

# Real time data collection with Cloudbyz EDC

Cloudbyz EDC is a user-friendly, cloud-based solution that is designed to store and manage clinical data effectively throughout a clinical trial's life cycle.

Our innovative solution enables clinical research teams to efficiently collect, analyze, and manage clinical data of different complexity and size.

Build your study without code, with an interface that helps users build forms and easily navigate to the appropriate screens for data collection and analysis.

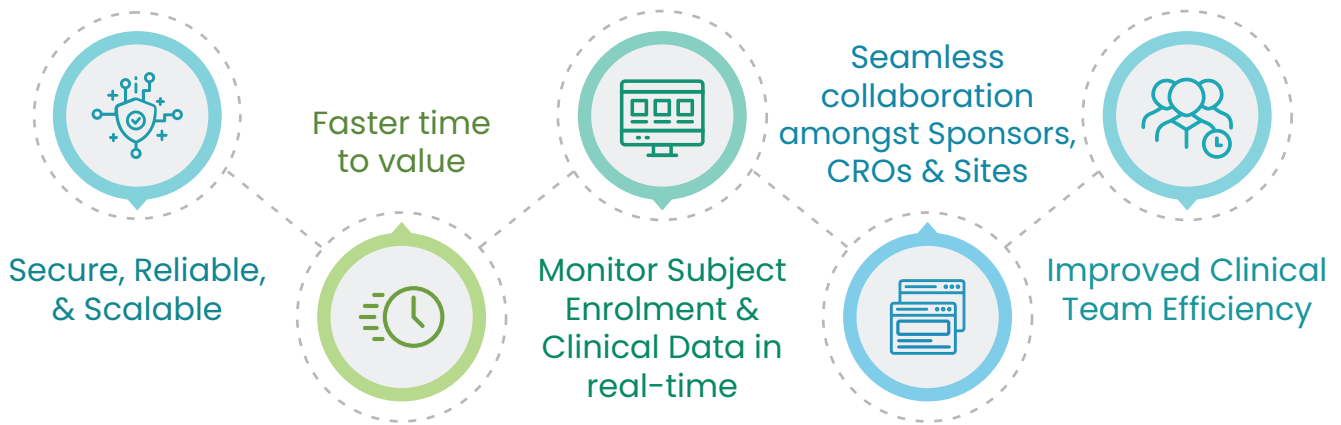

## Product Features

-  Study Setup & Form Library (eCRFs)
-  Rules Engine
-  Subject Management
-  Randomization
-  Medical Coding
-  ePRO/eCOA
-  Adverse Events & Protocol Deviation
-  Query Management & SDV
-  Annotated eCRF & Data Export
-  Compliance & Data Security
-  Reports & Dashboards
-  Unified with CTMS, eTMF, & Safety

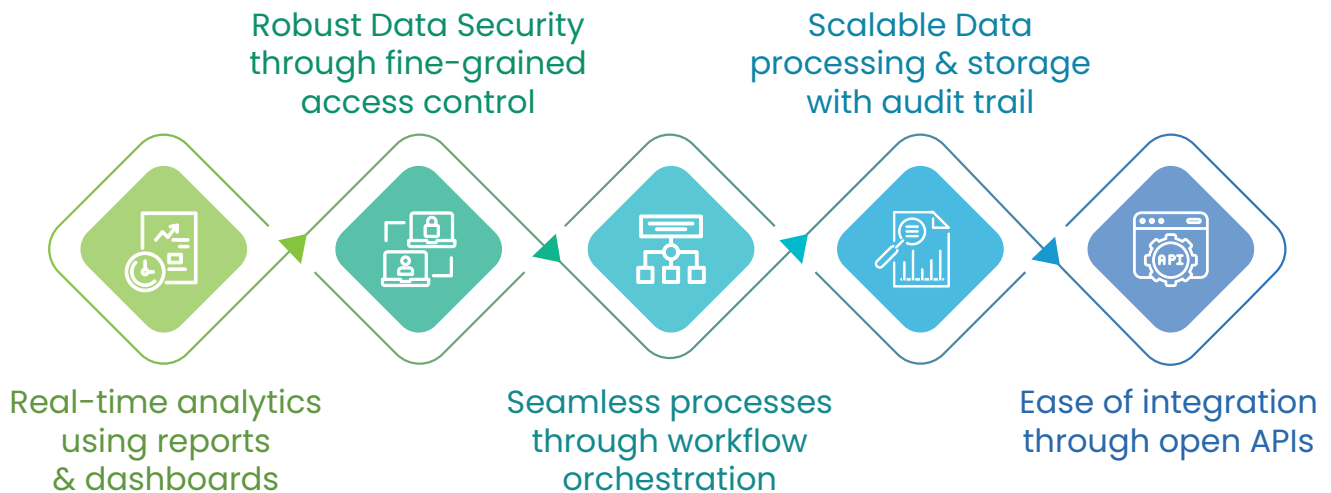

# EDC Benefits

The all-new Cloudbyz EDC application comes packed with user-friendly features. All other Cloudbyz applications such as CTMS, eTMF, CTBM, RTSM and Safety/ PV are native to the same platform as our EDC, allowing customers to have one single source of truth for a clinical trial. Furthermore, you can set up each study independently.

# Platform Benefits

Cloudbyz EDC is built on the Cloud platform to enable Sponsors, CROs, and Sites to store and manage their clinical data with the highest levels of data security and integrity.

# About Cloudbyz

Cloudbyz is a leading cloud-based eClinical solutions provider that helps organizations enhance their business processes & productivity.
