

CheckPoint

CheckPoint is an end-to-end digital access management and engagement system for venues. It automates and digitizes the entire registration, ticketing, and check-in process while enabling venues, vendors, and exhibitors to engage with guests directly to their phone's lock screen.

Benefits

Modernize Venues

Get guests through the door faster while being 100% contactless with end-to-end automation. Control access and monitor the attendance of your exhibitors, vendors, speakers.

Smarter Engagement

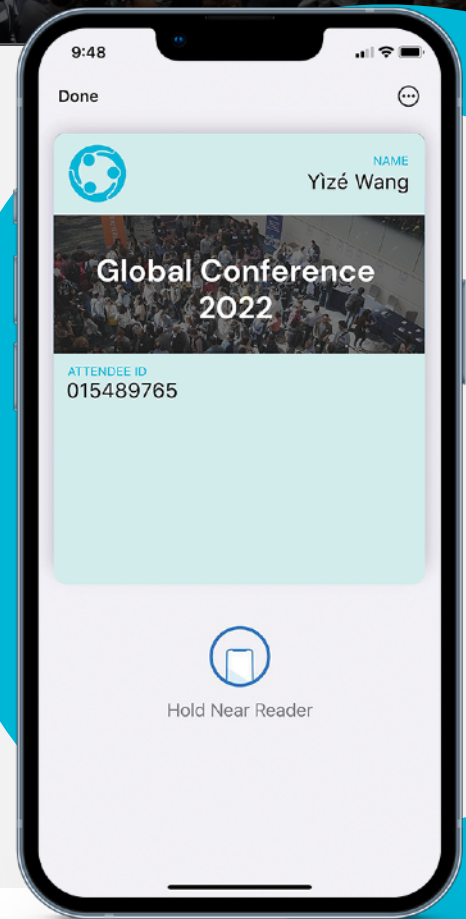

Guest's digital ticket unlocks a new communication channel directly to their lock screen. Build niche audiences and trigger personalized notifications by time or location.

Automate Processes

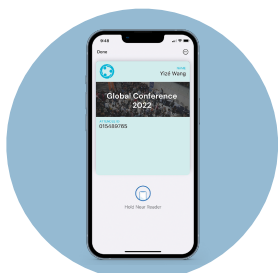

We've condensed a multi-step process into one simple tap to speed up check-ins while increasing security with automated processes.

Actionable Analytics

Understand which speakers, booths, or networking sessions attracted the most attendance in your admin portal so you can make data-driven decisions for your next event.

How it Works

Step 1

Guests register & download their digital ticket to their native mobile wallet

Step 2

Guests use their wallet pass to check-in with one simple tap

Step 3 (Optional)

Automatically print ID badges for guests to network with

Step 4

Engage guests with push notifications or SMS and monitor analytics
