

Reporting & Analytics Solution for Collaboration

Call History, QoS, and Capacity Analysis and Reporting

VariPHY is the preferred Reporting & Analytics Solution for Collaboration for over 1,500 public and private organizations totaling more than 4 million phones in over 30 countries.

Remote Phone Control & Macros

- Eliminate in-person troubleshooting
- Perform button presses remotely
- Delete ITL files remotely
- View phone's live QoS call stats
- Send announcements to phones

Change Management & Audit Reporting

Comparison Summary	CUCM Data	Added	Removed	Changed
CCCP Phones		10		
User Group - Application Users		6	1	
Application Users		2	1	1
Lines		12		2
Service Parameters				2
Route List - Route Groups		1		
Route Lists		1		
IP Phone Serial Numbers, Firmware, and CDP		4		12

Directory Number Management

Elective Number	Feature	Status	Description	CR	Assigned Recently
2020	INTERNAL_PT	Available			
2021	INTERNAL_PT	Unassigned			
2022	INTERNAL_PT	Assigned			

As-Built Configuration Reporting

Status Summary	Phone Count
Registered	11
Unknown	13

Phone	Description	Device Pool	DN	IP Address	Status
SEP800000000000	San Diego IPC UCDA	Default	1112	10.20.30.226	Unknown
SEP800000000001	Auto 1007	Default	1007	10.20.30.226	Registered (10.20.30.39)
SEP800000000002	Auto 1008	Default	1008	10.20.30.226	Registered (10.20.30.39)

- View baseline and archive configuration snapshots
- Audit node moves, adds, and changes
- Compare past vs. present settings
- Archive and search node audit logs

- Eliminate the need to maintain spreadsheets
- View DNs as Available, Unassigned, or Assigned
- Link directly to CUCM DN configuration page
- Manage the directory in a single pane of glass

- Identify phone registration and serial numbers
- Generate real-time or historical reports
- Search via cluster-wide or custom filtering
- Export in PDF, CSV, or Microsoft Word/RTF

The preferred analytics platform for Cisco Collaboration.
