

Use the Power
of ASO tools
to increase
organic installs

● What is ASO and why do I need it?

ASO (App Store Optimization) is a set of actions to promote a mobile app in the App Store, on Google Play and in other app stores.

ASO includes text and graphical optimization. The first affects your positions by keywords and it is aimed at increasing the visibility of the app. Graphical optimization goes further, transforming viewing of the app into an install. It is important to comprehensively use, test and update them.

● Text optimization

Users will search your app using relevant queries. These are the keywords. If your app is indexed by them, users will find you.

Text optimization involves high-quality work with keywords. In simple terms, you need to insert existing keywords into text elements on the app page. The text elements vary by store. For example, Google Play doesn't have a keyword field like the App Store. In turn, in the App Store, unlike on Google Play, description is not indexed by keywords. Now, let's list all the text elements in order of importance.

with ASO

Best title for your app
Best subtitle among competitors

How can Checkaso help you?

We can

Checkaso is an analytical platform that rates your ASO performance and gives you custom tips on how to improve it. It's created by ASO specialists and fits users of any experience from beginners to enthusiasts with a lot of optimized apps behind.

The platform algorithms provide highly accurate data on keywords impressions and search volume, live search results, ranking history, competitor analysis for the App Store & Google Play, and more.

Search for keywords

Track all changes

Compose and edit text metadata

Work with ratings and reviews

Do competitive analysis

Work on visibility in the store

Search for growth areas

Localize app metadata

Track competitors' changes

Promote and track in-apps

Why our clients choose Checkaso

Checkaso is an ASO tool for all levels, from beginners to advanced. One of the best features is the ASOindex that gives you all the ways you can optimize your app, and it's completely free. Checkaso also has a set of tools that are perfect for app localization and new market research — keyword impressions that show how visible your keywords are, ranks by country, and a one of a kind translator.

Steve P. Young
CEO
App Masters

For me, **Checkaso** platform seems very convenient. The main thing developers always answer questions very quickly. Thanks to this service, I've created my first semantic core. There are also very handy features for working with competitors and feedback. The service is constantly developing, I liked it very much!

Alexey Sichkarenko
Product Manager
Hunter Humster

Diveo Media

Checkaso is the most comfortable and stylish work platform I've ever seen. The functionality is very pleasing, and without a text editor I feel like no hands at all. I work on ASO for my applications only in this editor.

Our indexes

ASO Index

shows the level of your app's optimization in Apple App Store and Google Play Market from 0 to 10

ASO Index provides an opportunity to observe all the strengths and weaknesses of the app in comparison with competitors. This index is based on many factors: the number of characters in text elements, screenshots, reviews, average rating, frequency of keywords, and visibility.

Search Visibility Index

shows how easy it is to find the app by keywords

Search Visibility Index helps to evaluate the general level of iteration without going into detail right after the update, and focus on finding growth areas in the future using the related tools. With SVI you'll know how effective the search strategy is within the Search channel, considering positions and popularity of key queries.

Performance Index

shows how effectively you attract organic traffic to your app page in a selected country

Performance Index Explore will reveal in which countries you're most attractive to users and in which countries you might need to put more effort into driving traffic. Varying from 1 to 10, it can be displayed as a map or as a list and provides data for the last seven days available in dynamics.

Browse Visibility Index

shows how well an app is ranked in the different category sources

Browse Visibility Index will help you quickly detect and record changes in app visibility after each iteration or update, compare your app with those of your competitors, and track your progress using benchmarks by category. Besides, you can track the Browse Visibility Index highs and lows.

A sandbox to prepare your perfect next update

Use our one of a kind Text editor to cover as many keywords in your metadata as possible and increase your app impressions and organic traffic.

- Try different versions of your app page;
- Look how many keywords you cover in your metadata;
- Work with keywords and try the best ones for your update;
- Use built-in translator to localize your app;
- Copy and paste the results to your App Store Connect or Google Play Console in a few clicks.

The screenshot displays the ASO editor interface. At the top, there are two tabs: "Super text ASO" (Save on 11:59) and "New text ASO..." (Saved on 03:43). Below the tabs, there are three progress indicators for "Title" (25 out of 30), "Subtitle" (37 out of 30), and "Description" (2438 out of 4000). The "Title" field contains "VSCO: Photo & Video city!". The "Subtitle" field contains "Creative Tools & Video Stories for your profile" and shows a red warning: "* Your exceed the maximum allowed number of characters". The "Description" field contains "VSCO is a place where expression matters most. We offer creative photo and video editing tools, inspiration, and a place for you to be you." To the right, there is a "Used keywords" section with a bar chart and four filters: "SearchVolume from 100 to 81: 53", "SearchVolume from 80 to 61: 13", "SearchVolume from 60 to 41: 7", and "SearchVolume from 40 to 21: 5". Below that is a "Tracked keywords" table with columns for "Keyword name", "Search Volume", "Rank", and "All apps".

