# GAT+ for Google Workspace

(Our core tool)

Granular oversight of users' Google Workspace activity – all from one place.

- Admin Friendly Workspace Reporting covering Users, Drive, Email, Devices, Groups, Calendars, Meet, Applications, Contacts and more.
- Monitor high-risk file sharing activity across users, groups and Drives.
- Customised policies to keep sensitive data safe.
- Bulk multi dimensional file sharing permission management, detect and revoke sharing violations.
- Identify external access to files and folders and local access to external files and folders.
- Move files and folders in bulk, easily.
- Third Party Application risk assessment.
- Report on user collaboration and measure performance.
- Google Meet Reporting
- Deprovision, disable or re-enable Chromebooks and ChromeOS devices in Bulk.
- Delegated Audit Access for Non-Google Admins

**DRIVE AUDIT, DISCOVERY AND REMEDIATION**

117088 TOTAL Files/Folders

Count	Category	Count	Category
80	Open to Full Public	14998	Open to Specific External User(s)
970	Private	17283	Shared Drive Files

Research_Class	/Finals	tom.haines	nick.flowers, julia.james	Public with link
Overview	/Reports	sarah.roberts	emma.orwell	Public

# GAT Unlock for Google Workspace

(Requires GAT+)

Our security model for Google workspace where sensitive admin tasks are controlled with a unique 'lock and key' system.

