SAFETY SOFTWARE SHOULD MAKE THE JOB EASIER

Most safety teams do not need more disconnected tools. They need one reliable place to manage the work, the people, the evidence, and the follow-up. Too often, safety programs are spread across:

PAPER FORMS & BINDERS	SPREADSHEETS	EMAIL THREADS	SEPARATE TRAINING TRACKERS
EQUIPMENT FILES	INVESTIGATION DOCUMENTS	SHARED DRIVES	LAST-MINUTE AUDIT FOLDERS

That makes the program harder to manage, harder to verify, and harder to defend when the audit, client, regulator, or insurance file needs evidence.

TRUSTAR CONNECT BRINGS IT ALL TOGETHER

One platform to run the day-to-day safety program and build audit-ready records as the work happens.

One platform.
Safer workplaces.
Stronger teams.

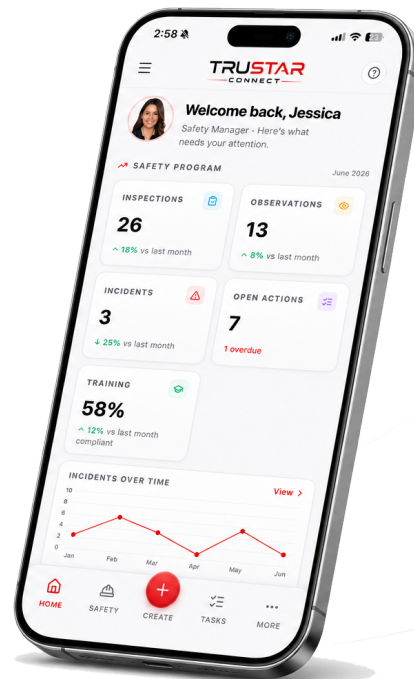

SAFETY

TASKS

INSIGHTS

► FOR CREWS

Complete inspections, permits, hazard reports, observations, toolbox talks, daily reports, sign-offs, and incident reports from the field.

► FOR SAFETY LEADERS

Manage training, documents, corrective actions, investigations, equipment, readiness, and reports from one dashboard.

► MORE THAN DIGITAL FORMS

TruStar Connect is not just a checklist app. It is a complete safety and operations platform built to connect field activity, safety records, corrective actions, training, equipment, documentation, and audit readiness.

EVERYTHING YOU NEED. ALL IN ONE PLACE.

Every TruStar Connect plan includes the full platform. No feature gates. No surprise add-ons for core tools. No separate investigation software required.

/01 INSPECTIONS & FORMS

Build forms manually, scan existing paper forms, or generate forms with AI. Crews complete inspections and forms in the field, with results available immediately.

- ✓ Custom form builder
- ✓ AI-generated forms
- ✓ Paper form scanning
- ✓ Photos, signatures, timestamps, and GPS/location data
- ✓ Offline completion

/02 HAZARD REPORTING

Make it easy for workers, supervisors, subcontractors, and visitors to report hazards quickly. Public QR hazard reports can be submitted without logging in.

