

Intelligent Cloud Orchestration

Save up to 80% on your Amazon Elastic Compute Cloud (Amazon EC2) costs

Intelligent brokered cost optimization with *Xosphere Instance Orchestrator* gives you the reliability of On-Demand at the price of Spot.

Thought **SPOT** wasn't possible for you?

Think again.

How it Works

Runs on native AWS Auto Scaling Groups
Spot instances replace On-Demand instances
Falls back to On-Demand when Spot price is no longer favorable

Safe & Secure

No 3rd party access to your Amazon Web Services (AWS) account required
All sensitive data stored in your account
You are in control

Reliable & Low Risk

Native AWS Auto Scaling Groups stay in control
Application uptime remains the same
Automatic diversification of Spot pools

Quick & Easy

Works out of the box with your applications
Your infrastructure-as-code stays the same
Install in 2 minutes with CloudFormation or Terraform

Simple & Fair Pricing

Usage based billing
10% of On-Demand rate
Instant ROI

Typical Savings:

Monthly savings of **\$19,296** or **41%** with Xosphere.

	Without Xosphere	With Xosphere
Reserved	\$27,832	\$0
On-Demand	\$19,289	\$4,505
Spot	\$0	\$18,181
Xosphere License	\$0	\$3,215
Total	\$47,121	\$27,825

Scenario: 300 instances (50 m5.xlarge, 100 c4.2xlarge, 150 r4.2xlarge) with 70% reserved for one year with no up-front.

Containers

Scale container infrastructure at minimal cost using your favorite orchestrator

Datastores

Run your favorite SQL or NoSQL datastore cost effectively

Applications

Save on your your custom applications written in any language or platform