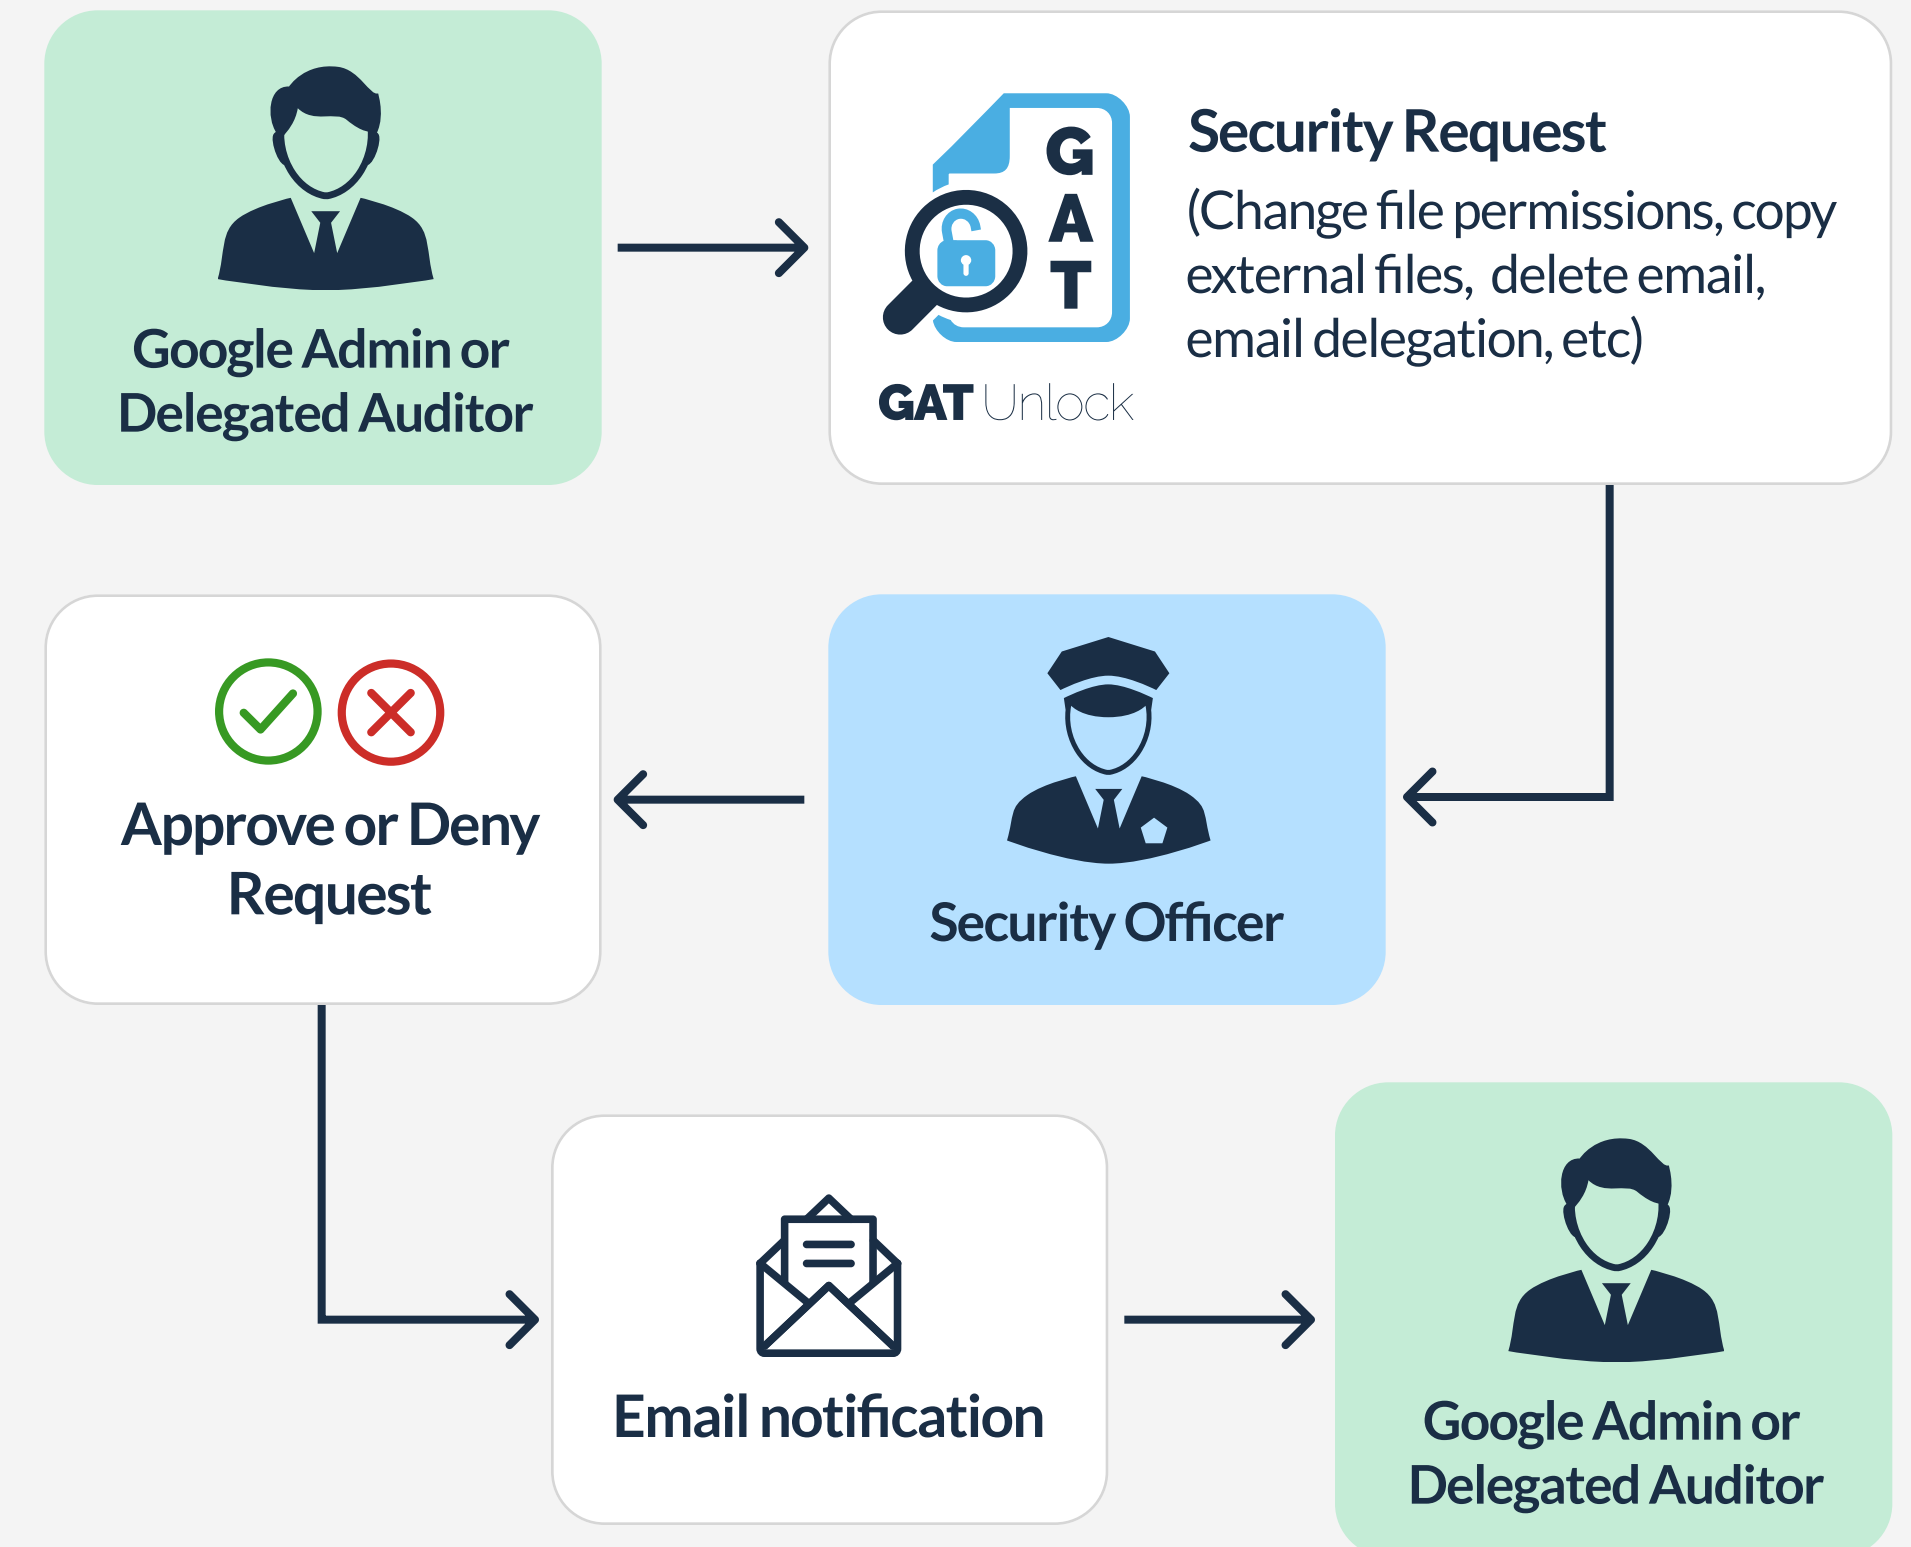

## Drive functionalities

- Set alerts for suspicious events.
- View/Download file content.
- Change file sharing permissions.
- Change file ownership.
- Add users to files as Contributors/Readers/Commenters.
- Silently copy or view files.
- Bulk download or view email contents.
- Copy externally owned files and folders securely

## Email functionalities

- Delete spam, inappropriate or accidental emails for users.
- Delegate access to an email account.
- Download emails as PDF/EML.
- View email content.