Keyword name	Search Volume	Rank	All apps
photo editor	100	3	324
video editor	100	2	163
photo collage	98	1	32
picture collage	98	5	653
picture editor	97	15	23
filters for pictures	95	19	324
photo social	95	23	163

photo instagram	91	27	54

Increase your app traffic worldwide with Performance tool

Monitor your app performance in every country to build an international marketing strategy and get more installs from all over the globe

Growth opportunities everywhere

- Top 5 countries with the highest Performance Index;
- Top 5 countries with the lowest Performance Index;
- Map with Performance Index by country.

Insights become ideas installs revenue

Keywords can be like magnets for users. Explore the most effective and catchy ones to boost your installs.

- Advanced filters and search allow for cherry-picking effective keywords;
- Built-in translator;
- Live Search for app that can be found by the keywords you're interested in;
- Handy search bar for collecting keywords suggestions.

The screenshot displays a search interface with a 'Suggest Search' table and a 'Live Search' overlay. The table lists various search terms with their respective metrics.

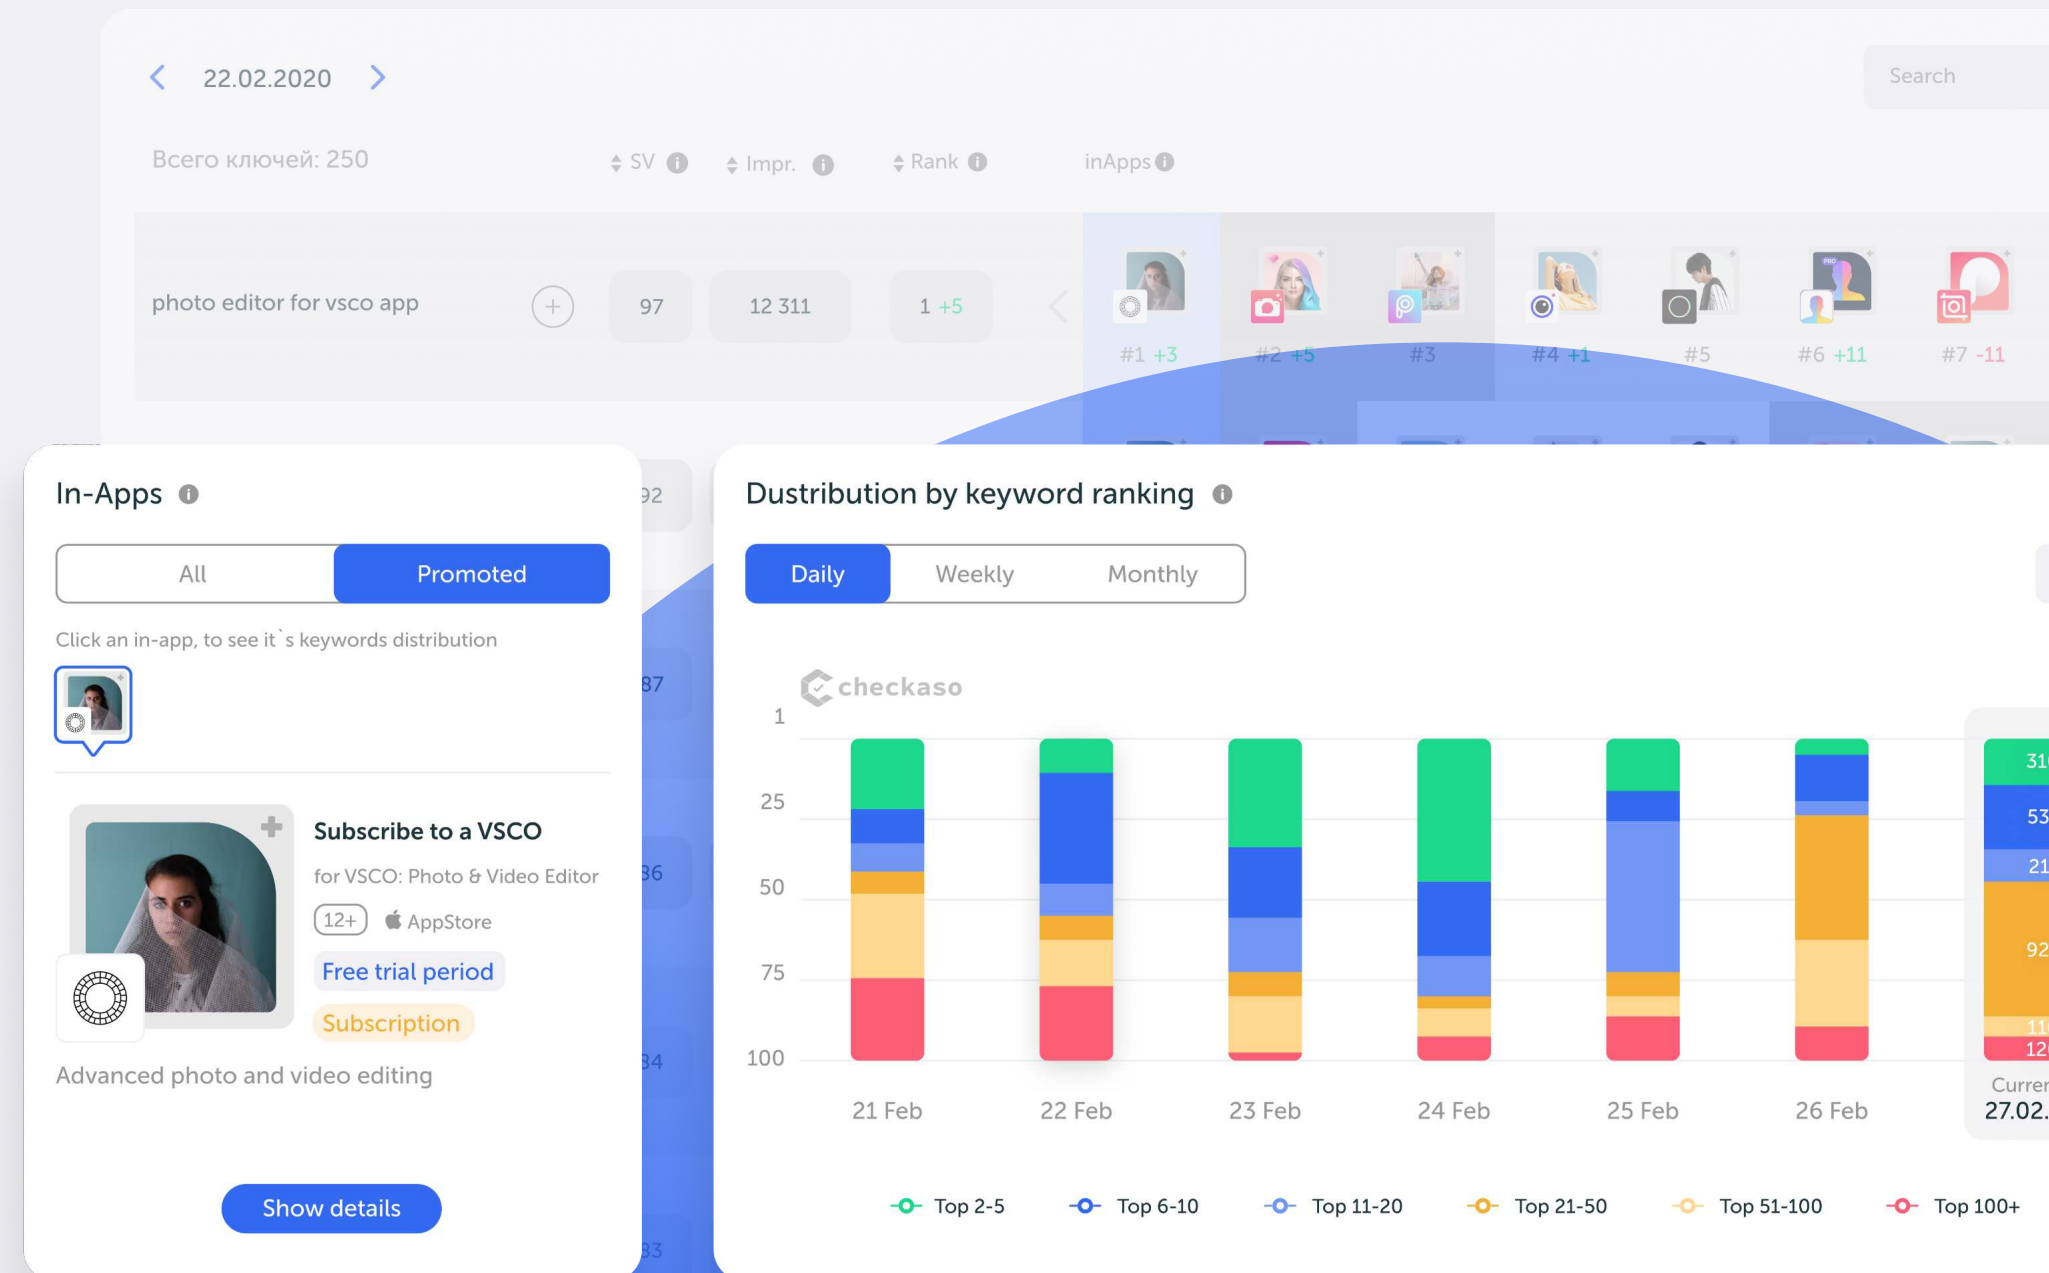

Keyword	Total: 450	SV	Impr.	Rank
vsco	97	12 311	1	
vsco filter	92	123 242	24	
vsco: photo & video editor	86	913 213	34	
vsco girl wallpapers	84	8 214	9	
v-scorebook	83	9 182 314	65	
vsco girl stickers -wasticker	83	8 863	12	
aesthetic vsco wallpapers hd	82	117	2	
aesthetic vsco wallpaper	81	1 534	8	
filteresco: presets for vsco	6	3	17	

The 'Live Search' overlay shows a search bar with the text 'vsco' and a list of app results, including 'vsco: photo & video editor' and 'vsco girl wallpapers'.

Your app's extra content. Our In-Apps tool. It's a good match!

If you offer paid subscription or additional paid content, then you definitely want your users to purchase it. We have put all the tools for competitive analysis and promotion of your in-app purchases into one section.

- Analyze your competitors' pricing policy;
- Run your pricing policy and don't miss the chance to make a profit;
- Track keywords and keep an eye on their Search Volume, Impressions, and Ranking;
- Use Keyword ranking distribution graph and distribution details to get full analytics.

Spy on your competitors like a pro to win traffic

Use Checkaso tools to get insights about your competitors, boost your app installs from the search, and take over your niche.

- Overview of the ASOindex worldwide;
- Competitors analysis for a quick ASO comparison;
- Comparative analysis to:
 - Compare any two app pages on one screen
 - Check out previous app versions
 - Track how others localize their metadata

The image shows a side-by-side comparison of two app pages from the App Store, as viewed through the Checkaso tool. On the left is WhatsApp Messenger, and on the right is Telegram. Both pages show the app icon, name, developer, category, and price. Below this, there are sections for 'Screenshots', 'Full Description', and 'Ratings & Reviews'. The WhatsApp page shows a 4.8 star rating with 16,133,776 ratings, while the Telegram page shows a 4.5 star rating with 4,822,093 ratings. The screenshots section for WhatsApp shows four different views of the app's interface, including a chat list, a chat conversation, and a video call screen. The Telegram page shows four screenshots highlighting features like 'Fast', 'Secure', 'Free', and 'Powerful'.

