

# Collateral Doc | AutoRecruit

## Deck purpose

AutoRecruit is an AI-based e-Recruitment portal where companies can post job opportunities, and job seekers can discover these jobs and apply.

## Audience

Organizations who want to offer a portal solution empower your recruitment with ai-powered autorecruit; powerful, dependable & configurable job portal

## Deck usage guidance

The slides are based on the **App value proposition**, **Benefits**, **Seller Guide**, and more information about the **Deployment & Support Guide**

# OVERVIEW OF AUTORECRUIT

A cutting-edge recruitment software by KASPE designed to simplify  
and streamline your hiring process

# AutoRecruit

## INTRODUCTION

AutoRecruit helps organizations reduce the time and cost associated with recruitment while improving the quality of candidate selection. By leveraging AI and automation, recruiters can focus on high-value tasks and make better-informed hiring decisions.

# Customer Key Usage

## Centralized Access for All Stakeholders

- An AI-based recruitment solution, offers a centralized access system for all stakeholders involved in the recruitment process

## Intuitive User Interface

- The portal features a powerful search engine that filters jobs based on keywords, location, industry, and other criteria, making it easier for candidates to find the right job

## Candidate Profiling and Resume Building

- Comprehensive candidate profiling and resume-building feature allows candidates to create a detailed profile that showcases their skills, experience, and qualifications

## AI-Based Recruitment Portal

- Empower Your Recruitment with AI-Powered AutoRecruit

# Customer Key Usage

## Integration

- AutoRecruit seamlessly integrates with all kinds of HR systems, providing easy HR management

## Flexible Licensing Options

- Offers flexible licensing options, making it easier for businesses of all sizes to access our platform. Whether you're a startup, a small business, or a large enterprise, our licensing options are designed to meet your needs and budget

## Chatbot Functionality

- Built-in chatbot that can interact with candidates and answer their questions, making the recruitment process more interactive and engaging. It has the ability to respond to all the common queries regarding job posts

## Resume Parsing

- Automatically parse resumes and extract key information such as contact details, work experience, education, and skills. This feature saves recruiters a lot of time and effort, allowing them to focus on more important tasks such as interviewing candidates and making hiring decisions

# Target Industries around the world

Integrate with Dynamics D365 F&O, Business Central and other third-party Backend ERPs

**Logistics**

**Distribution**

**Retail**

# What is AutoRecruit?

Experience the future of talent acquisition today with AutoRecruit.

Automation has revolutionized every other industry and sector including human resource department. Artificial Intelligence apps in HR are increasingly being used for recruitment. Many businesses are using this new generation of AI-driven recruiting tools.

With this, employers can easily post job vacancies, track and onboard new talent, and analyze recruitment data to optimize their hiring strategy. Besides, candidates can apply for jobs, and upload their CVs online

AutoRecruit automates the recruitment process, making it easier and more efficient for employers and candidates

Automated assessment feature, which saves recruiters and hiring managers time and money by identifying the most qualified candidates. The system provides an opportunity for employers to review each candidate based on their resume and CV before inviting them for an interview.

# Consider Digital Priority

Allowed to provide access to the services and information that current customers demand

1 Job Posting and Distribution

2 An intuitive user interface to hunt relevant job positions

3 Integrated with Microsoft Dynamics 365, HR software and ERPs

4 Candidate Tracking and Management

5 Communication and Collaboration

## Job Posting Optimization

Automated Job Posting feature optimizes job postings to attract a diverse pool of candidates, including those from underrepresented groups

## Candidate Sourcing

Uses artificial intelligence to search for candidates based on skills and qualifications rather than personal information that could lead to bias

## Collaborative Hiring

Allows multiple team members to evaluate and provide feedback on candidates, reducing individual biases and increasing diversity of thought

# Benefits of AutoRecruit

## Empower Your Recruitment with AI-Powered AutoRecruit

### Time-Saving

It automates many recruitment processes, saving employers and job seekers valuable time. The system provides automated assessments, making it easier for recruiters to identify the most qualified candidates. The system also allows candidates to apply for jobs online, reducing the need for manual paperwork.