## GAT Unlock Security Approval Workflow

# GAT Flow for Google Workspace

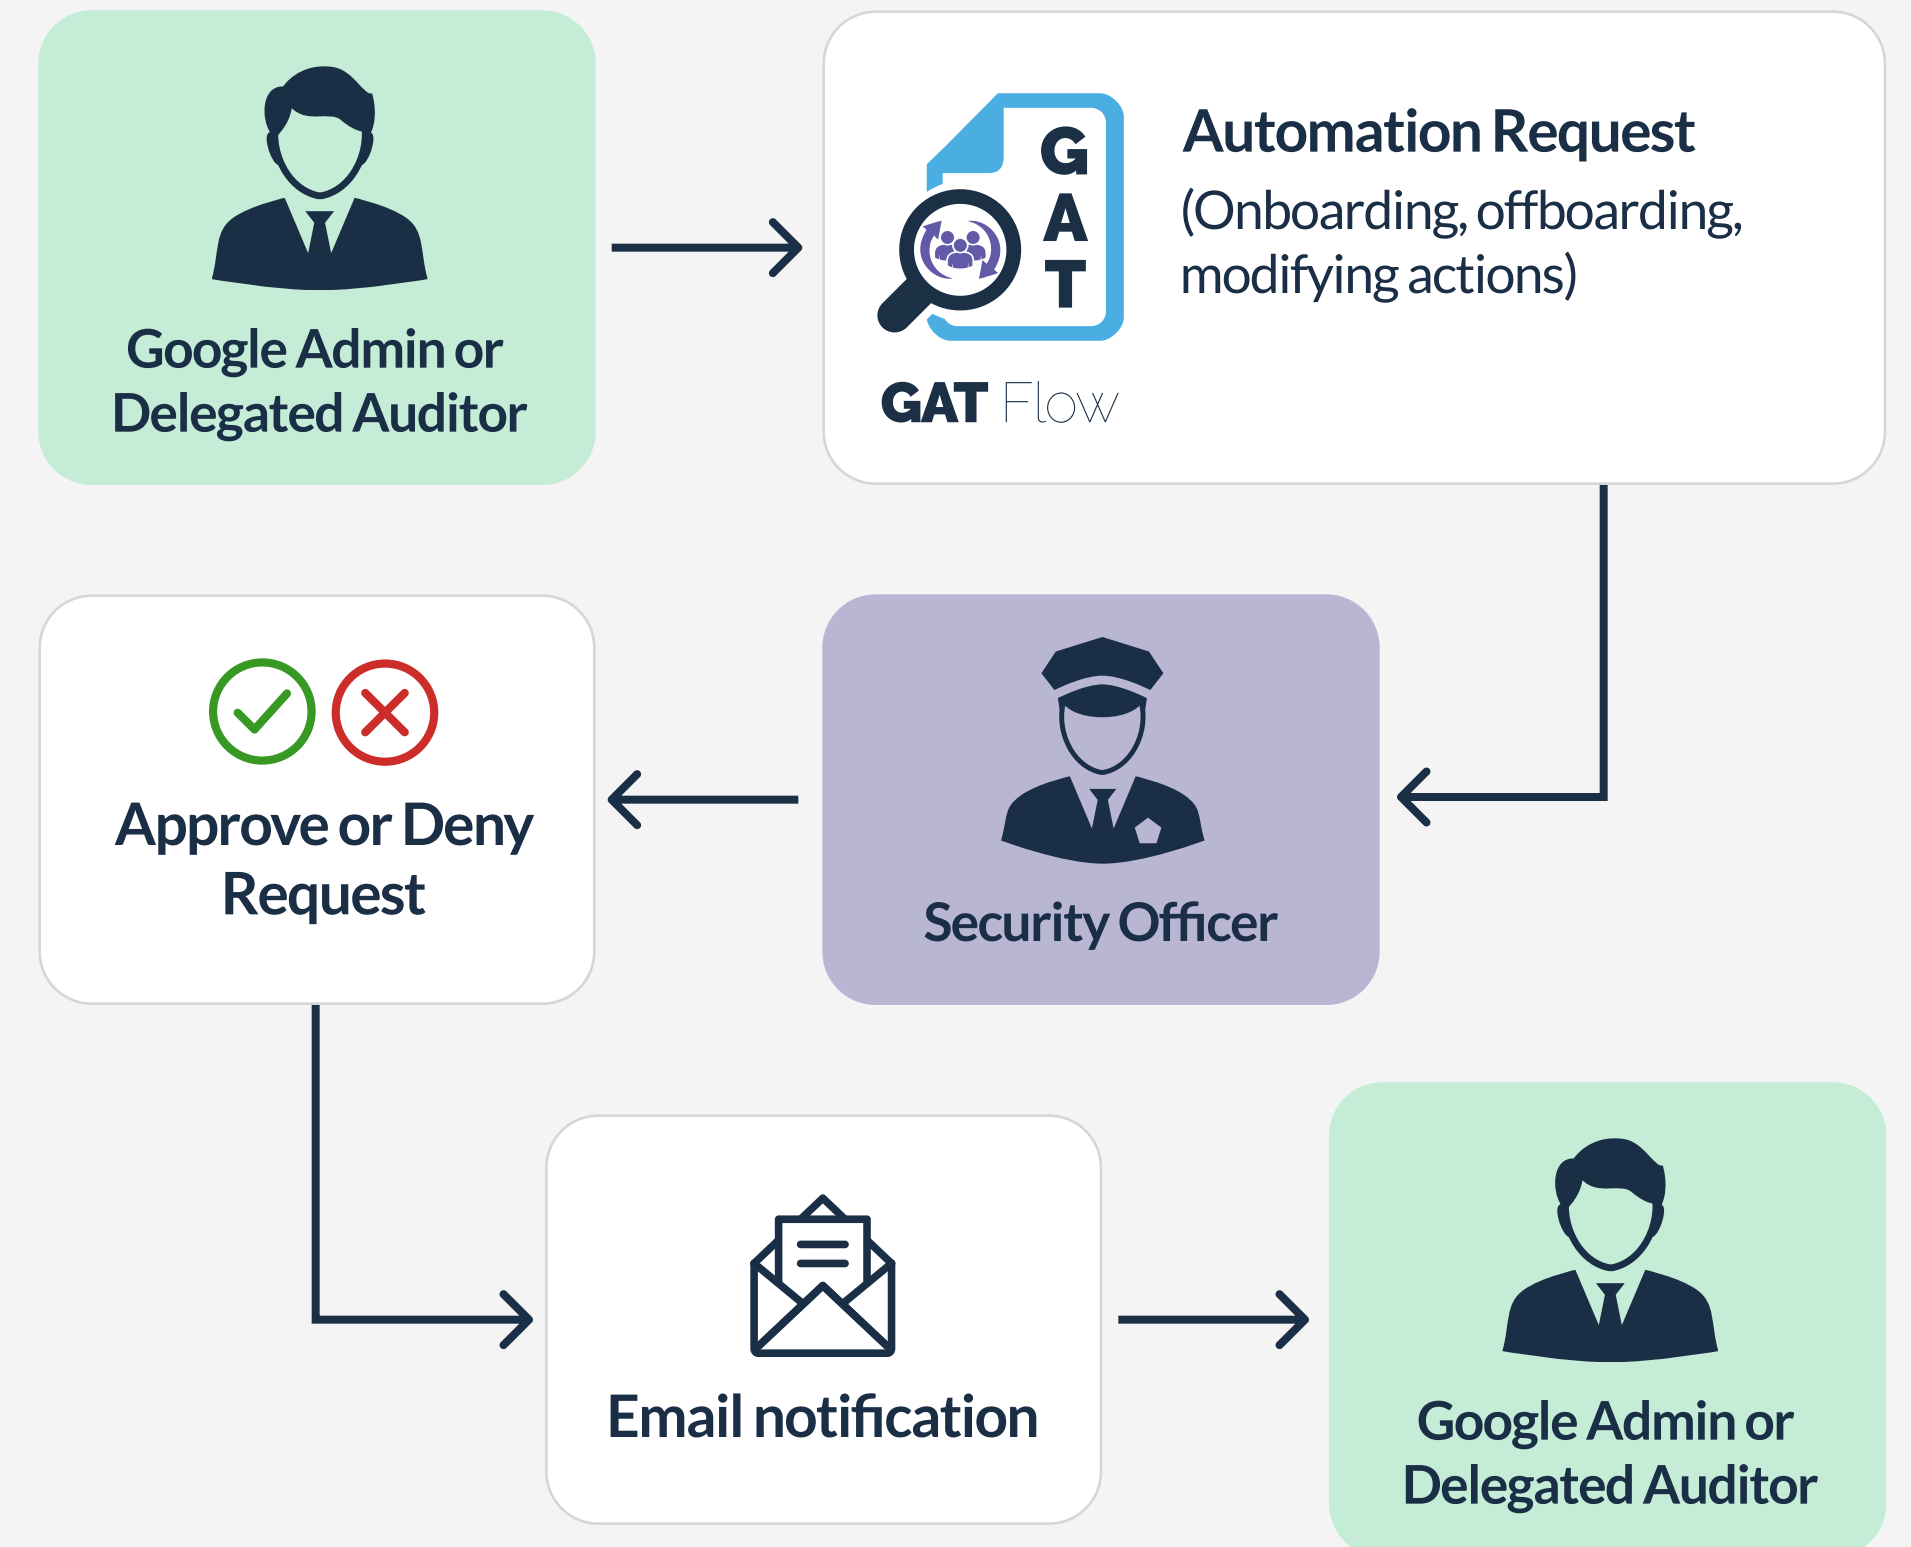

(Requires GAT+ & Security Officer from GAT Unlock)

User management automation convenience.  
Save time and delegate tasks.

- Automated User On/Offboarding and Modification Workflows.
- Event and Time-Based Workflows.
- Copy Multiple Folders to Multiple Users in Bulk
- Users, Passwords, Groups Contacts, Calendars, Drive and Shared Drive management.
- Bulk Email Migrations.
- Domain-wide signature management (single or in Bulk)
- Google Licence Assignment (Vault, Cloud Identity, Google Voice and more)

## GAT Flow Security Approval Workflow

# GAT Shield for the Google Chrome Browser

(Requires GAT+ & Chrome Extension Deployment)

Real-time DLP security for Chrome Browser, enhance data protection and gain detailed reporting and alerts of users activity.

