

What's your *signature* move?

World-leading email signature management

Turbo boost your email signatures

Get the power to create, control, and deploy company email signatures and fire up a new marketing channel with world leading email signature management.

The image shows a central white card representing an email signature. To its left is a light beige box with the text 'Connected Users' and the number '1085', accompanied by a cloud icon. To its right is a light blue box with the text 'Total Views' and the number '1085', accompanied by a tree-like icon. The central card features a circular profile picture of a woman with curly hair and glasses. To the right of the photo, the text reads 'Alex Green', 'Founder & CEO', 'T: +123 456 7890', 'E: a.green@greenorg.com', and 'W: greenorg.com'. Below this information is a green banner with the text 'Schedule a call with us today.' and a dark blue button labeled 'Book now'. At the bottom of the green banner, it says 'Free 30 minute consultation'. The entire composition is set against a background of concentric white circles on a light beige field.

Include functional elements like one click surveys and disclaimers.

Elevate promotional messaging with banners and add social icons to encourage engagement.

Track success with an analytics dashboard.

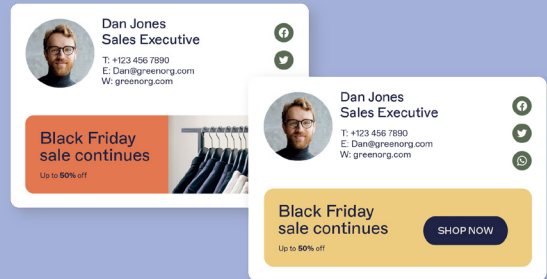

Power your performance

- ✓ View feedback and engagement in dedicated dashboards.
- ✓ Run A/B testing and measure performance to give your signatures an extra charge.
- ✓ Monitor and report on signature imprinting and usage.

Turbo charge with automation

- ✓ Automatically sync contact details with Azure Active Directory or Google Directory.
- ✓ Create rules for signatures based on email address or domain name.
- ✓ Users can choose from multiple signatures from within their email program making sure they always sign off in the right way.

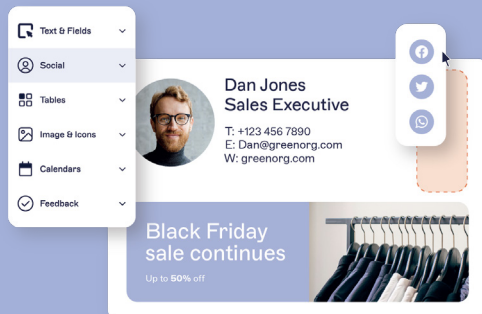

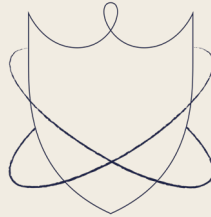

Step into the driver's seat

- ✓ Control all staff signatures from one location.
- ✓ Grant editing access for teams and employees to update their own details.
- ✓ Set rules around signature application.

Boost your brand

- ✓ Use our tools to customize designs or use our bespoke template design service.
- ✓ As well as signatures you can place messaging and banners above the email body for greater impact.
- ✓ Use advanced targeting to deliver the right message at the right time.

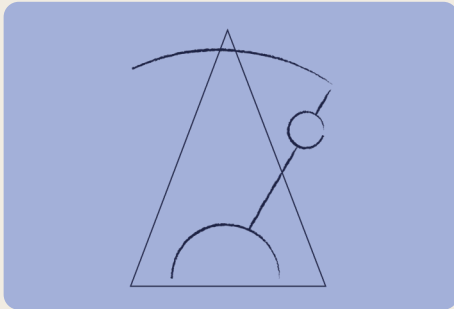

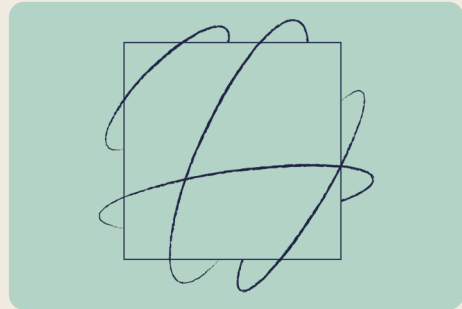

Always on. And always secure.

We build security into every element of our product, and are regularly audited to make sure we uphold the highest standards. We're the proud holders of multiple industry certifications for our security and compliance standards.

Security

We protect data at every stage. From including DevSecOps engineers when we build new products, to running web application firewalls during processing, protecting gateways with active DDoS and enforcing MFA with Google and Microsoft single sign-on options.

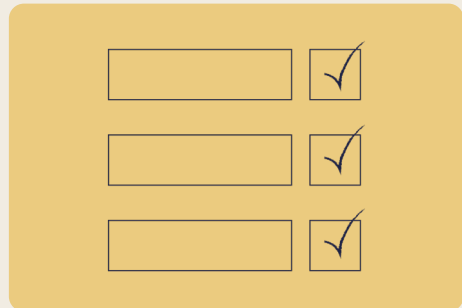

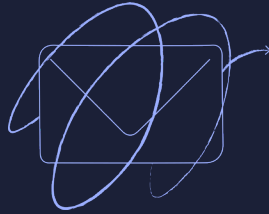

Compliance

Exclaimer is committed to mitigating governance risks. It's why we undergo extensive independent system reviews and auditing to make sure we meet the highest compliance standards. And we've got SOC 2 Type II, ISO 27001, ISO 27018, Cyber Essentials, HIPAA and more certifications to prove it.

Reliability

Exclaimer runs in the cloud. We use 12 data centers in six geographically separated hot-hot pairs to keep data safe in the region it's from. What's more, we currently average an uptime of 99.99% so you know your signature's safe with us.
