

Guidant goes live in under six months with SAP Cloud ERP

Leveraging GROW Fast and a clean-core approach, the company rapidly deployed SAP Cloud ERP after a complex carve-out

Facing a strict deadline to replace legacy systems, Guidant Measurement implemented SAP S/4HANA Cloud Public Edition in just five to six months. With SAP GROW Fast approach and partner Deloitte, the company established a scalable digital core to support global operations and future growth.

From carve-out to cloud-ready in record time with SAP

Before: Challenges and opportunities

- Carve-out from parent company with strict transition deadline
- Loss of access to legacy systems within six months
- Complex global operations across multiple countries

Why SAP and Deloitte

- Scalable cloud ERP
- SAP GROW Fast enabling rapid implementation
- Clean-core approach supporting standardization and speed
- Strong partnership and delivery capability from Deloitte

After: Value-driven results

- Full ERP implementation completed in ~5–6 months
- Successful deployment across multiple countries
- Rapid go-live with minimum viable product approach
- Continuous innovation through phased releases post go-live
- Simplified user experience with intuitive Fiori interface
- Scalable platform supporting future acquisitions and growth

“We would not have been able to implement an ERP in less than six months without SAP GROW Fast. It enabled us to move fast while keeping a clean-core approach.”
