

# Manage your data better with our AI-powered ETL platform

## Build a comprehensive data management strategy with Zoho DataPrep

### Seamless Integration

Connect and integrate data from multiple sources and send it to any destination.

### AI-Powered Automation

Build data pipelines with the new visual pipeline builder assisted by GenAI.

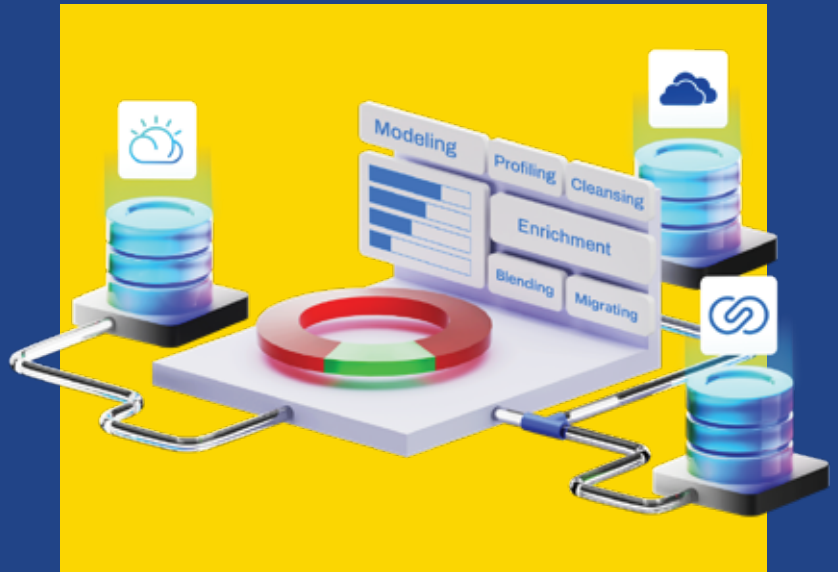

### Efficient Orchestration

Orchestrate pipelines to run at specified intervals or based on event triggers.

### Complete Access Control

Monitor, manage, and secure your data pipeline to ensure reliability and accountability at every step.

Seamlessly manage and automate your data movement from source to destination

## 100+ Data Connectors

Gather scattered data from multiple sources, like files, APIs, databases, applications, and services—all without having to involve your IT team.

## Visual Pipeline Builder

Create end-to-end data pipelines with our intuitive, no-code, drag-and-drop interface to envision your data flow and lineage effortlessly.

## Orchestrate your data flow

Schedule your end-to-end pipeline to run periodically and ensure ready-to-go data is always available. You can also execute your pipeline with external triggers.

## Ask Zia - AI Assistant for Data Preparation

Chat with Zia for your data preparation needs using your native language. Ask Zia, our Generative AI assistant, will perform the required data transforms instantly.

## 250+ Transforms

Clean, enrich, and reshape your data with our 250+ built-in transforms without the need for any coding using DataPrep Studio.

## Pipeline Template Library

Choose from our library of pipeline templates to build your data workflow pipeline in an instant.

## Monitor Data Movement

Our monitoring dashboard helps you keep track of all your data pipelines. Easily identify failed pipelines and take immediate action.

## Manage accountability

Every change made to the data is saved as a version history entry, which serves as a great audit trail. Get complete control over who can access what data.

## Value-driven Pricing

Our pricing plan is designed to serve businesses of all sizes and shapes. You can also optimize your data usage by setting your pipeline to fetch only fresh data.

## Focus on security

At Zoho DataPrep, we understand the importance of security and commit to its protection. By meeting stringent standards and leveraging a defense-in-depth

Zoho DataPrep has drastically reduced the time taken to clean and import our data from multiple hours down to a few minutes. I am able to provide my clients better tracking of their key statistics, as I now have an automated way to take in their third-party data.
