

MERINIO: THE WORKFORCE MANAGEMENT SOFTWARE THAT FACILITATES COLLABORATION

Merinio offers workforce management software that assists companies in managing shift-based employees. We provide a state-of-the-art software that is adapted to each client's reality to ensure maximum productivity and impeccable service.

What we do

Schedule management

Automated employee dispatching

Time and attendance management

Management of availability, absences, leaves and vacations

A software that will be adopted

Thanks to a multitude of communication tools, a collaborative approach and unparalleled service, Merinio achieves a record usage rate every time.

An algorithm that does more

The degree of configuration of the software gives the automation tools offered unparalleled accuracy to speed up decision making, limit errors and minimize the mental energy employees must invest in the daily task of schedule management.

Built for complex situations

The hassles caused by the following situations are a thing of the past: compliance with collective agreements, project-based management, multi-site management, real-time adaptation of staffing levels according to demand and/or a large number of part-time employees.

Up-to-date and accessible data

Merinio always provides access to the most up-to-date information. Whether it's entered in self-service or simultaneously by multiple managers at multiple sites, our software tracks and uses real-time information to facilitate collaboration and limit any duplicated work.

Fewer vacant shifts

Filling multiple shifts has never been easier than with an intelligent communication tool that targets the right employees and communicates with them through the channel of their choice (call, SMS, notification, or email).

Affordable and rigorous absence management

The combination of our automated phone system and self-service platform is an excellent alternative to call centers. It provides managers with quality data and instant notifications, as well as offering methods adapted to the level of comfort with technology of various employees.