### Cost-Effective

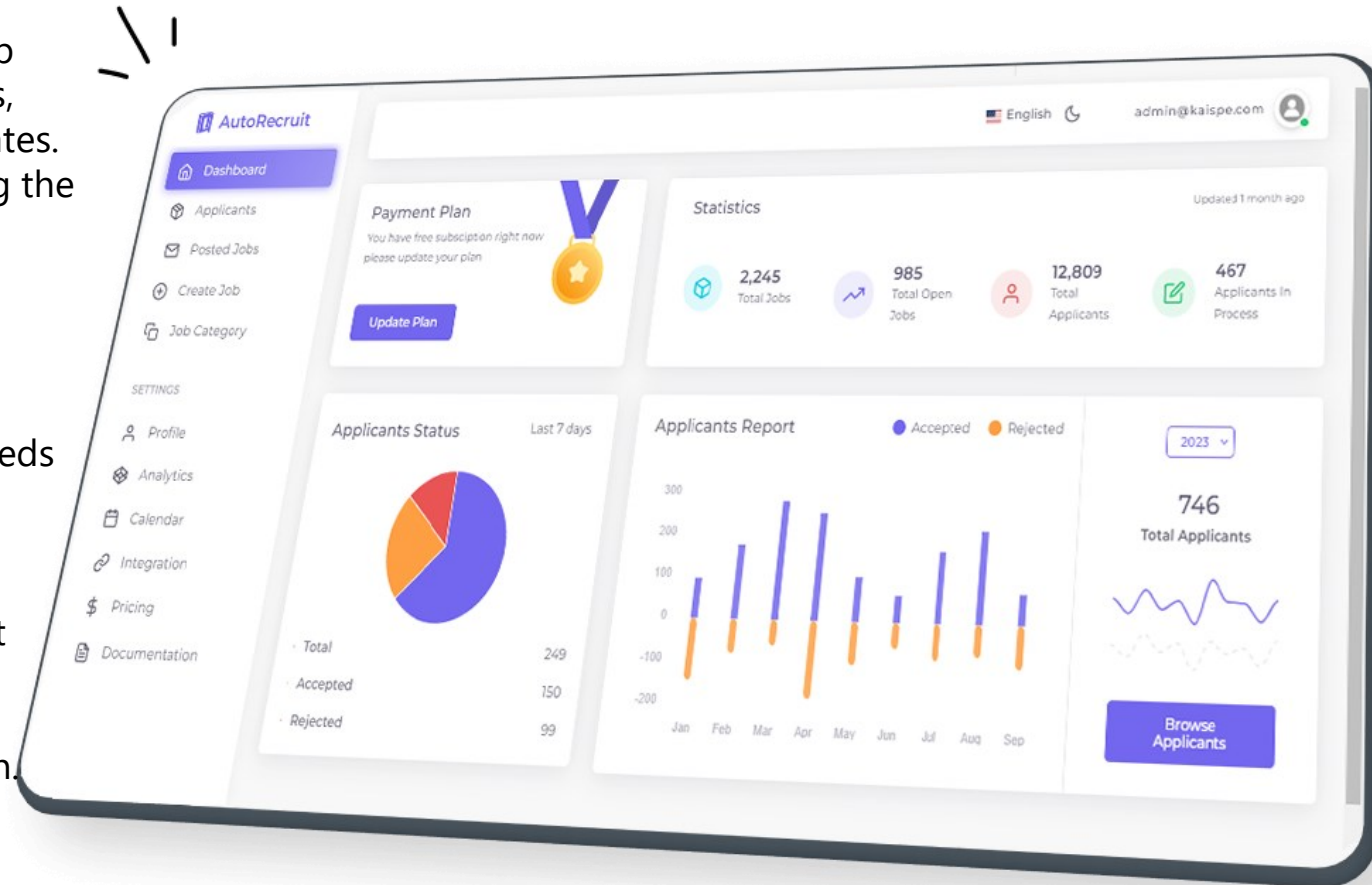

AutoRecruit's cost-effective licensing options make it an affordable solution for businesses of all sizes. The platform's flexible licensing options allow businesses to choose the plan that best suits their needs and budget.

### Enhanced Efficiency

AI-based technology streamlines the recruitment process, making it faster and more efficient. The system provides a centralized access system for all stakeholders, making it easier for recruiters, hiring managers, and job seekers to access the platform from one location.

