

# SURFACE, DEEP & DARK WEB INTELLIGENCE

CTM360 ingests large volumes of data from the surface, deep and dark web, with a focus to detect potential threats targeting your organization, its brands, executives and digital assets

## CTM360 CYBERBLINDSPOT includes:

### FEATURES

- **Surface, Deep and Dark Web**  
Detect threats across open source intelligence, deep and dark web with effective filtering based on relevancy, priority and severity.
- **Proactive Indicators**  
Tackle and dismantle an attack at a pre-compromise stage through Indicators of Attack, Warning, Exposure and Compromise.
- **Early in the Kill Chain**  
Identify potential threats early and pre-empt attacks as they target your organization

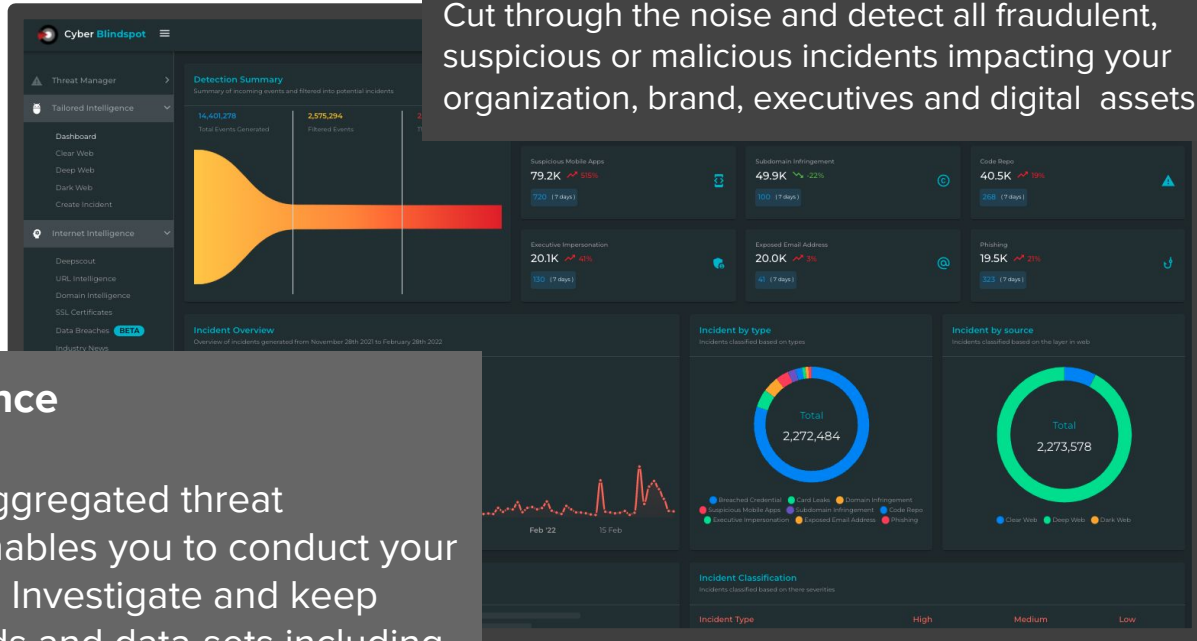

### BUSINESS BENEFITS

Derive specific value relevant to your organization with findings across:

- Social Media Fraud (Brand Impersonations, Infringements)
- Phishing & Cyber Evil Twin Sites
- Financial & Investment Frauds
- Leaked Credit Cards
- Email Fraud
- Crypto / Binary Frauds
- Breached Credentials
- Leaked Data
- Hacker Chatter
- Unauthorised Associations
- Social Engineering Vulnerabilities

### Tailored Intelligence

Cut through the noise and detect all fraudulent, suspicious or malicious incidents impacting your organization, brand, executives and digital assets.

### Internet Intelligence

Comprehensive, aggregated threat intelligence that enables you to conduct your own due diligence. Investigate and keep track of global feeds and data-sets including DNS, WHOIS, Carding Shops and more in a consolidated view.

## SPECIFIC & RELEVANT TO YOU

### FEATURES

- URL Intelligence**  
 Enables threat hunting on potentially malicious URLs, with the ability to pivot across data-points. This pivot feature allows CTM360 to identify phishing and malicious websites using common patterns in DNS records, page requests, cookie fingerprints, etc.
  - Campaigns**  
 Event-themed intelligence on threats associated with particular campaigns that have global or regional significance.
  - Industry News**  
 Trending news related to Cybersecurity via 1000+ data feeds.
  - DeepScout**  
 DeepScout rapid investigation for Email Header analysis.
  - IntelliStream**  
 Searchable data sets including Historic WHOIS, Pastebins and Big Datasets.
  - SSL Lookup**  
 SSL Certificate Lookup of Issue and Expiry dates.
  - Carding Shops**  
 Inventory of Carding Shops selling Credit Card credentials, BIN numbers etc.
- and more.**
