

EXTERNAL USER MANAGER

- Carefree guest management and compliance with regulations.
- Reduce manual tasks and security risks, and create clear processes for guests in **M365**.

Get it on
MS Teams

WHICH EDITION FITS YOUR NEEDS?

Start with **Standard**, upgrade to **Enterprise** for advanced compliance and scalability

KEY FEATURES	STANDARD EDITION	ENTERPRISE EDITION
Guest onboarding & approval Invite, approve, and onboard guests with a defined process	✓	✓
Guest management Centralized guest management to prevent chaos in M365	✓	✓
Compliance & consent Customizable guest onboarding with documents for approval and signature	✓	✓
Guest overview Speed up control processes and reviews with all guest information at a glance	✓	✓
Lifecycle automation Avoid wasting time with manual status queries, access reviews, or reminders	✓	✓
Organization management Manage entire external orgs and their guests or domains on your tenant centrally		✓
Conditional Policies (Beta) Automatic, context-specific governance configuration for guest requests		✓
Guest invitations with no assigned team Invite guests to the tenant without assigning them to specific teams		✓
Import unmanaged guests Automatically import and govern guest accounts created e.g. via file or link shares		✓
API/Webhook package Integration with third-party systems		✓
Security & auditing - Stay flexible by temporarily blocking and reactivating guests - Convenient DocuSign integration and export options for audit data		✓

WHAT TO CHOOSE?

Just manage guests securely in Teams without extra complexity: Go with Standard.

For full control over external organizations, conditional policies, auditing, DocuSign and custom processes: Choose Enterprise.