### Improved Candidate Experience

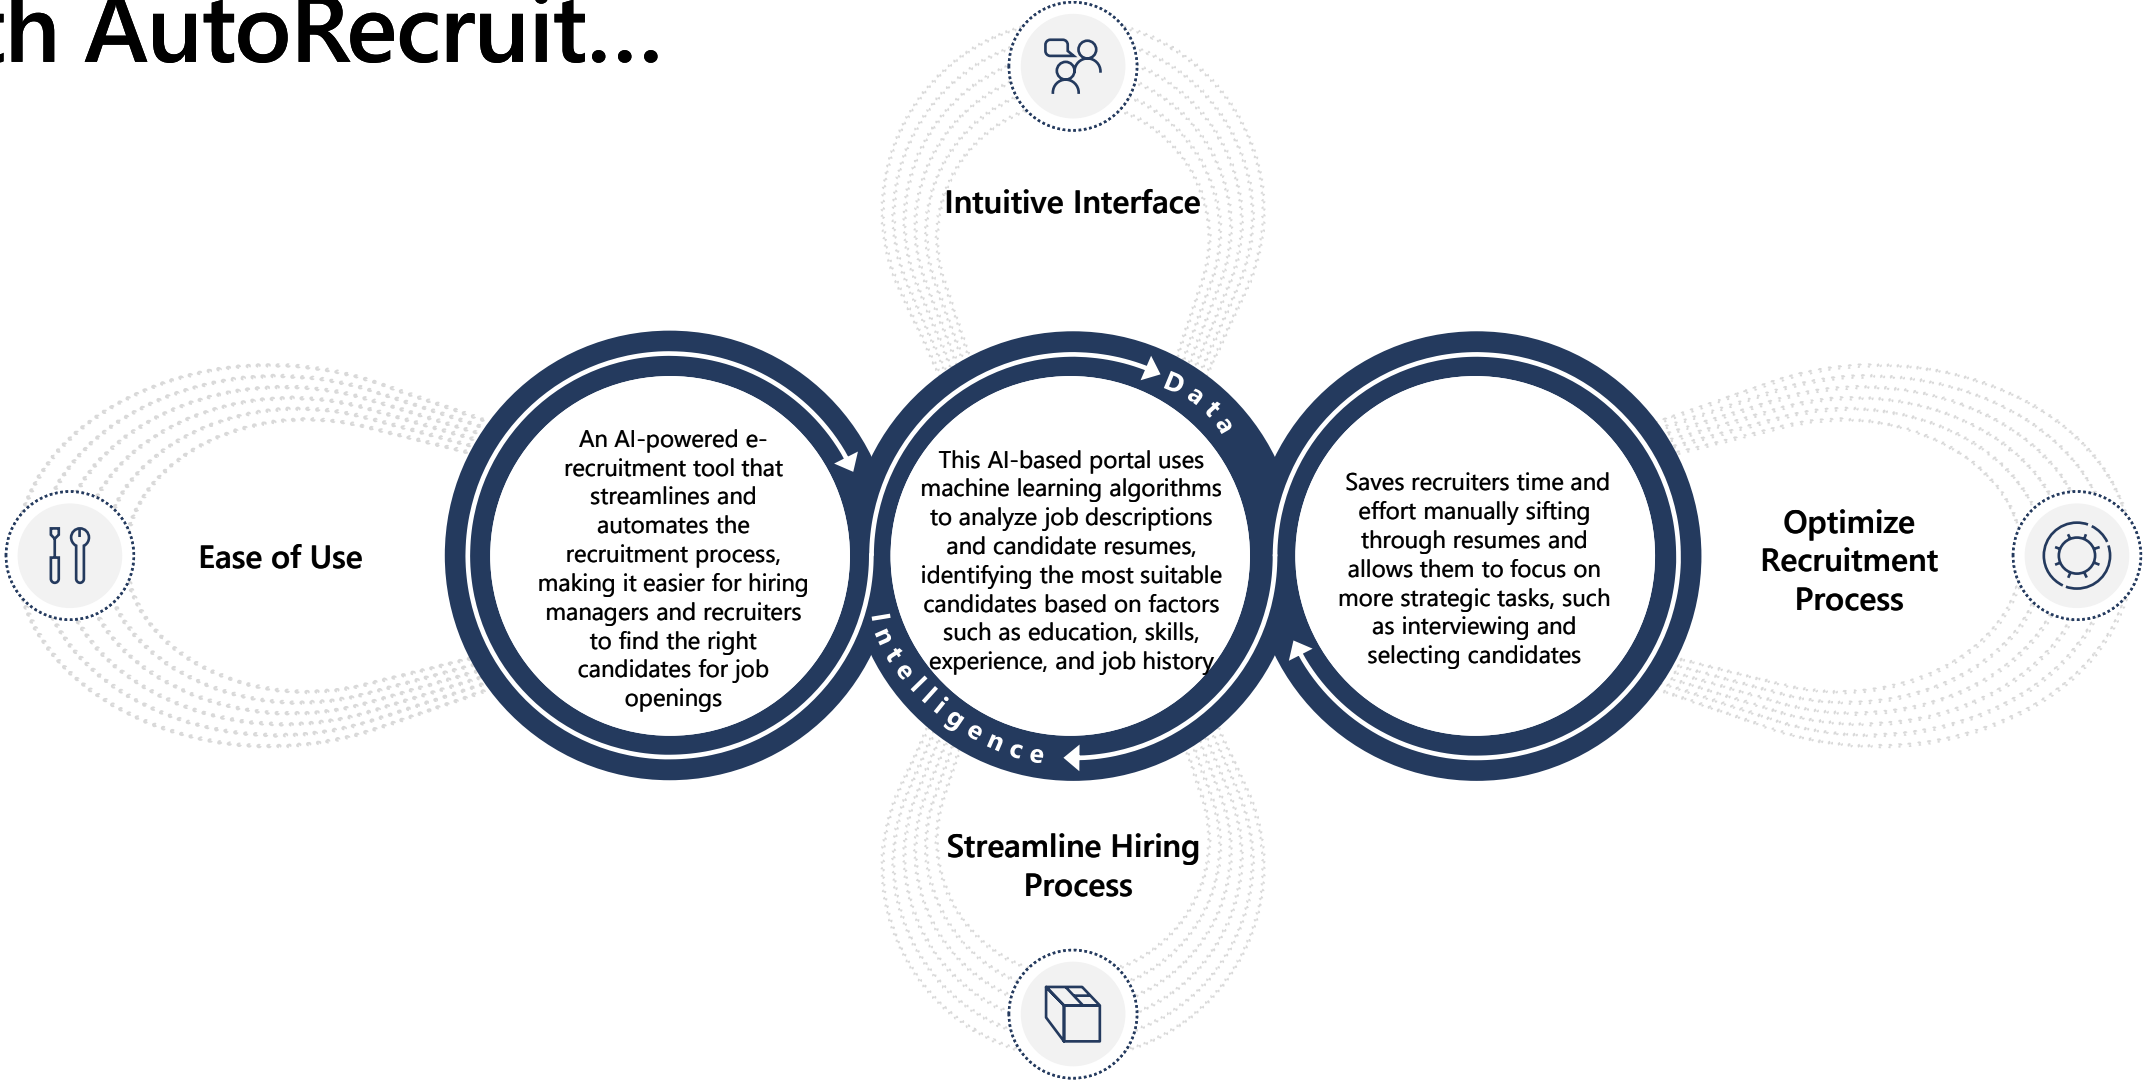

With intuitive user interface makes it easy for job seekers to search for relevant vacancies and apply for jobs online. The system provides detailed job descriptions, making it easier for candidates to find a suitable job.

# SUPPORTING SLIDES

---

# With AutoRecruit...

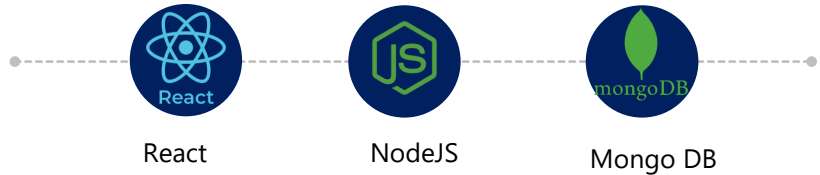

AutoRecruit helps organizations reduce the time and cost associated with recruitment while improving the quality of candidate selection. By leveraging AI and automation, recruiters can focus on high-value tasks and make better-informed hiring decisions.