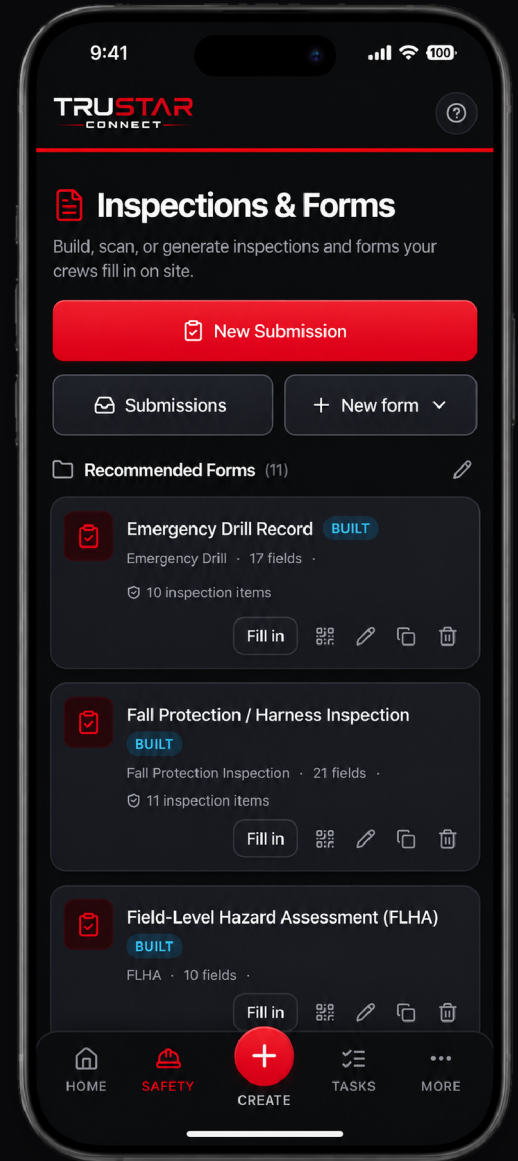

- ✓ QR-based hazard reporting
- ✓ Photo capture
- ✓ Location details
- ✓ Risk assessment
- ✓ Corrective action assignment

/03 PERMITS TO WORK

Manage high-risk work with structured permit workflows for hot work, confined space, working at heights, lockout/tagout, and other site-specific permit needs.

/04 OBSERVATIONS & NEAR MISSES

Capture positive observations, good catches, unsafe conditions, and near misses before they become incidents. Build a stronger reporting culture with simple field-first workflows.

BUILD, SCAN, OR GENERATE THE FORMS YOUR
CREWS FILL IN ON SITE

KNOW WHO IS READY. KNOW WHAT IS SAFE.

TruStar Connect helps companies manage the people, assets, and documents behind every safe job.

TRAINING & CERTIFICATES

Track certifications, expiries, approvals, and required training by role, site, project, or task.

Identify training gaps before work starts.

- ✓ Training matrix
- ✓ Expiry tracking
- ✓ Certificate uploads
- ✓ Approval workflows
- ✓ Required training by role
- ✓ Project-specific training
- ✓ Crew readiness view

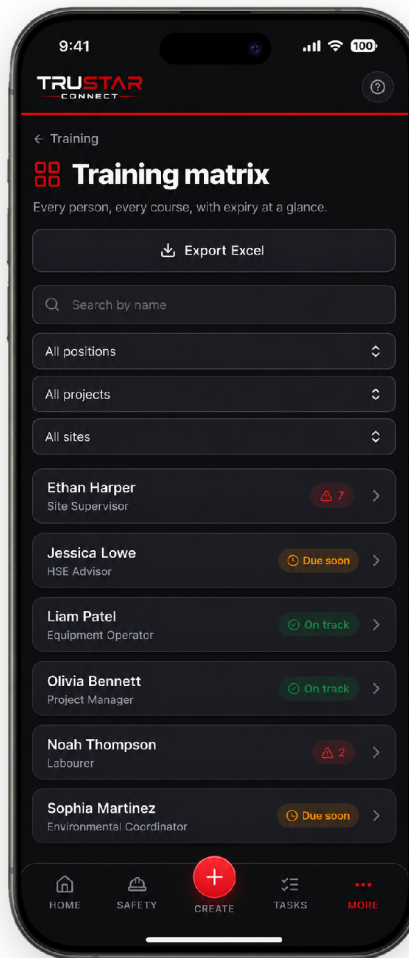

► TRUSTAR ONE CARD

Each worker gets a digital training card with a scan-to-verify QR code. Print it as a wallet card or keep it on a phone. Supervisors, clients, and site leaders can verify training status in seconds.

