

VM Option

For SolarWinds Database Performance Analyzer

SolarWinds® Database Performance Analyzer VM Option provides deep visibility into VMware® vSphere metrics for database instances running in virtual machines.

FEATURES

- 24/7 real-time, all-the-time performance monitoring
- Detailed historical data to go “back in time” to pinpoint problems
- Health status to see the overall performance of your database VM
- Unique VM layer view to line up database, VM/OS and physical host data by time slice
- VM configuration data allows you to see Virtual Machine, Host, Host VMs, and more
- Annotation of events potentially impacting database instance performance like vMotion
- Monitor impactful VM metrics like Co-Stop and memory ballooning

ABOUT SOLARWINDS

SolarWinds (NYSE:SWI) is a leading provider of powerful and affordable IT infrastructure management software. Our products give organizations worldwide, regardless of type, size, or IT infrastructure complexity, the power to monitor and manage the performance of their IT environments, whether on-prem, in the cloud, or in hybrid models. We continuously engage with all types of technology professionals—IT operations professionals, DevOps professionals, and managed service providers (MSPs)—to understand the challenges they face maintaining high-performing and highly available IT infrastructures. The insights we gain from engaging with them, in places like our **THWACK** online community, allow us to build products that solve well-understood IT management challenges in ways that technology professionals want them solved. This focus on the user and commitment to excellence in end-to-end hybrid IT performance management has established SolarWinds as a worldwide leader in network management software and MSP solutions.