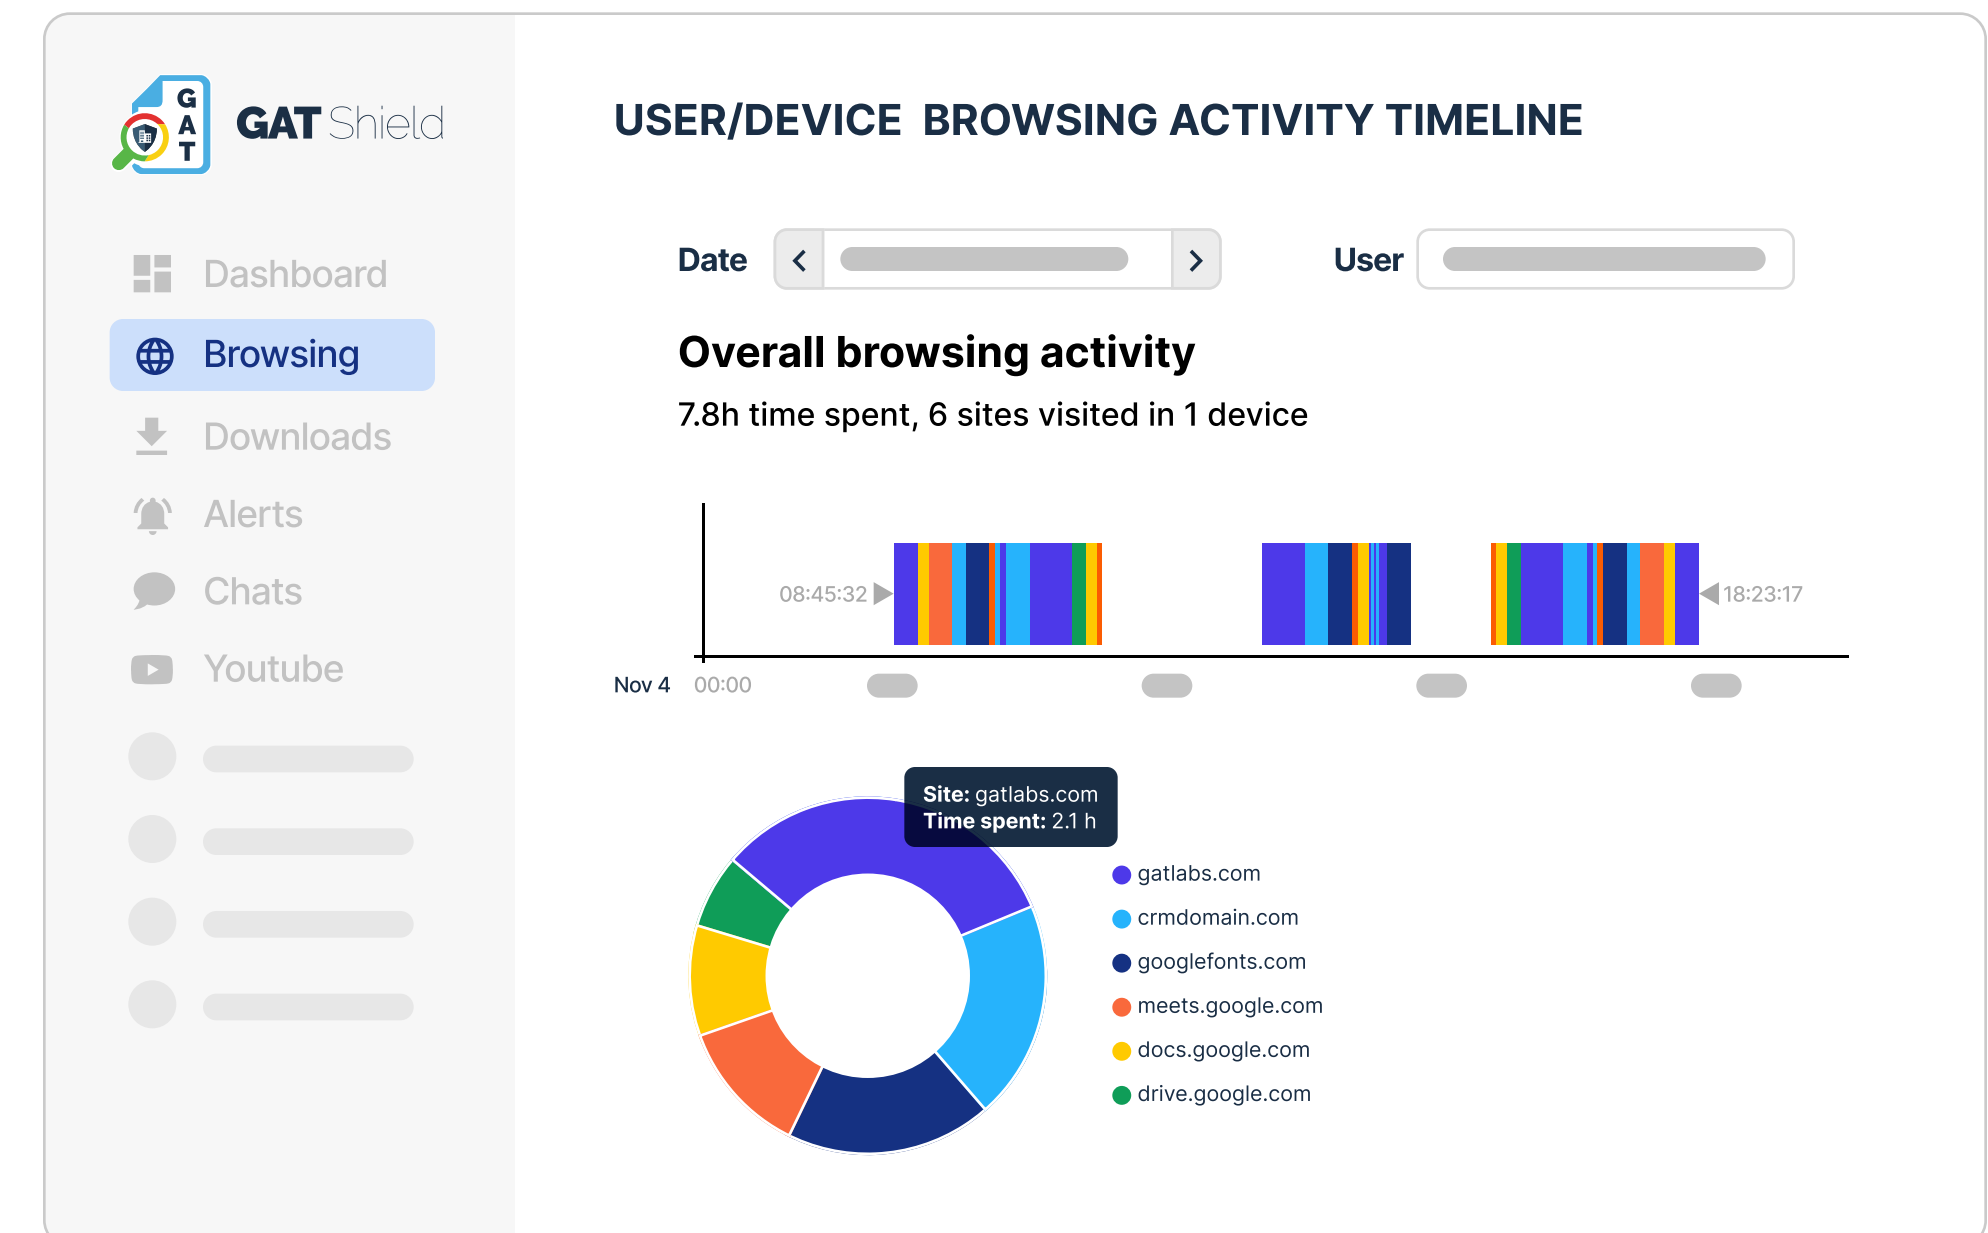

## Google Chrome real-time DLP solution

- Customised RegEx. alert rules.
- LAN like usage visibility over Chrome-based cloud users.
- Whitelist or blacklist sites for any given user, OU or group.
- Keep track of sites visited, downloads, chats, keyword searches and more.
- Detailed Guest Managed Session reporting

