

WE PROUDLY PRESENT

Microsoft Teams Governance made simple

Teams
Manager

COLLABORATION GROWS, SO DOES THE CHAOS

WHAT ADMINS FACE TODAY

- Uncontrolled team creation
- No naming standards
- Unclear ownership
- No lifecycle rules
- Limited visibility & reporting

WHAT THIS LEADS TO

- Teams sprawl
- Impossible to find anything
- No accountability
- Dead weight & compliance risk
- Reactive instead of proactive governance

= Hours of manual admin work

Teams Manager brings structure to every lifecycle stage - from creation to archiving.

AUTOMATED LIFECYCLE MANAGEMENT

- More security and governance for managing M365 groups and teams
- Prevent uncontrolled growth and get rid of admin tasks
