

# Mobile Forms – for every device

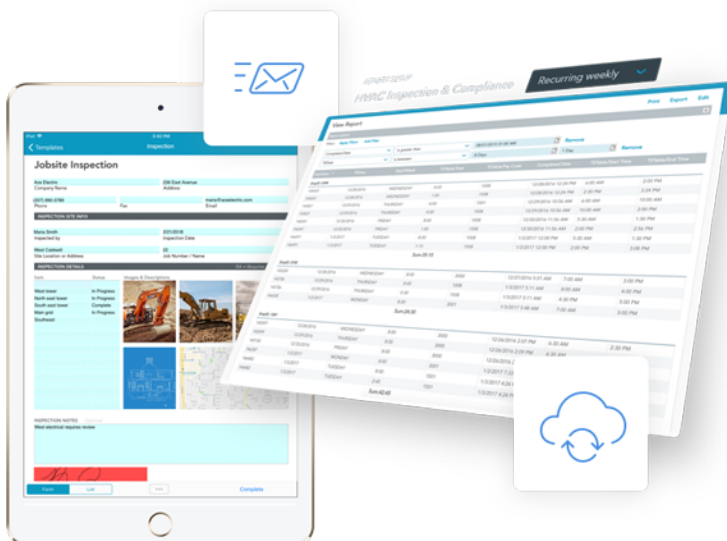

All the benefits of digital, with the familiarity of your existing forms and documents. Digitize your existing work forms for use on phones, tablets, and computers, or create entirely new versions from scratch in the GoFormz drag-and-drop form builder.

## Automate workflows:

With GoFormz Workflows, fully automate common tasks, like automatically email completed forms to colleagues and customers, upload forms and data to connected systems, update connected databases, and more.

## Capture types of data:

Collect new types of information, signatures, GPS and maps, images and sketches, barcode data, and more. Your forms can even be equipped with logic, enabling fields to instantly complete calculations, make fields required, dynamically display additional fields, automatically populate corresponding fields, and so much more!