## Chromebook Management, Tracking and Monitoring

- Powerful URL Filtering & Blocking.
- Geo-track Chromebooks and ChromeOS devices at all times.
- Manage downloads across all 1:1 Chrome Devices.
- See where the bulk of any user's online time is spent.
- Investigate a specific activity for any user, on any site, and at any time.
- Manage Guest Chromebooks better.

**Every Chrome Interaction in One Place!**

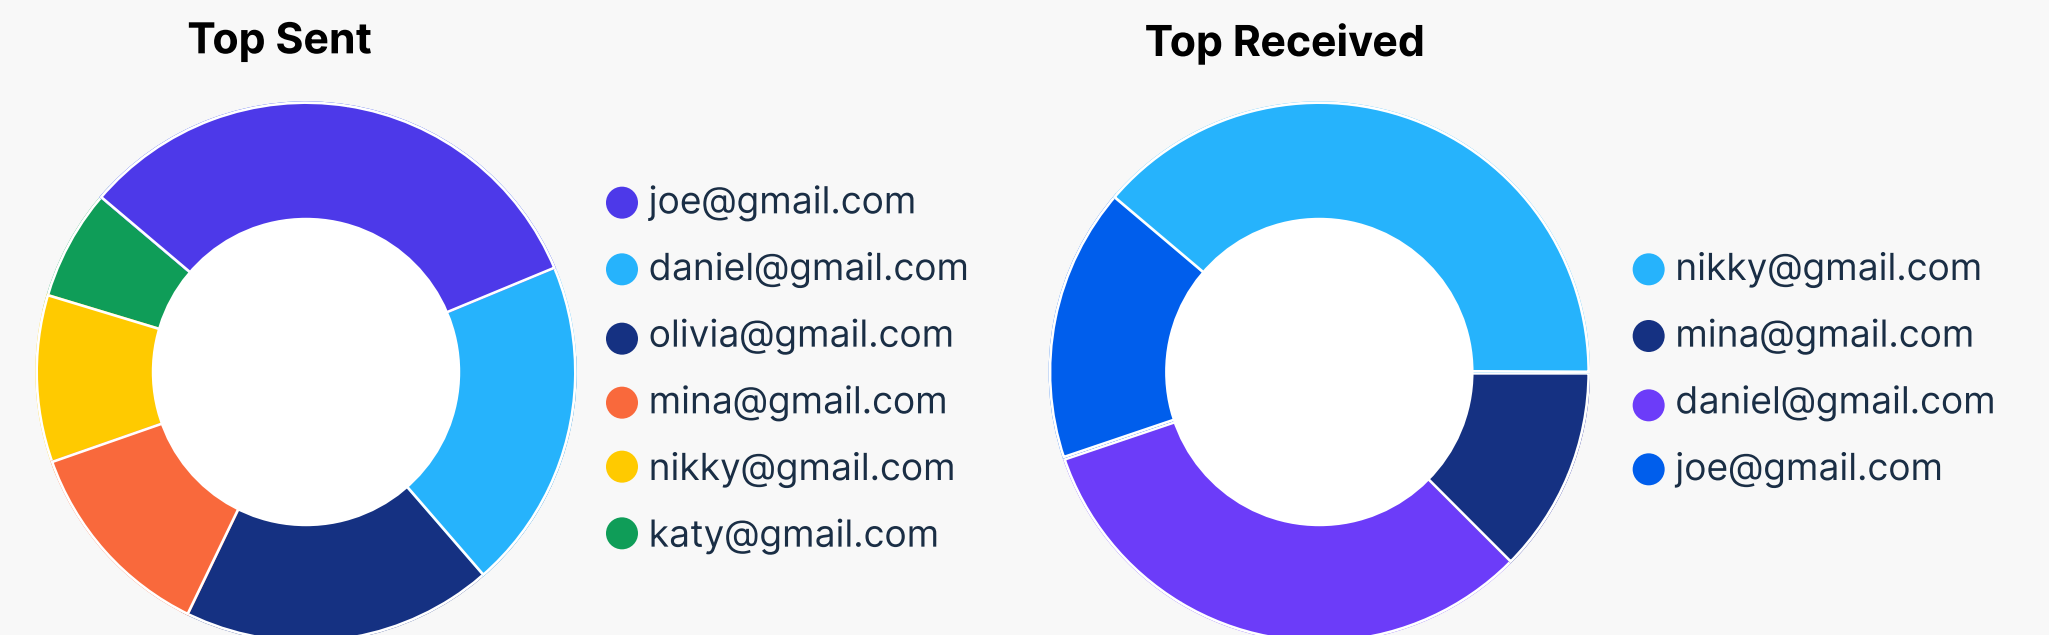

# Manager Assist

(Requires GAT Shield)

Employee productivity and collaboration insights from users' everyday Google Workspace activities for managers.