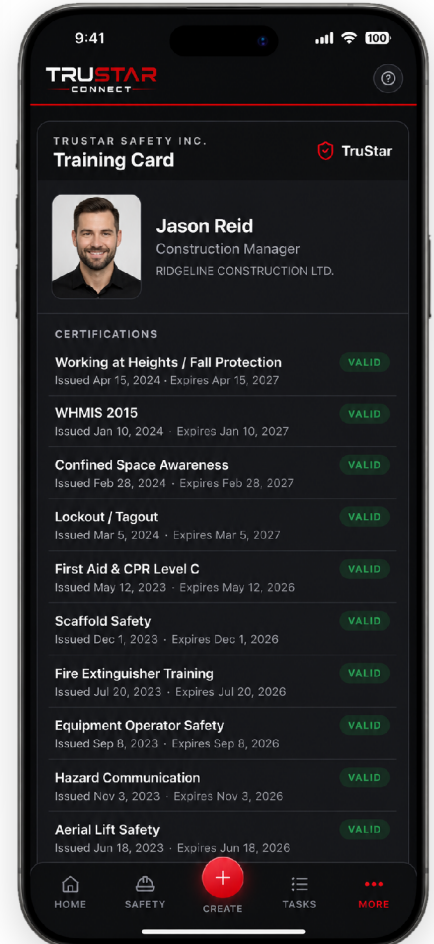

EQUIPMENT & MAINTENANCE

Manage vehicles, tools, heavy equipment, inspections, service records, deficiencies, meter readings, photos, documents, and renewals.

- ✓ Equipment status
- ✓ Inspection history
- ✓ Open deficiencies
- ✓ Maintenance requirements
- ✓ Service due dates
- ✓ Assigned operators or managers
- ✓ Equipment documents and photos

EVERY PERSON, EVERY COURSE, EXPIRY
AT A GLANCE

TRUSTAR ONE CARD: SCAN-TO-VERIFY
TRAINING

DOCUMENTS & POLICIES

Keep critical safety documents organized, controlled, and available from any device. Everything lives in one controlled library, so crews always work from the current version.

POLICIES

PROCEDURES

SAFE WORK PRACTICES

JHAS / JSAS

SDS

FORMS

CLIENT REQUIREMENTS

AUDIT EVIDENCE

► SDS LIBRARY WITH AI SEARCH

Find Safety Data Sheets quickly and keep them organized by manufacturer. Workers can search the information they need without digging through binders or shared folders.

BUILT FOR FIELD ADOPTION

Safety software only works if the field actually uses it. TruStar Connect is browser-based, mobile-friendly, and built for real jobsite conditions.

WORKS ON ANY PHONE BROWSER

No app store download required. Crews can open TruStar Connect from a phone, tablet, or computer browser and complete the work from the field. A native app is planned, but the platform is already designed for browser-based field access.

OFFLINE ACROSS ALL WORKFLOWS

Crews can keep working when there is no signal. Forms, inspections, permits, hazards, incidents, documents, training records, corrective actions, and other workflows can be completed offline and synced when the device reconnects.

QR-BASED FIELD ACCESS

Use QR codes to give people quick access to the right workflow in the right place.

HAZARD REPORTING SIGNS

EQUIPMENT INSPECTIONS

SITE-SPECIFIC FORMS

PERMIT ACCESS POINTS

TRAINING VERIFICATION

PUBLIC REPORTING

DOCUMENT ACCESS

STRONGER FIELD EVIDENCE

TruStar Connect helps create a stronger record with:

