Modern Workplace Reimagined

Process-lifecycle management solutions with the sole purpose of replacing all paper-based processes with electronic smart check-in solutions for self service, concierge, and security teams.

Extensive Industry Experience

Entry2Exit has been carefully curated as a platform with extended functionalities and modules to meet the needs of specific industries from health and data safety oriented organizations to crowded venues.

Premium Support

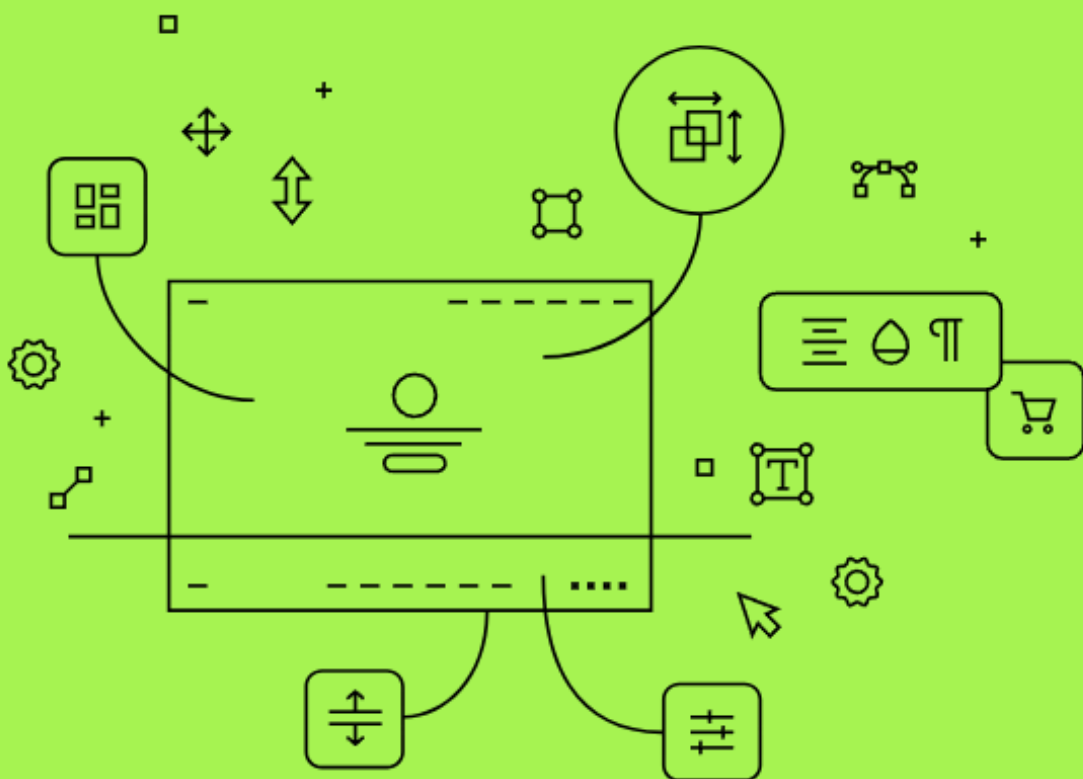

We are a team of customer success superheroes! Customer support teams are available to meet at your office, speak your language, explain complex concepts clearly, and are passionate about solving your problems quickly and around the clock 24/7.

5M+ Happy Visitors

Founded in 2015, we have served across 100+ locations to meet and process data of various people, item and vehicles. With customer as our core focus we have grown 30% processing capacity year over year.

Build Everything

From multiple locations to various organizational processes, our fully self customizable wizard for admins help define organization specific workflows within a few minutes. From online forms to security check-in and out processes, everything can be defined by the admin from a centralized location.

Industry Leading Performance

With performance we mean the process is optimized to be minimal clicks and data entry, with the ability to process data in bustling venues at extended capacity.

Design Meets Branding

Each Organization needs to showcase its branding from the moment a person enters through their doors, Entry2Exit is able to bring this branding elements to the forefront of visitor experience with custom logos, color palettes and homepages.

Visitor Management System →

Entry2Exit visitor management system (VMS) is a platform to empower organizations to use technology to invite, check-in, monitor, track, and record every guest who is visiting, from Entry2Exit.
