

Next-generation Program Management

01

DIGITAL PLATFORM

Successful organizations make strategic decisions about which initiatives to implement in order to achieve their ambitions. The Scientrix digital platform applies a matrix-based, next generation method of program design and execution, connecting all levels of performance to strategic objectives, whilst delivering the analytics required for regular company calibration.

Using a combination of the right methodology, digital technology and expert skills gives companies the best chance of successful strategy execution. Without continuous execution feedback and dynamic adjustment, strategy will remain a one dimensional document presented at the annual off-site.

Strategy

- Purpose, objectives & teams
- Measurement (KPI's, OKR's)

*EXCO/CEO/Steering Group

Programs

- Program objectives & teams

*PMO/Strategy Office

Initiatives

- Projects, owners & deliverables
- Risks, issues and dependencies

*Project Owners

Tasks

- Task breakdown, timelines & deliverables
- Agile execution

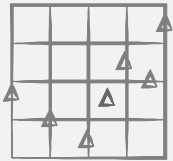

*Task Owners

Next-generation Program Management

02

METHODOLOGY

Align initiatives to the strategy

Use what you have! Programs and projects are often poorly aligned to strategy. Organize and review your initiative portfolio in a matrix framework in order to provide an overview of where our efforts are going and where the gaps & duplications are.

Define measurements for success

Ensure that you know what success looks like. Set KPI's to your strategic objectives and input actual & target metrics. Are we achieving our targets?

Connect the organisation

Get people to buy-in and understand the strategic ambition of the organisation. Enable accountability of deliverables through clearly demonstrating the contribution each person makes to propel the organization forward.

Implement a governance cycle

Set a weekly, monthly and quarterly cadence of strategy execution. Measure impact and monitor organisational effectiveness by providing corporate wide KPI dashboards and intelligence.

One connected plan across the organization, bringing everything and everyone together in a **single platform**.
