

The heart of your software supply chain

Centralized, secure, and scalable repository management

Sonatype solves your challenges:

Modern software development depends on thousands of open source, third party, and in-house reusable components

Manage all of your internal and third-party binaries **with ease**

Repository management is mission critical and must be resilient, secure and supported

Secure the early stages of your SDLC with SSO/SAML and RBAC

Development teams and systems are now spread around the world and in the cloud

Have **mission-critical scalability** with geographic distribution and resilient deployments on-prem or in the cloud.

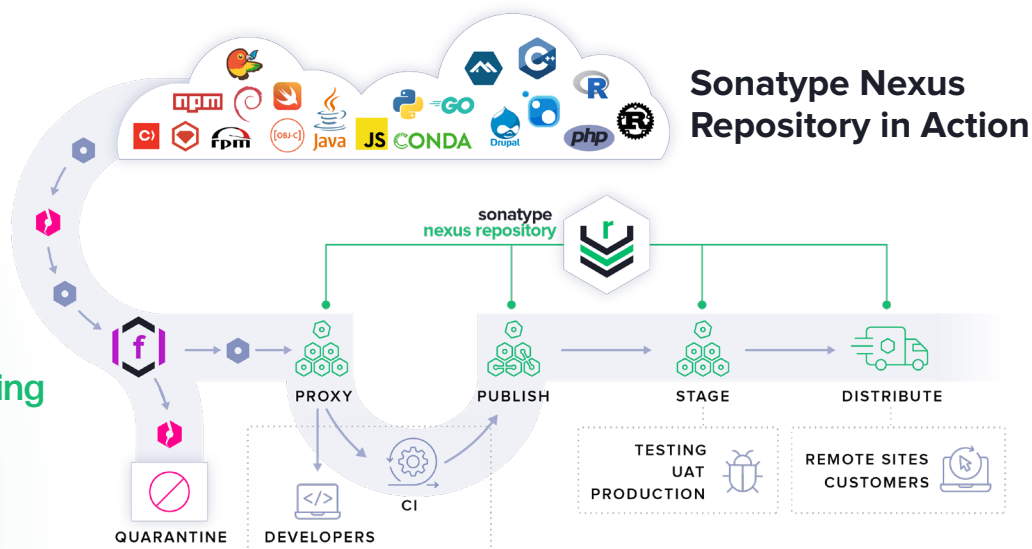

Binary repositories must support many languages, containers, CI/CD systems and security integrations

Integrate all your development tools in one place
(Ecosystem support+CI/CD support)

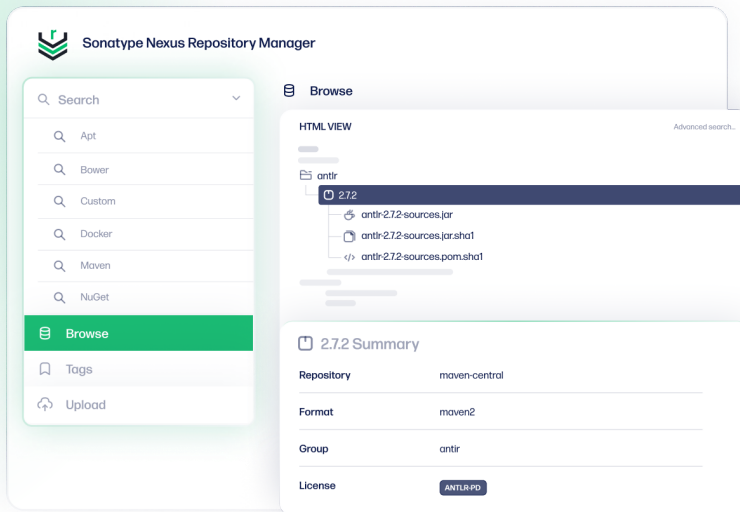

“We implemented the new framework to provide substantial shift left capabilities, quality assessment processes, and a real focus on ensuring our open source library consumption was safe.”

—Ken D’Auria
Director of Engineering, The Hartford

REPOSITORY MANAGEMENT

Build and distribute software fast

✓ Build quickly and reliably

Publish and cache components in a central repository that connects natively to all popular package managers.

✓ DevOps with ease

Control the lifecycle of staged builds and custom metadata directly from your CI/CD server.

✓ Scale without worry

Handle global workloads with dynamic storage, cleanup policies, and multi-node resiliency.

OPEN SOURCE RISK MANAGEMENT

Secure your software supply chain

✓ Flexible security

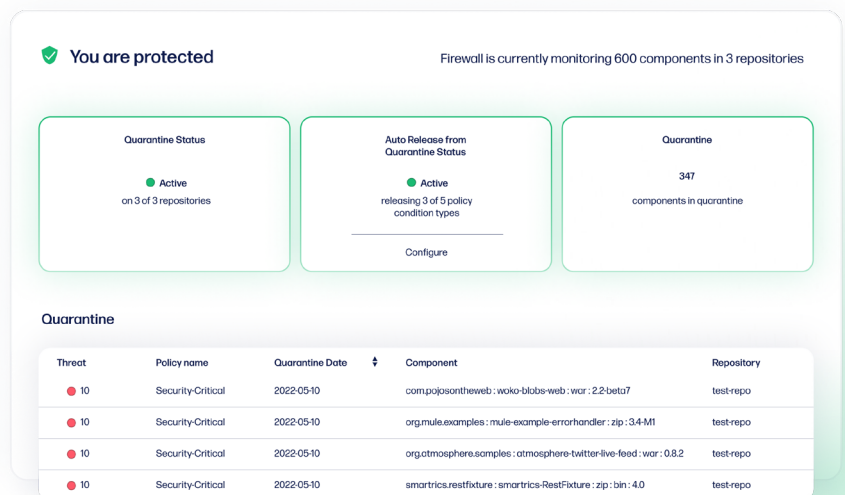

Control access to your components with single sign-on (SSO), role-based access controls, and full auditability.

✓ Assess open source risk

Centralize your consumption of open source to gain insight into the risk in your software supply chain.

✓ Block malicious components

Add Sonatype Repository Firewall to stop OSS risk from entering your SDLC using next-generation behavioral analysis and automated policy enforcement.

Sonatype is the software supply chain management company. We empower developers and security professionals with intelligent tools to innovate more securely at scale. Our platform addresses every element of an organization's entire software development life cycle, including third-party open source code, first-party source code, infrastructure as code, and containerized code. Sonatype identifies critical security vulnerabilities and code quality issues and reports results directly to developers when they can most effectively fix them. This helps organizations develop consistently high-quality, secure software which fully meets their business needs and those of their end-customers and partners. More than 2,000 organizations, including 70% of the Fortune 100, and 15 million software developers already rely on our tools and guidance to help them deliver and maintain exceptional and secure software.
