

AI Radar Privacy

AI-Powered Data Privacy Solution

- Discover data containing personally identifiable information (PII) in repositories
- Use an AI-powered engine for accurate detection and classification of sensitive content
- Detect privacy or regulated information in various file types
- Enable data masking to ensure data governance and compliance
- Enhance AI-powered engine leveraging domain-specific knowledge

AI-R Privacy provides AI-powered PII detection and masking

AI-Powered Engine

Dynamic Data Masking

Extensive File Support

The exponential growth of unstructured data presents significant challenges for many organizations. One challenge is the escalating complexity associated with detecting sensitive information. While global data privacy regulations are being strengthened, the inadvertent exposure of personal information remains a persistent concern. Conventional regex-pattern rules have become increasingly unreliable, yielding numerous false-positive results, and the sheer complexity and scale of data render many existing solutions inadequate for safeguarding sensitive information.

Unlike existing PII protection solutions, Fasoo AI-R Privacy uses advanced AI capabilities to understand the contextual nuances of data across various file formats, including text and images. Fasoo AI-R Privacy effectively mitigates the risk of sensitive data breaches by accurately detecting and masking confidential information, thereby safeguarding organizations in all industries.

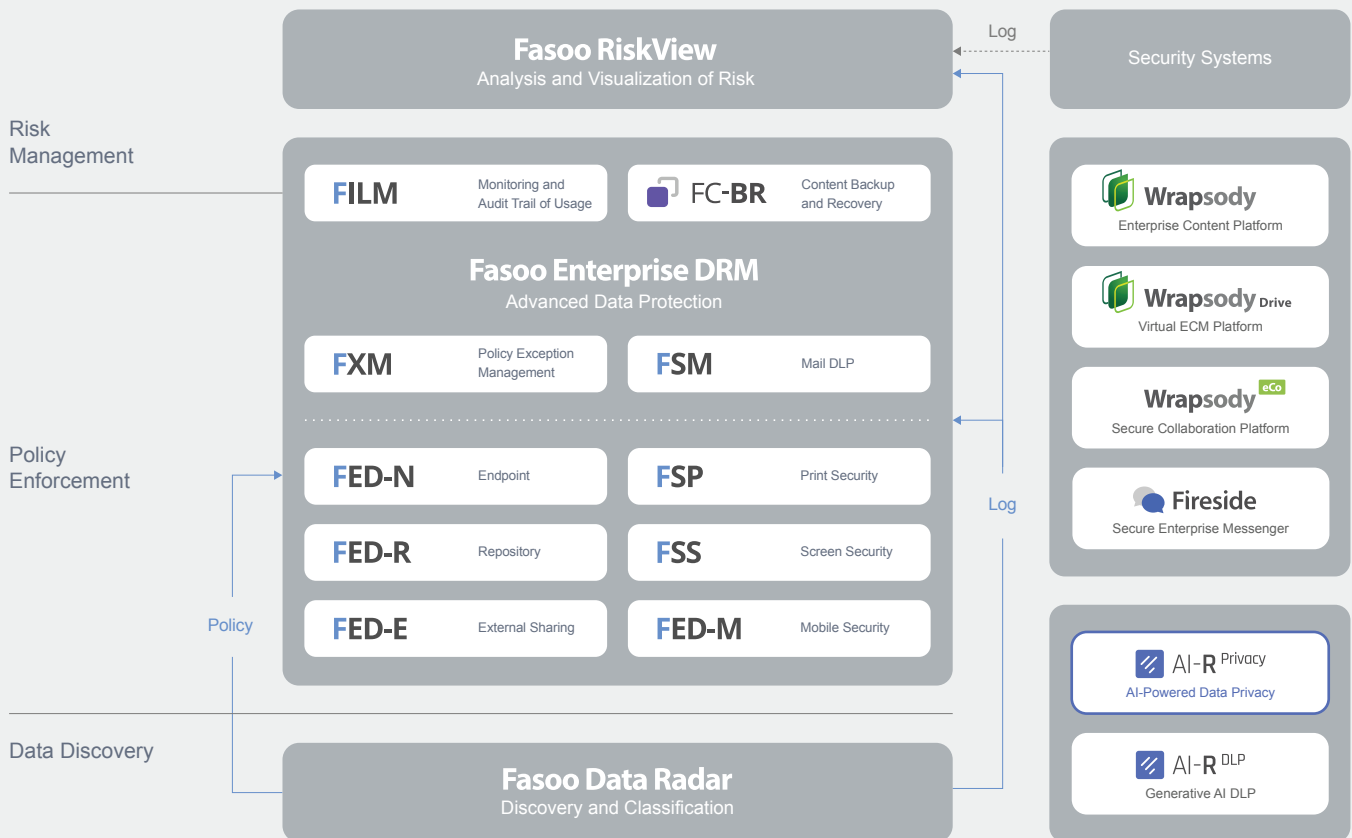

AI Radar Privacy

Fasoo AI-Radar Privacy is an AI-powered data privacy solution that detects, masks and protects PII in unstructured data.

Using OCR technology, Fasoo AI-R Privacy extracts text from image files and automatically applies data masking when detecting PII. Administrators have access to comprehensive logs detailing redacted data and detection reports, allowing for meticulous scrutiny of potential security breaches or vulnerabilities. Combined with Fasoo Data Radar, Fasoo AI-R Privacy enhances overall data security with its ability to extend detection and security beyond documents to encompass images.

About Fasoo

Fasoo provides unstructured data security and enterprise content platforms that enable our customers to protect, control, trace and analyze critical business information while enhancing productivity. Fasoo has successfully retained our leadership position in the unstructured data security market by deploying enterprise-wide solutions for more than 2,000 organizations globally, securing more than millions of users. Fasoo is experiencing continuous improvement in its global market position, based on our unique technology, ongoing R&D and strategic approach to comprehensive product capabilities by extending our core security capabilities into content-centric collaboration, behavioral analytics and information security consulting services.
