

VECTORWORKS®
LANDMARK

Vectorworks Landmark is the all-in-one program that will transform your design, presentation, irrigation, and documentation workflows. Unlike other software, Vectorworks enables you to design without limits and supports your entire project from beginning to end, or anywhere in the process – with purpose-built BIM tools for the landscape industry.

LANDMARK TOP BENEFITS

CREATE POWERFUL PRESENTATIONS

Produce remarkable line drawings and 3D presentations to impress even the toughest of clients.

WORK WELL WITH OTHERS

Vectorworks robust interoperability gives you the ability to collaborate and share files with colleagues, consultants, and clients.

Use Project Sharing so your entire team can work on the same Vectorworks file at the same time.

YOU NEED BIM, YOU NEED LANDMARK

Vectorworks Landmark's BIM capabilities allow you to design with data instead of solely relying on geometry, 2D lines, or 3D models.

Link drawings, details, models, and schedules – a change in one place is reflected everywhere, so you can spend more time designing and less time manually updating drawings.

With the most import/export capabilities available among other landscape design software, along with support for Open BIM and IFC, you can conveniently work alongside architects who use other applications.

MAKE INFORMED DESIGN DECISIONS

Automatically generate schedules and reports, calculate construction costs and material takeoffs, analyze terrain for cut/fill, slope, and drainage, evaluate water budgets, and track sustainability goals to support LEED and SITES projects.

VECTORWORKS UNIVERSITY

Take advantage of free webinars and tutorials to expand your knowledge of the endless capabilities of Vectorworks. Put your knowledge to the test and earn LA CES and APLD credits.