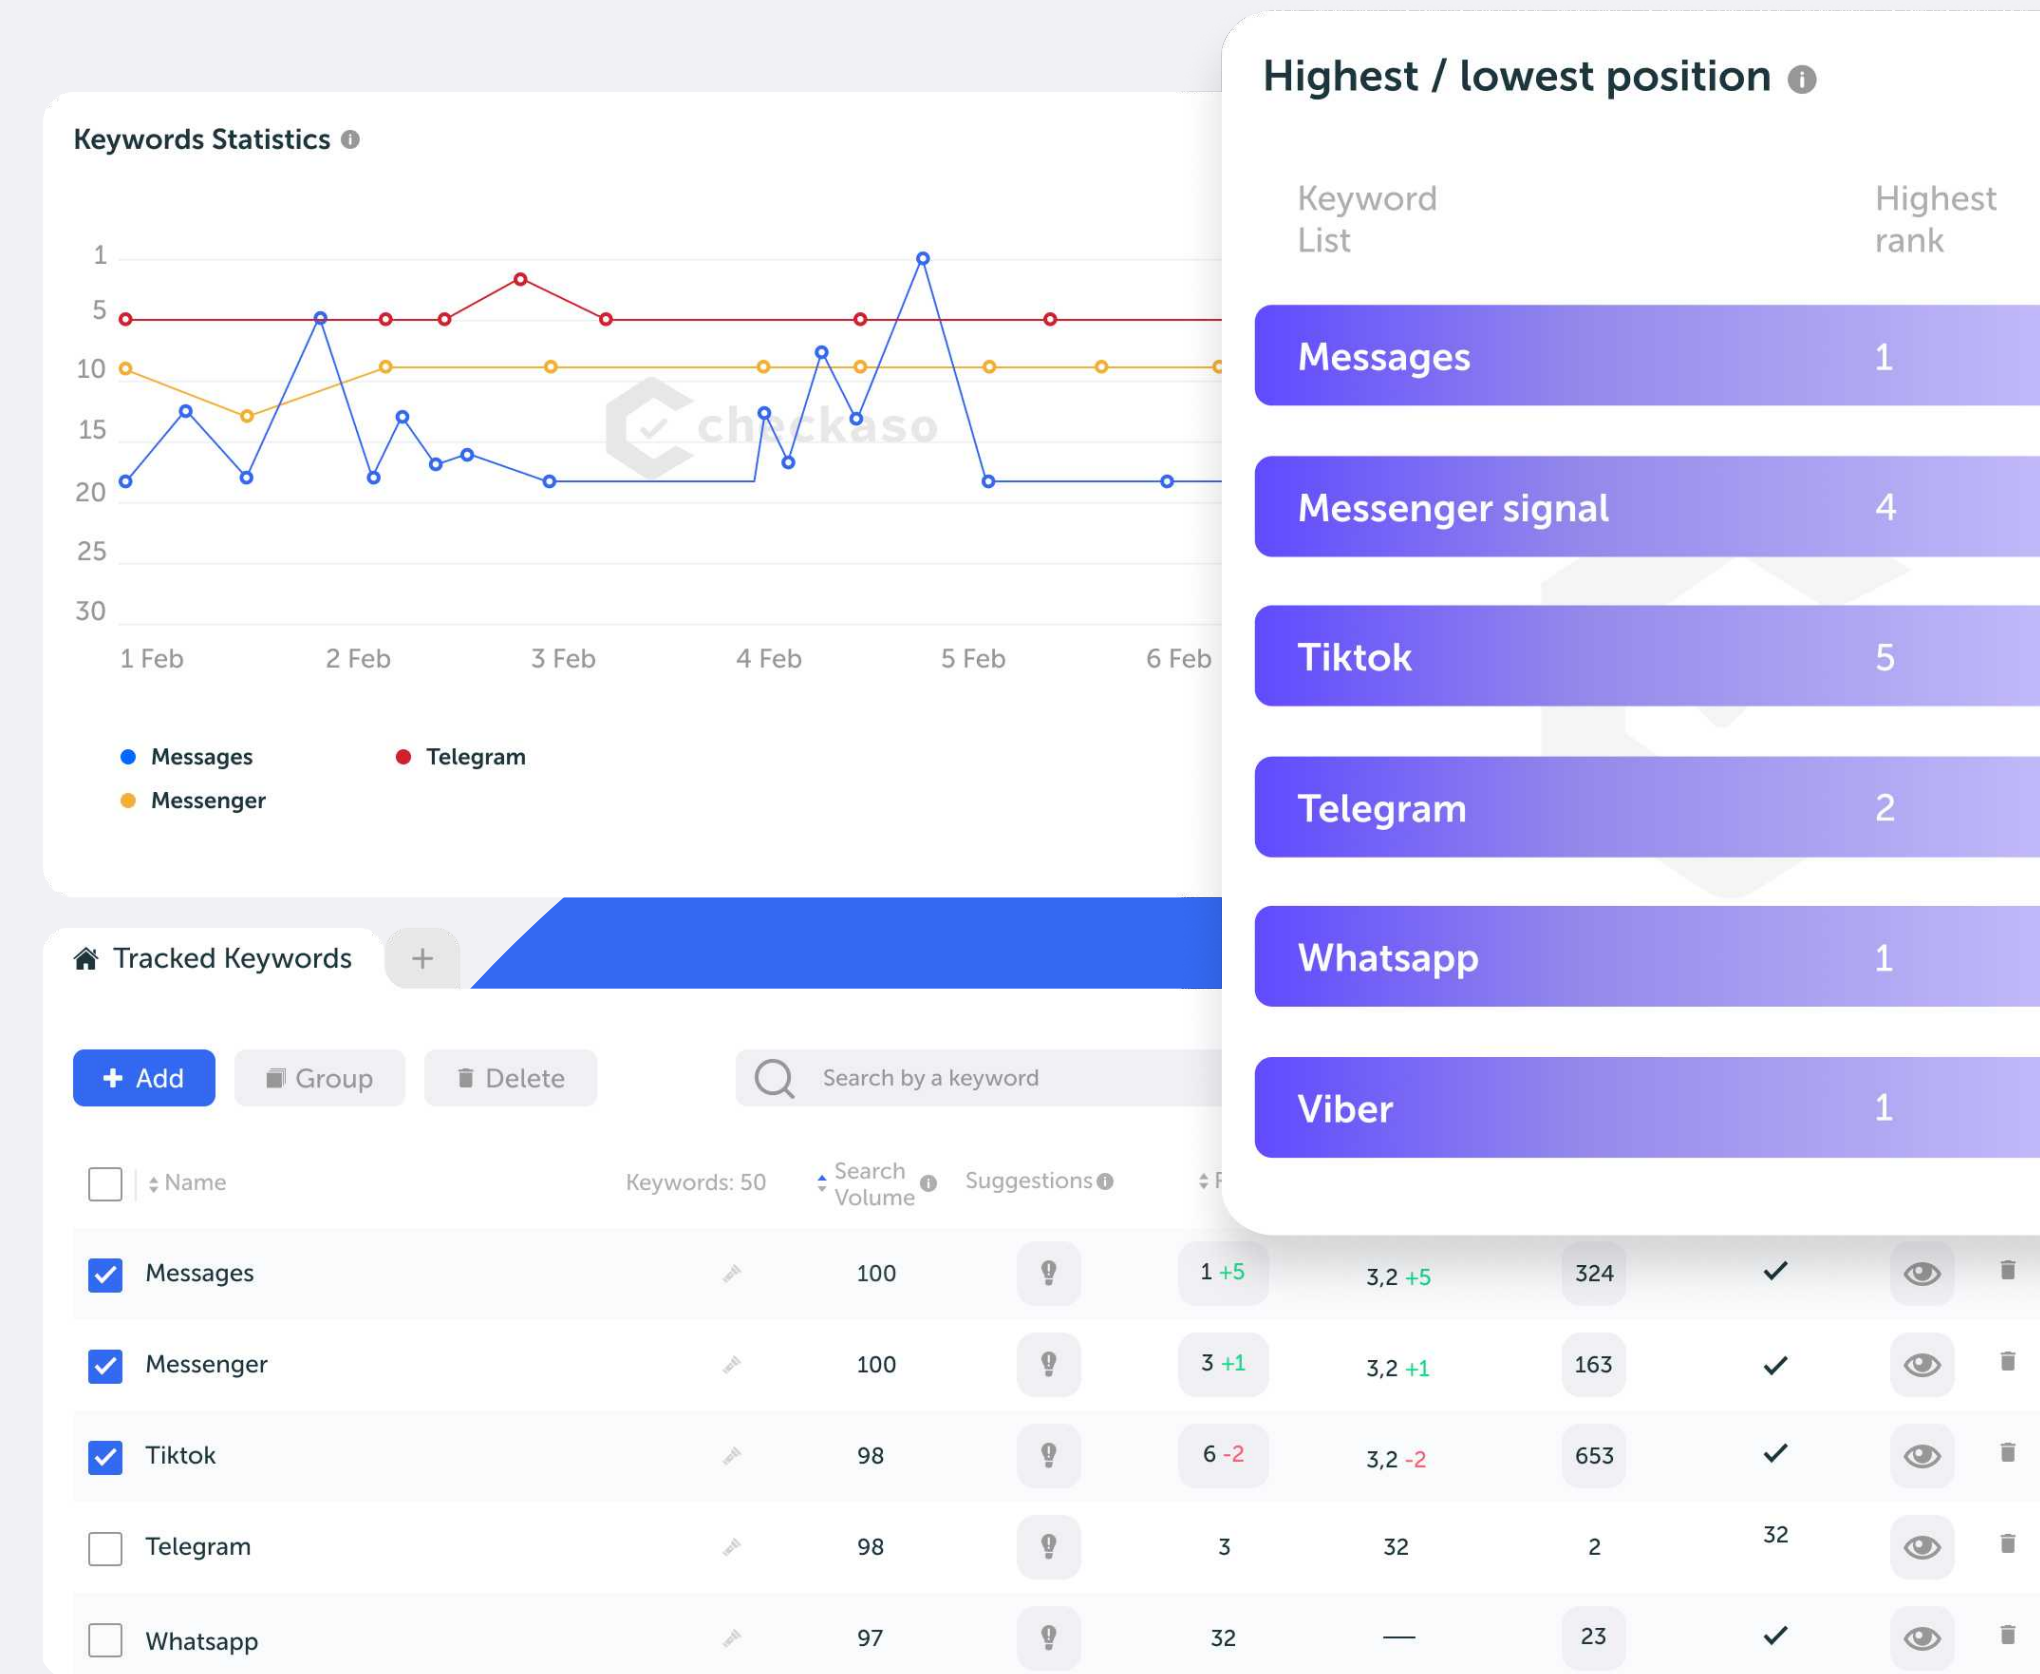

App	Rating	Total Ratings
WhatsApp Messenger	4.8	16,133,776
Telegram	4.5	4,822,093

Keyword Analysis

This tool helps to define the main idea of your app and find its audience. To make it easy, we offer a welcome pack of 50 keywords that you can add with a single click. Our algorithms automatically generate them. Use the keywords to get started.