- Employee productivity and collaboration insights from users' everyday Google Workspace activities for managers.
- Email response time report.
- See top email external interactions.
- Report on unreplied and unread emails.
- Analyse users' browsing activity.
- Identify top internal and external file collaborators
- Google Calendar events' statistics
- Google Drive activity report
- Topic Expert finder
- Plan, manage, and track employee work with much-needed insight into team performance.

## Emails sent/received for all users on your team from 13/03/2022 to 08/05/2022

User	Total sent	Sent external	Sent internal	Total received	Received externally
joe@gmail.com	450	350	100	130	79
daniel@gmail.com	110	55	55	97	58
olivia@gmail.com	60	37	23	68	44
nikky@gmail.com	44	22	22	44	32
katy@gmail.com	15	10	5	32	12

# Value Proposition of GAT Labs for Google Workspace

Save Big on Google admin time, effort and cost with higher visibility, Automated workflows, Security Alert rules, Bulk actions and more!

- Comprehensive One-click reports.
- Powerful Drive management capabilities.
- Cutting edge security mechanisms.
- Chrome OS monitoring and management.
- Real-time Data Loss Prevention (DLP).
- Admin task delegation.
- Full Google Classroom insights and management.

**Google Workspace Admins will Multiple Products with an All-in-One solution.**

The "Number of Meetings per Day" report generated by the GAT+ tool helps the People Analytics Team at JerseySTEM analyze volunteer activity and contributions to the organization.

JerseySTEM

All the usage and audit data for everything in Google Workspace is all in one place. It makes it easy to find where data is going, setup alerts for DLP, and change permissions on a live environment.

Justin Penchina

Practical Security in a Non-Practical World. We have been able to audit each user and their account to investigate HR issues as well as technical questions. Way better intel is delivered than the competitor products.

Dane D.

I believe they are the only one in their field! It is comprehensive, it fulfills our need needs in auditing, monitoring... etc. We were in search of competitors to compare, but we didn't find any competitors initially.

Abdulaziz A.

# Use cases with our customers on Google Workspace

Google Drive Management, Migrations, Sharing Remediation, etc...

[SEE MORE](#)

## Actionable Insights

Understand and report on user collaboration. Measure performance and flag unusual activities. Generate statistical analysis and record data for all time.

[UNDERSTAND BETTER](#)

## Audit File Accessibility

Identify files based on their accessibility, both inside and outside your organization. View their granular permissions and create tags for easier management and filtering.

[RECOVER AND MANAGE](#)

## Bulk Security Tasks

Change ownership or file access rights. Silently copy or view files in bulk. Give pre-approved access to all files to a range of users. Change ownership of an entire folder tree.

User management, monitoring, protection, etc...

## Secure and Automate user Offboarding

Revoke user access, reallocate resources, force sign out, email migration, etc...

## Streamline user Onboarding

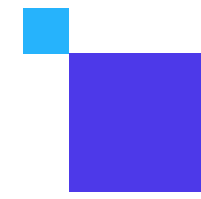

Create users, send welcome emails, add users to groups, preload files, assign contacts, etc.

## Delegate Access to non-google admins

To create their own workflow to be approved by a designated Security Officer to keep your data secure.

## Bulk signature management

Create users, send welcome emails, add users to groups, preload files, assign contacts, etc.

# Use cases with our customers on Google Workspace

## Data Compliance (GDPR, HIIPA, ISO 9001, etc...)

- Proper workflow to ensure only approved access to sensitive content
- Real-time monitoring of all sensitive information being typed, copied or pasted
- Covers all Chrome browser-based activity
- No sensitive content ever has to pass through our servers
- Report on file loss via email attachment

## Google Workspace Data Governance

The ability to show that your staff and customer data is not carelessly exposed via file sharing or email attachments is essential for GDPR compliance.

To achieve that, regular and scheduled testing of all content and shares should be carried out.

| ✓ PIA                 | ✓ DPIA                          |

## ChromeOS Management, Monitoring, Protection

### Real-time Monitoring

Real-time alerting for inappropriate content and Data Loss Prevention (DLP), on all sites, in all locations and at all times.

### Oversee

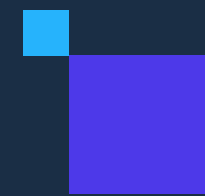

View granular details of all Chromebook and ChromeOS devices on your network. Sort them by model, group, IP, user, device location or OS version to easily keep track of them.

### Manage

Deprovision, disable or re-enable Chromebooks and ChromeOS devices. Move devices across different organisational units, groups or users, seamlessly.

### Automate

Build a workflow to offboard or modify a set of Chromebooks or ChromeOS devices assigned to any user or 'group to deprovision'.