GPS/LOCATION DATA

TIMESTAMPS

PHOTOS

DIGITAL SIGNATURES

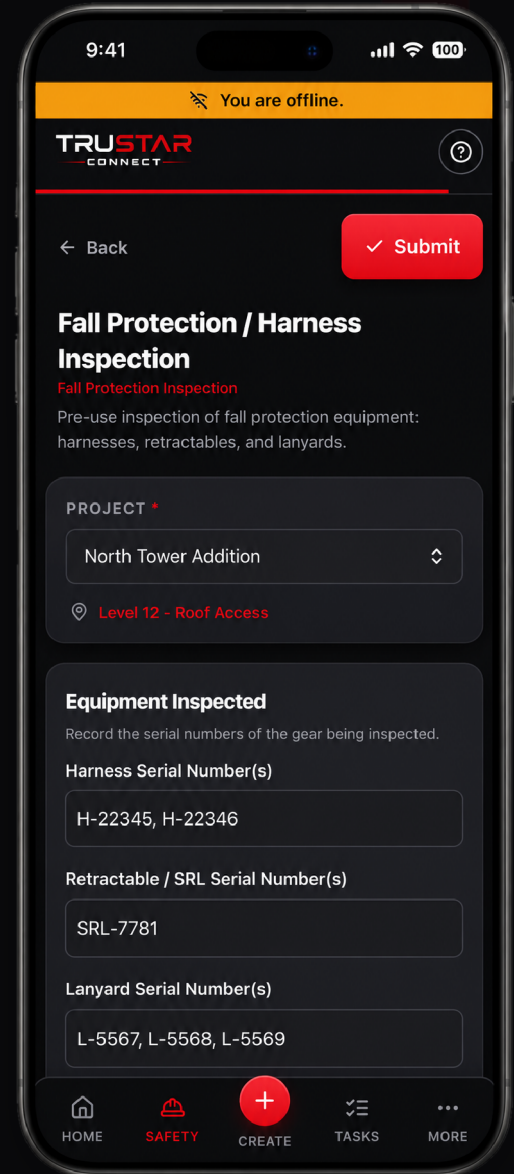

USER HISTORY

LINKED CORRECTIVE ACTIONS

COMPLETION RECORDS

► TODAY'S PAPERWORK

Every form, inspection, permit, toolbox talk, observation, incident, and action can be grouped by day and project. Your field activity becomes a structured safety record without extra administrative work.

CREWS KEEP WORKING OFFLINE AND SYNC WHEN COVERAGE RETURNS

INVESTIGATIONS THAT FIND THE REAL CAUSE

Too many investigations stop at the easiest answer:

"Worker error."

"Not paying attention."

"Needs retraining."

Those conclusions rarely fix the system. TruStar Connect includes structured incident investigations with AI-assisted root cause analysis to help teams go deeper, reduce bias, and build stronger corrective actions.

THE TRUSTAR METHOD: THE FIVE STARS

A modern incident investigation framework built to address what experienced safety practitioners have long complained about in older root cause tools. It runs on every TruStar Connect investigation by default.

STAR 1 PEOPLE

Why a reasonable, competent person did what made sense to them in the moment. The start of the analysis, not the end.

STAR 2 CONDITIONS

The physical and environmental reality: equipment, layout, weather, lighting, and ergonomics.

STAR 3 SYSTEMS

The procedures, training, JSAs, and permits meant to guide the work, and the gap between the documents and the actual work.

STAR 4 LEADERSHIP

The organizational signals about what really matters: schedule pressure, resourcing, and expectations.

STAR 5 DEFENSES

The barriers that should have caught it before it became an incident.

Every analysis considers all five Stars, not just the people involved.

AI BIAS AUDIT BUILT IN

Every investigation can be reviewed for signs of:

- ✓ Blame-first thinking
- ✓ Unsupported assumptions
- ✓ Missing evidence
- ✓ Weak corrective actions
- ✓ Overreliance on retraining
- ✓ Missed system-level causes

CHOOSE THE FRAMEWORK THAT FITS

TruStar Connect supports multiple investigation frameworks. No proprietary lock-in. Use the method that fits the incident, client requirement, or company standard.

TRUSTAR METHOD

SCAT

ICAM

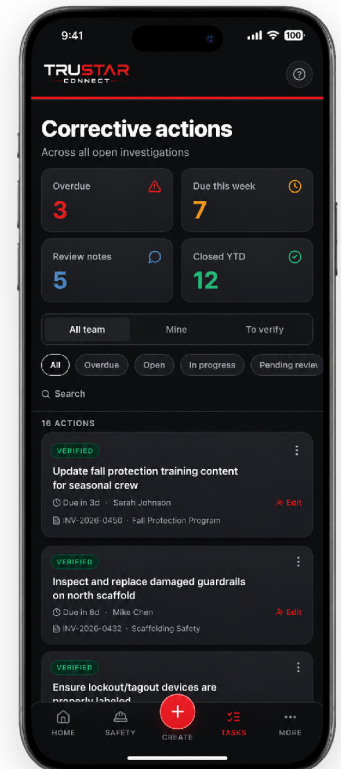

HFACS

5 WHYS

BOWTIE

► FROM CAUSE TO CORRECTIVE ACTION

Corrective actions flow directly into tracking, ownership, due dates, verification, and effectiveness reviews. **Find the cause. Assign the fix. Prove it worked.**