# By leveraging its functionality customers can...

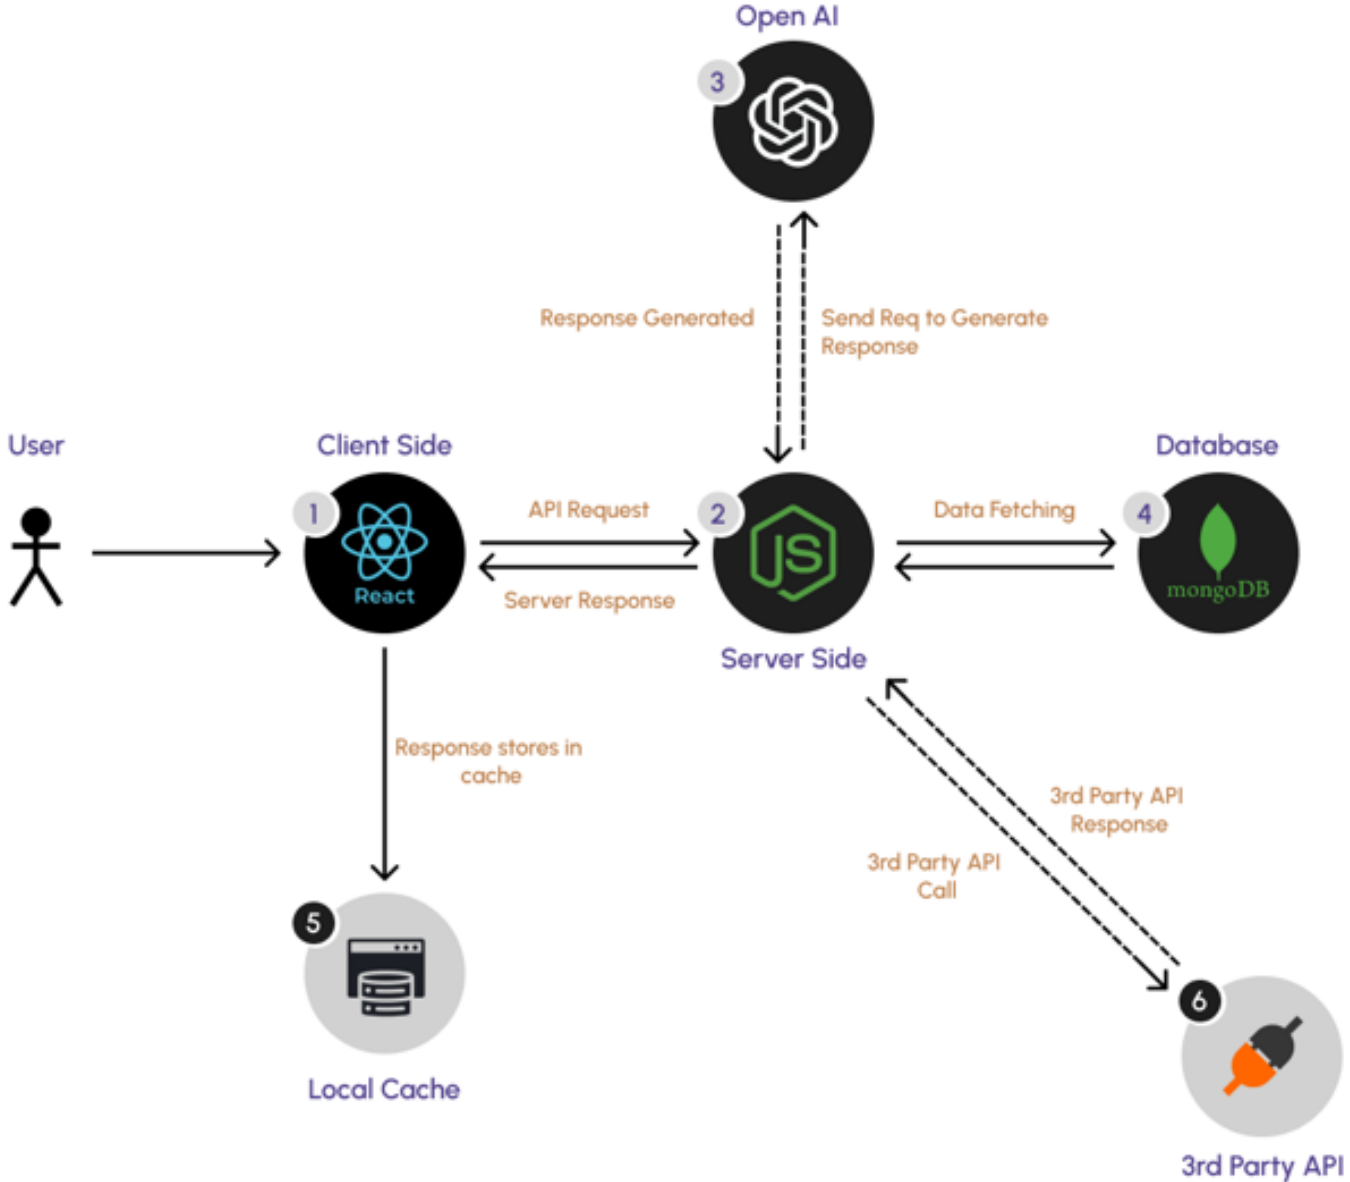

Unify their data. Get predictive insights. Achieve amazing results.

## Technology platform

# AutoRecruit | Architecture

# AutoRecruit | Use Case

## Scenario

A candidate named Martin Conn can apply for the job post by accessing the portal

### STEP 1

Martin opens the e-Recruitment portal and Sign Up for the first time by adding the Name and email address

### STEP 2

Once signed up, martin can add all necessary information for profile creation including Skills, Job Experience, Academic Qualifications and upload the Resume

### STEP 3

Based on matching skills and relevant data, Martin can view the Jobs on the portal

### STEP 4

Martin can easily apply for relevant job and the job status will be changed from Apply to Applied

### STEP 5

Martin will get the confirmation, once it's selected for the job
