP, payroll, HRIS, and REST API connectivity.

HOW IT WORKS

Arrives Ready

Connect instantly via Wi-Fi or built-in 4G LTE.

Employees Clock In

Individual login with automatic photo capture.

Real-Time Sync

Entries flow automatically to DATABASICS timesheets.

Daily Audit

Admin receives facial confirmation report.

HARDWARE SPECS

10.1" Screen

Optimal comfort & high display visibility

6600mAh

hot-swappable battery

Wi-Fi 6E + 4G LTE

Fast-connectivity to maximize performance

IP65

dust & water resistance under tough conditions

13MP rear camera 8MP front camera

for login

Android 12 Famoco secure OS

NFC

contactless ready

Wall-mount or countertop

ready

FEATURES

Facial confirmation at every login

A photo is captured at every clock-in without bypass options. Daily audit reports flag any photos that do not match the enrolled employee record. Clock-ins are never blocked; accountability is added after the fact.

IP65 certified rugged build

Rated for dust, water splashes, shocks, and drops. Built for construction sites, warehouses, labs, and any environment where consumer-grade hardware does not hold up.

Full remote device management

DATABASICS maintains complete control. Enable remote reboot, lock, unlock, push notifications, and centralized configuration. Admins can access device controls directly through a dedicated portal.

Native DATABASICS integration

Works directly with your existing DATABASICS timesheets account. Time entries, timesheet access, and leave/vacation tracking are all available right from the device.

Delivery & Pricing

Provided as a SaaS subscription priced per user with simple, straightforward pricing. Devices arrive pre-configured, so rollout does not turn into an IT project.

System Integration

Connects with Payroll, HR, Finance, Accounting, ERP, HRIS, and CRM systems. Includes comprehensive REST API for custom data flows.

DATABASICS

DATABASICS delivers time and leave tracking, expense reporting, and employee purchasing management solutions that lead the industry in value, performance, and adaptability. Integrations are offered for major accounting, payroll, and HR providers. DATABASICS's customers range from regional businesses and nonprofits to global enterprises.