- Keywords statistics diagram shows the pattern of 10 keyword ranking changes for the selected period;
- Keyword distribution diagram shows it for the first and the last day of selected period;
- Tracked keywords.

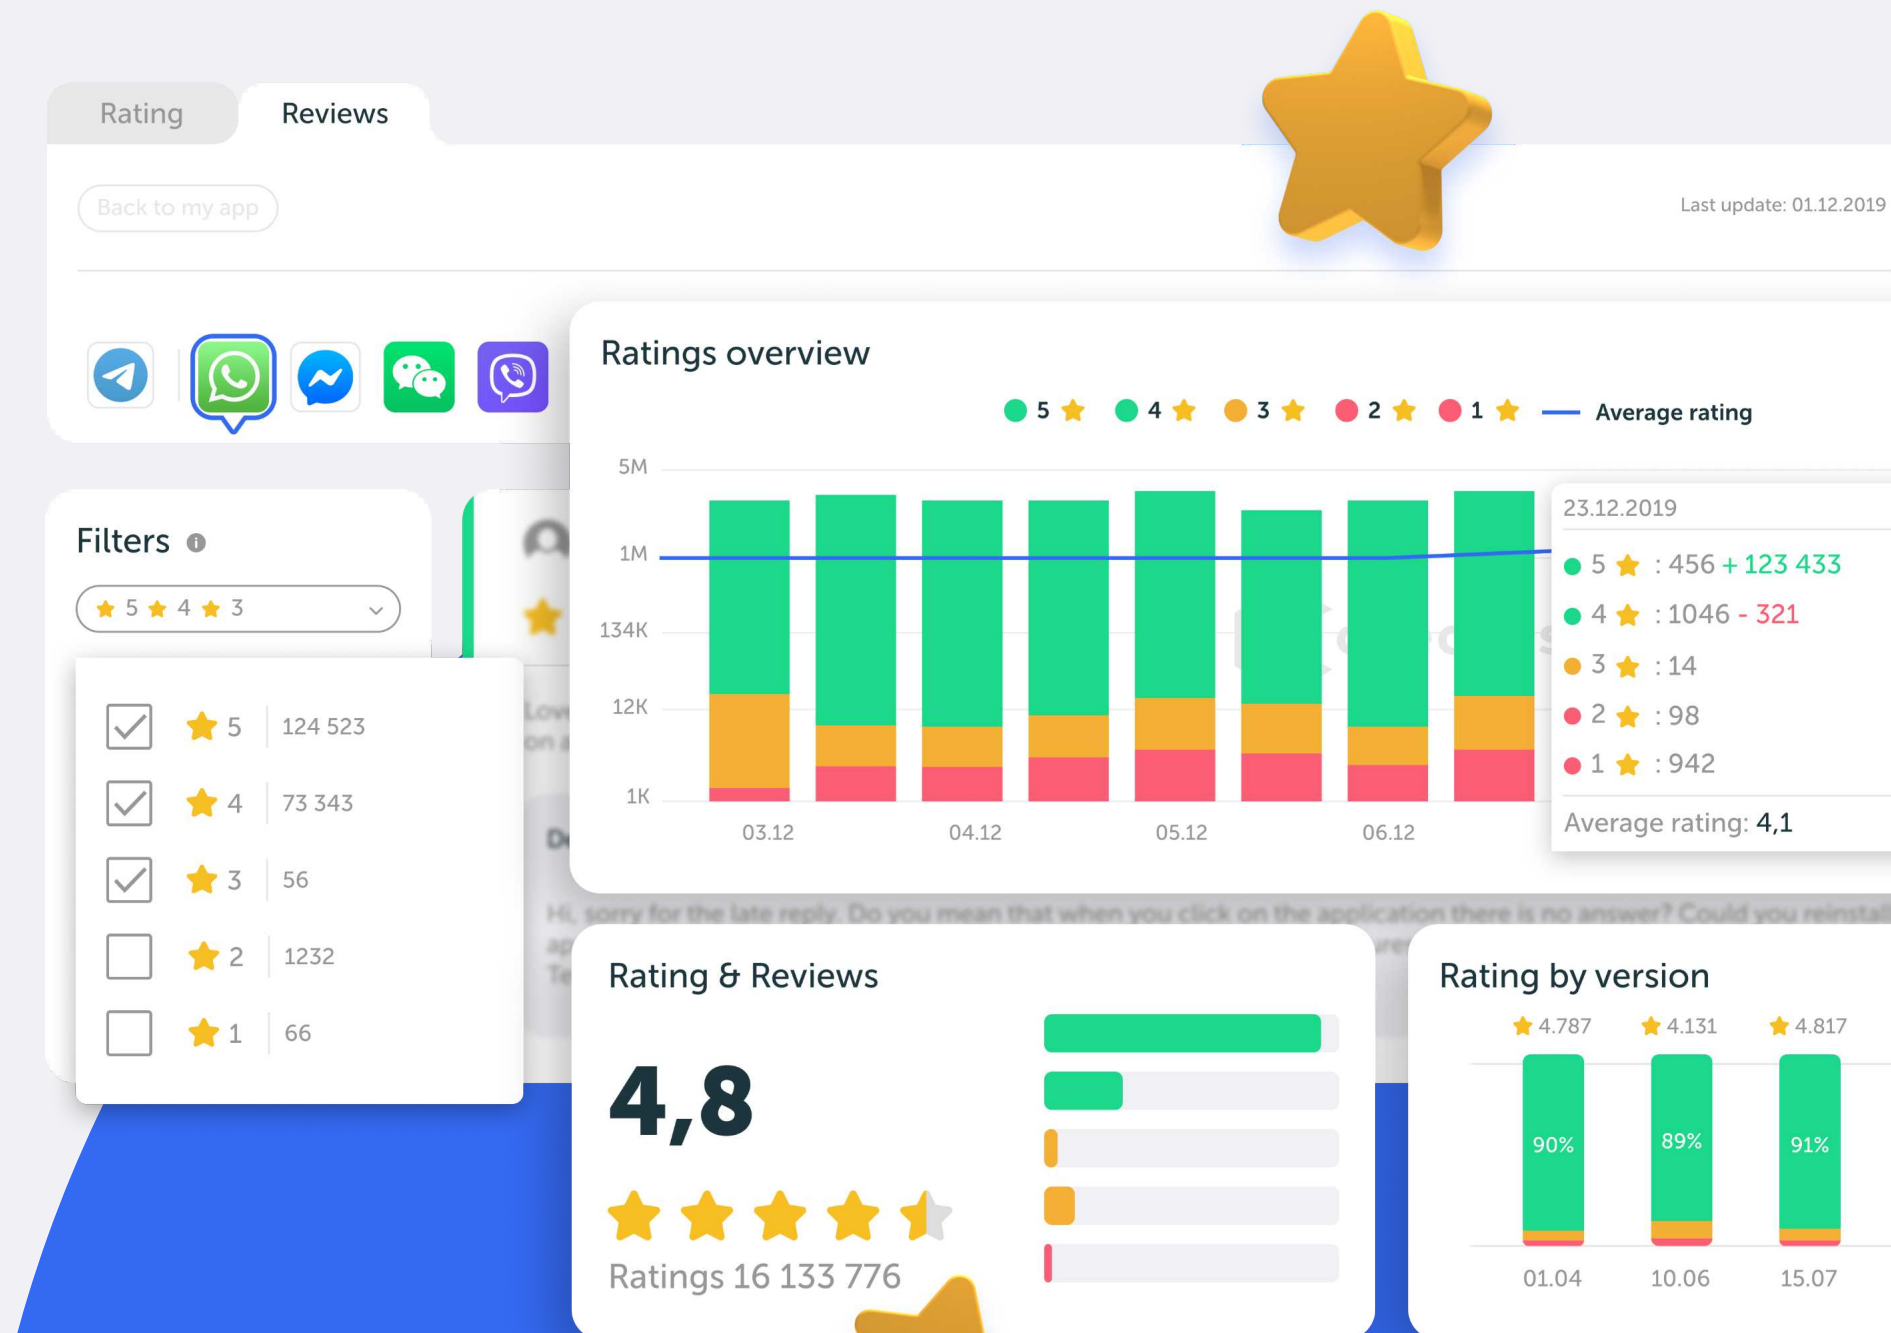

To avoid choosing keywords from scratch for each new experiment, save them for the future. Group the keywords as you like. This section also allows you to create your own subsections by clicking + on the Keywords Analysis tab next to 'tracked keywords'.

Ratings & Reviews

This tool helps to do rating analysis with detailed statistics and forecast, besides, it has a varied search by reviews

- For the Rating Overview, select the required period to observe the trends and rating, going up or down;
- In the Rating by Versions field, you can track how users react to your updates and easily compare the percentage ratios of different reviews
- All reviews can be filtered by different criteria's
- Analyze whether this rating trend correlates with app updates;
- Once you get an idea of your current rating trend, it will be easier to build a strategy;
- Rating Forecast feature will help you to make a growth forecast.

-15% off when billed annually.
-10% off when billed semi-annually. All the prices include VAT.