CORRECTIVE ACTIONS IN ONE TRACKED QUEUE

BUILT FOR CANADIAN SAFETY PROGRAMS

TruStar Connect was built around the safety program expectations Canadian companies are measured against. The readiness module is informed by the Alberta ACSA COR framework and designed to support practical safety program readiness across Canadian jurisdictions.

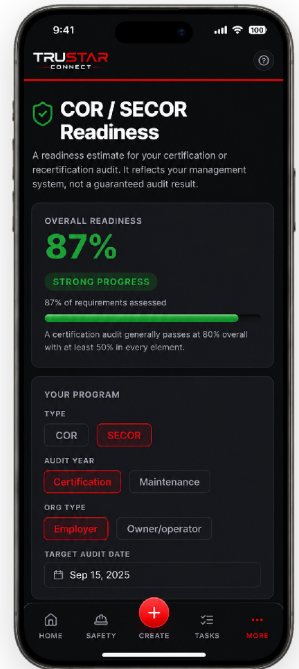

► WALK INTO THE AUDIT KNOWING WHERE YOU STAND

- ✓ Track progress by audit element
- ✓ Score readiness against the standard
- ✓ Store certificate type, number, and expiry
- ✓ Monitor renewal countdowns
- ✓ Identify missing records
- ✓ Link evidence to the work that created it
- ✓ Keep sign-offs, training, inspections, and corrective actions organized

► YOUR AUDIT TRAIL BUILDS AS WORK HAPPENS

Every inspection, permit, hazard report, observation, toolbox talk, document sign-off, training record, corrective action, daily report, and incident investigation becomes part of your safety record.

**Less scrambling. Better visibility.
Stronger audit confidence.**

PUBLISHED CAD PRICING

PRICING SHOULD NOT BE A MYSTERY

Every TruStar Connect plan includes the full platform. You are choosing how many workers you cover, not which features you unlock.

PLAN	WORKERS	PRICE CAD / MONTH	BEST FOR
STARTER	Up to 10	\$175	Small crews getting COR ready
GROWTH	11 to 50	\$475	Growing teams across multiple sites
PRO	51 to 150	\$1,099	Established multi-crew operations
ENTERPRISE	150+	Custom	Larger companies with specific needs

► PRICING THAT MAKES SENSE

- ✓ Published CAD pricing
- ✓ No demo required to see the price
- ✓ Full platform on every plan
- ✓ Flat worker bands
- ✓ Deactivated users do not count toward your active user limit

► NO SURPRISE FEES

- ✓ No mandatory setup fees
- ✓ No storage or AI usage add-on fees
- ✓ Annual pricing available
- ✓ Optional onboarding support available for importing existing documents and workforce records
- ✓ Enterprise pricing is custom to company size and needs

HOW TRUSTAR CONNECT COMPARES

TruStar Connect is built for companies that want more than digital checklists. It is for Canadian teams that need field adoption, audit readiness, transparent pricing, connected records, and a full safety program in one place.

WHAT MATTERS	TRUSTAR CONNECT	SITEDOCS	SALUS	SAFETYCULTURE
Pricing transparency	Published CAD pricing	Quote/demo-led pricing	Quote/demo-led pricing	Published per-user pricing
Billing model	Flat worker bands	Confirm with vendor	Custom/quote-led	Per user
Full platform on every plan	Yes, no feature gates	Tier/package-based	Module/custom-based	Tiered plans/add-ons
Start without a sales call	14-day self-serve trial	Demo-led	Demo-led	Self-serve options available
Browser-based field access	Yes	Confirm with vendor	Confirm with vendor	App-first with web options
Public QR hazard reporting	Yes, no login required	Confirm with vendor	Confirm with vendor	Confirm with vendor
